

**THE BIDEN BORDER CRISIS: NEW DATA AND TESTIMONY SHOW
HOW THE BIDEN ADMINISTRATION OPENED THE SOUTHWEST
BORDER AND ABANDONED INTERIOR ENFORCEMENT**

Interim Staff Report of the
Committee on the Judiciary
and
Subcommittee on Immigration Integrity, Security, and Enforcement
U.S. House of Representatives

October 9, 2023

EXECUTIVE SUMMARY

New data and information obtained by the Committee on the Judiciary and its Subcommittee on Immigration Integrity, Security, and Enforcement reveal that the Biden Administration has failed to remove, through immigration court removal proceedings, over 99 percent of those illegal aliens who have been released into the country under President Joe Biden. This information contradicts the assertions of the Administration, and the statements of Homeland Security Secretary Alejandro Mayorkas, that the southwest border is closed and illegal aliens are removed from the country quickly.

These new data reinforce widespread concern about the state of the border. More than two and a half years into President Biden’s term, his Administration’s border crisis continues unabated. Publicly available information shows that encounters of illegal aliens on the southwest border surpassed 100,000 for the 31st straight month and total southwest border illegal alien encounters exceeded 2.2 million in the first 11 months of fiscal year 2023.¹ In August 2023, encounters of illegal aliens at the southwest border skyrocketed to 232,972,² and the unreleased encounter numbers for September 2023 will reportedly shatter previous records, exceeding 260,000 encounters in a single month.³ Meanwhile, more than 1.7 million known “gotaways” have evaded Border Patrol and escaped into the interior since January 20, 2021, with untold numbers of *unknown* “gotaways” avoiding detection during that period.⁴

Under Chairman Jim Jordan and Subcommittee Chairman Tom McClintock, the Committee and its Subcommittee are conducting vigorous oversight of the Biden Administration’s immigration crisis. New nonpublic data provided by the Department of Homeland Security (DHS) to the Committee paint a bleak picture of the state of our border security under President Biden and Secretary Mayorkas. The new data are staggering:

- Of the more than 5 million illegal alien encounters from January 20, 2021, through March 31, 2023, at least 2,464,424 illegal aliens had no confirmed departure from the United States as of March 31, 2023.⁵
- Of the illegal aliens encountered in those 26 months, DHS released at least 2,148,738 illegal aliens into the United States.⁶

⁴ Casey Harper, *Border crisis creates national security threat for U.S., observers say*, WASH. EXAMINER (Aug. 7, 2023), <https://www.washingtonexaminer.com/news/border-crisis-creates-national-security-threat-for-u-s-observers-say>.

⁵ See App’x 3 (Standard Lifecycle table).

⁶ See App’x 1 (Chairman Jordan “Get Back” Correspondence Responses (Sept. 19, 2023) document).

- Between January 20, 2021, and March 31, 2023, the Biden Administration has removed from the United States only 5,993 illegal aliens who were encountered at the southwest border and who were placed in removal proceedings before an immigration judge during that time.⁷ In other words, of the at least 2.1 million aliens released into the United States since January 20, 2021, the Biden Administration has failed to remove, through immigration court removal proceedings, roughly 99.7 percent of those illegal aliens.⁸
- The Biden Administration’s total removals of illegal aliens encountered during that same period were just 4 percent of the number of aliens with no confirmed departure from the United States as of March 31, 2023.⁹
- These data contradict Secretary Mayorkas’s statements that the southwest border is closed and that illegal aliens are “quickly” removed.¹⁰ Instead, with more than 99 percent of illegal aliens staying inside the United States after being released by the Biden Administration, there is virtually no enforcement of our immigration laws.
- Of the illegal aliens who Secretary Mayorkas claims are asylum seekers and who were released into the United States from January 20, 2021, through March 31, 2023, only six percent were screened for a fear of persecution.¹¹
- Of the illegal aliens who were found to have a credible fear of persecution and whose asylum claims were adjudicated on the merits, DHS had removed only 874 of those aliens as of March 2023.¹²
- The Biden Administration has released into the country at least an additional 205,473 aliens through its illegal categorical parole programs.¹³

Because of the unprecedented border crisis, some Immigration and Customs Enforcement (ICE) officers have been forced to abandon arrests and removals of aliens, including criminal aliens, to process the illegal aliens who have arrived at the southwest border.¹⁴ Meanwhile, the

They will be removed most often in a matter of days and just a few weeks.”).

¹¹ See App’x 1 at 2.

¹² *Id.* at 5.

¹³ The Venezuela categorical parole program began on October 18, 2022. The Cuba, Haiti, and Nicaragua categorical parole programs began on January 6, 2023. The 205,473 figure is based data from a DHS document entitled “CHNV Travel Authorizations, Arrivals, and Entries: January 1, 2023 – September 26, 2023,” which incorporates aliens from all four countries, see App’x 5 (CHNV ATA and Parole Data), as well data from the Venezuela program from October 2022 to December 2022. See Paroles through CHNV Parole Process: October 18, 2022 – June 30, 2023 (on file with Comm.).

¹⁴ See *infra* notes 96-104.

Biden Administration’s own policies and so-called enforcement “priorities” have contributed to reduced arrests and lower removals of aliens.¹⁵ In transcribed interviews before the Committee, ICE officials—including an official with ICE’s Enforcement and Removal Operations (ERO) and multiple current ICE Field Office Directors—have testified that under the Biden Administration, releases have increased, removals have decreased, American communities have become less safe, and the Biden Administration has all but abandoned immigration enforcement.¹⁶ The testimony from these front-line immigration enforcement officials vividly shows the dangerous consequences of the Biden Administration’s open-borders policies.

The Committee and Subcommittee will continue to conduct oversight of the Biden Administration’s radical, open-borders immigration policies. This interim staff report highlights the failures of President Biden’s immigration agenda and helps to inform the House on legislative reforms to secure the border, reform immigration law, and end the far left’s policy incentives driving the crisis at the border.

¹⁵ See *infra* notes 115-25.

¹⁶ See *infra* notes 96-104, 115-25.

BORDER CRISIS BY THE NUMBERS

Since President Biden took office, Customs and Border Protection (CBP) has encountered more than 6.2 million illegal aliens along the southwest border.¹⁷ Of the more than 5 million illegal alien encounters from January 20, 2021, through March 31, 2023, at least 2,464,424 illegal aliens remained in the United States as of March 31, 2023.¹⁸ Of the illegal aliens encountered in those 26 months, DHS released at least 2,148,738 illegal aliens into the country,¹⁹ with an additional 205,473 aliens paroled into the country through September 26, 2023, through President Biden’s illegal categorical parole programs.²⁰ Significantly, the release data do not include any releases from April through September 2023, when there were more than 1.2 million additional southwest land border encounters.²¹

At the same time, the Biden Administration fails to acknowledge the reality of the situation at the border. On May 10, 2023, Secretary Alejandro Mayorkas asserted that he and DHS were “making it very clear that our border is not open, that crossing irregularly is against the law, and that those who are not eligible for relief will be quickly returned.”²² Secretary Mayorkas also stated, “Do not listen to the lies of the smugglers. This is what will happen to you. You will be returned.”²³ Data from his own department, however, tell the real story, and it is not good:

- In fiscal year 2021, the Biden Administration released 310,379 illegal aliens at the southwest border.²⁴
- In the first full fiscal year of the Biden Administration, fiscal year 2022, the number of illegal-alien releases soared to 777,283 illegal aliens.²⁵
- In just the first 10 months of fiscal year 2023, DHS released into the United States 929,496 illegal aliens encountered at the southwest border.²⁶ The CBP One mobile application facilitated 182,425 of these releases through parole.²⁷

¹⁷ CBP Southwest Land Border Encounters, *supra* note 1; Reilly, *supra* note 3.

¹⁸ *See* App’x 3.

¹⁹ *See* App’x 1. The number of releases includes the categories Non-CBP One Release with NTA, CBP One Release with NTA, I-94 Parole, Notice to Report, Other Release, and Released by ICE – Pending Resolution. *See* App’x 1. It does not include those aliens continuously detained by ICE, *see* App’x 1, or the broader category of No Subsequent Event, *see* App’x 3. Consequently, the number of releases is undoubtedly higher, as shown by the “no confirmed departure” category in other DHS data. *See* App’x 3.

²⁰ *See* note 13.

- However, the border release numbers do not include the illegal aliens who were released after being transferred from CBP to ICE.²⁸ In fiscal years 2021 and 2022, there were an additional 471,190 illegal aliens transferred to ICE custody.²⁹ In the first 10 months of fiscal year 2023, 238,870 illegal aliens were transferred to ICE custody.³⁰ In those three years, ICE released into the United States the majority of the transferred illegal aliens.³¹
- The border release numbers also do not include the unaccompanied alien children who were transferred to the custody of the Department of Health and Human Services (HHS). In fiscal years 2021 and 2022, there were 249,304 unaccompanied alien children transferred to HHS custody, with an additional 92,498 transfers in just the first 10 months of fiscal year 2023.³² That is a total of at least 341,802 unaccompanied alien children transferred to HHS from the beginning of fiscal year 2021 through the end of July 2023.³³
- In stark contrast, the Biden Administration has removed from the United States only 5,993 illegal aliens who were encountered at the southwest border and who were placed in removal proceedings before an immigration judge between January 20, 2021, and March 31, 2023.³⁴

³⁰ *Id.*

³¹ See App'x 1 and App'x 2.

³² See App'x 2.

³³ See *id.*

³⁴ See App'x 3.

The number of border encounters and subsequent releases have ballooned across every category of “encounter” at the border. In fiscal year 2022, for instance, CBP encountered nearly five times as many single adults at the southwest border (1,662,476) than in fiscal year 2019 (368,304), which was the highest year for single adult encounters during the Trump Administration.³⁵ In the first 10 months of fiscal year 2023, that number already has approached 1.3 million.³⁶ From October 1, 2021, through July 2023, the Biden Administration released into the United States at least 879,897 single adults, with another 411,425 transferred to ICE for potential release.³⁷

Family units—or those posing as family units—also have taken advantage of the open southwest border. From the beginning of fiscal year 2021 through the end of July 2023, a little more than 1.1 million family unit individuals were released into the United States, with another 188,524 transferred to ICE for potential release.³⁸ ICE, meanwhile, has touted its new program, Family Expedited Removal Management (FERM), purportedly designed to remove from the United States family units apprehended at the southwest border.³⁹ As of September 26, 2023, ICE had removed only 196 family unit individuals as part of the program, just as CBP encountered 320,286 family unit individuals at the southwest border from May 2023 through August 2023.⁴⁰

In seeking to downplay the seriousness of the immigration crisis, Secretary Mayorkas and congressional Democrats have framed illegal aliens at the border as asylum seekers who are removed from the country if they do not have a valid claim. For example, in a March 2023 interview discussing the border crisis, Rep. Pramila Jayapal said, “To me . . . what we have to do is stick to our values, stick to our laws, which require us to be able to process asylum seekers, and make sure that we are expanding legal pathways for people to come here.”⁴¹ Rep. Hank Johnson framed his defense of the crisis more succinctly: “They’re not crossing into the U.S. illegally. They’re sitting at the border seeking asylum.”⁴²

Secretary Mayorkas himself has portrayed the millions of illegal aliens released into the United States as asylum seekers who are initially screened for a fear of persecution. In a February 2023 interview, Secretary Mayorkas stated, “The vast majority of those individuals have not sought to evade law enforcement but have actually surrendered themselves to law

⁴² Bill Melugin (@BillFOXLA), TWITTER (Sept. 27, 2023, 1:38 PM), https://twitter.com/BillMelugin_/status/1707087328832069928.

enforcement and made a claim for relief under our laws.”⁴³ When pressed on whether the illegal aliens at the southwest border were “legitimate asylum seekers or just simply people who want to cross the border because they think they’ll have a better life,” Secretary Mayorkas responded, “Of course, and so they make their claims. And the initial threshold of those claims under the law is lower than the ultimate asylum standard.”⁴⁴ In the same interview, Secretary Mayorkas claimed, “[The laws] also provide that individuals who do not qualify [for humanitarian relief] will be removed. That’s how we do our work in the Department of Homeland Security.”⁴⁵ In May 2023, Secretary Mayorkas claimed that DHS had surged “asylum officers to ensure that that screening process, that credible fear screening process, is done fairly, with access to counsel, but expeditiously.”⁴⁶

Secretary Mayorkas’s comments are divorced from the border reality. Under the Immigration and Nationality Act, certain aliens encountered at the border are subject to expedited removal, in which they are ordered removed from the United States without further review or hearing.⁴⁷ The prohibition on further review, however, does not apply to any alien who indicates an intention to apply for asylum or otherwise expresses a fear of persecution.⁴⁸ In those cases, an asylum officer must conduct a credible fear interview to determine whether “there is a significant possibility” that the alien could establish eligibility for asylum.⁴⁹ If an alien fails to show a credible fear, the alien should be removed pursuant to the expedited removal process.⁵⁰

Despite Secretary Mayorkas’s claims that aliens encountered at the border are, in fact, asylum seekers, the Biden Administration has placed only a fraction of illegal aliens into expedited removal to be screened for asylum eligibility. In fact, of the more than 2.1 million illegal aliens released by DHS from January 20, 2021, through March 31, 2023, only 197,531 illegal aliens were placed in expedited removal and claimed a fear of persecution, with upward of 2 million aliens being released or placed directly in removal proceedings without first having established that they even feared persecution.⁵¹ Additionally, between January 20, 2021, and March 31, 2023, 25 percent of aliens placed into expedited removal did not claim a fear of persecution.⁵² DHS reported no “confirmed removal or return” for nearly 20,000 of those illegal aliens who did not even claim a fear.⁵³ Of the 197,531 who were set to be screened for a fear of

⁵³ *Id.*

persecution, DHS only interviewed 134,449 illegal aliens for a credible fear of persecution.⁵⁴ Stated differently, of the illegal aliens who Secretary Mayorkas claims are asylum seekers and who were released into the United States from January 20, 2021, through March 31, 2023, only six percent were even screened for a fear of persecution.⁵⁵

Ultimately, 72 percent of illegal aliens screened for a credible fear of persecution were found to have cleared that low bar; however, of the 33,345 illegal aliens who were found to *not* have a credible fear of persecution, more than 47 percent remained in the United States and were not removed by March 31, 2023.⁵⁶ Finally, of the illegal aliens who were found to have a credible fear of persecution and whose asylum claims were adjudicated on the merits, more than two-thirds failed to establish asylum or another form of relief, resulting in final orders of removal.⁵⁷ As of March 2023, DHS had removed only 874 of those aliens, which is less than half the number who received final orders of removal.⁵⁸

Even the Biden Administration has previously acknowledged the loophole of the low credible fear standard, as it incentivizes mass illegal immigration into the United States by aliens whose claims most likely will ultimately be denied because they are economic migrants and not asylum seekers fleeing persecution. The Biden Administration emphasized that, while “[a] full 83 percent of the people who were subject to [expedited removal] and claimed fear from 2014 to 2019 were referred to an [immigration judge] for [removal] proceedings,” only “15 percent of those cases that were completed were granted asylum or some other form of protection.”⁵⁹ In an October 1 interview, New York Governor Kathy Hochul seemingly acknowledged the problem as well, as she not only called for “a limit on who can come across the border” but also observed that “people coming from all over the world are finding their way through, simply saying they need asylum, and the majority of them seem to be ending up in the streets of New York.”⁶⁰

During a time in which DHS released at least 2.1 million illegal aliens into the United States, DHS data show that immigration authorities only removed 108,102 of those aliens from the country.⁶¹ Of those aliens removed, only 5,993 removals were for aliens placed in removal proceedings before an immigration judge.⁶² That removal rate is 0.27 percent of all aliens released by the Biden Administration through March 31, 2023.⁶³ In other words, the Biden Administration failed to remove, through immigration court proceedings, 99.73 percent of illegal aliens released into the United States during President Biden’s first 26 months in office.⁶⁴ In fact, the Biden Administration’s 108,102 *total* removals account for just 2.15 percent of all southwest

⁶⁴ *Id.*

border encounters during that time and just 4 percent of the number of aliens with no confirmed departure from the United States.⁶⁵

To excuse the abysmally low number of removals, DHS blamed the backlog at the nation’s immigration courts through the Executive Office for Immigration Review (EOIR).⁶⁶ Specifically, DHS stated that “as of FY 2022 year-end, more than a quarter (26 percent) of EOIR cases resulting from [southwest border] encounters making credible fear claims from as long ago as FY 2014 remained in proceedings, one-third (33 percent) of EOIR cases resulting from FY 2016 encounters remained in proceedings, and almost half (48 percent) of EOIR cases resulting from FY 2019 encounters remained in proceedings,” with a mean completion time of 4.2 years.⁶⁷ According to EOIR’s own data, however, the immigration court backlog has only grown under the Biden Administration, skyrocketing to nearly 2.2 million pending cases at the end of the third quarter of Fiscal Year (FY) 2023,⁶⁸ despite employing the historically high number of 659 immigration judges.⁶⁹ Consequently, the Biden Administration’s border policies, including placing aliens directly into removal proceedings without first screening them for a fear of persecution, have only worsened immigration judges’ ability to adjudicate cases in a timely manner.

At the same time, far from disincentivizing illegal immigration at the border, Secretary Mayorkas’s policies only encourage more aliens to illegally cross into the United States—and continue doing so until they are successful. Instead of placing aliens into expedited removal, through which they would receive a removal order and be barred from re-entering the United States,⁷⁰ DHS has given tens of thousands of aliens the option to leave the United States through “voluntary return,” which carries no immigration consequences.⁷¹ In fact, at a May 2023 press conference, Secretary Mayorkas boasted about DHS’s soft-on-illegal-entry approach:

We are giving the option to individuals, who are in our custody, the option of voluntarily returning to the country from which they came. Because of the consequence of a removal, people have to understand that under Title 8 of the United States Code, when one is removed, one faces [] at least a five-year bar to reentry. And so[,] we will give people an opportunity to avoid that tougher consequence by voluntarily returning.⁷²

In the first 10 months of fiscal year 2023, there were 75,575 voluntary returns at the southwest border, 23,105 more than the previous eight fiscal years *combined*.⁷³ Because aliens do not face immigration consequences through voluntary return, they have myriad opportunities to re-attempt their illegal entries.

BIDEN ADMINISTRATION’S NOTICE TO [DIS]APPEAR

Of the millions of illegal aliens released into the United States, DHS can locate only a fraction of them. On September 6, 2023, the DHS Office of the Inspector General (OIG) published a report, “DHS Does Not Have Assurance That All Migrants Can be Located Once Released into the United States.”⁷⁴ According to the report, “U.S. Border Patrol [] cannot always obtain and does not always record migrant addresses, and [ICE] [] does not always validate migrant addresses prior to migrant release into the United States.”⁷⁵ According to the OIG, “80 percent (790,090 of 981,671) of addresses were recorded at least twice during an 18-month period, some of which were provided by families upon release. More than 780 of these addresses were used more than 20 times.”⁷⁶ Moreover, families provided addresses to unsafe or overcrowded living conditions, as can be surmised based on multiple aliens providing the same address.⁷⁷ As one example, “DHS released 7 families, comprising 12 adults and 17 children, to a

⁷⁶ *Id.*

⁷⁷ *Id.*

single-family 3-bedroom New Jersey home in a 70-day period.”⁷⁸ Additionally, the OIG found seven addresses that were used more than 500 times each.⁷⁹

As a result, ICE’s ability to “validate migrant addresses or effectively track if migrants check in at field offices, as required” is severely limited and, in many cases, foreclosed upon entirely.⁸⁰ As the report states:

ICE must be able to locate migrants to enforce immigration laws, including to arrest or remove individuals who are considered potential threats to national security. The notable percentage of missing, invalid for delivery, or duplicate addresses on file means DHS may not be able to locate migrants following their release into the United States.⁸¹

Moreover, “[w]hen migrants do not check in, ICE . . . cannot easily locate migrants who may be threats to public safety or are scheduled for removal.”⁸² According to one ICE ERO officer interviewed for the report, “[o]fficers spend their days reviewing migrant cases at their desks and do not feel they are exercising law enforcement authority, for which they were hired” and, “without a valid address to locate migrants, ICE may only locate migrants after they have been arrested by state or local police for unrelated offenses post-release. Only *after* the migrant’s arrest would ICE be aware of the migrant’s whereabouts.”⁸³

BIDEN ADMINISTRATION HANDCUFFING OF LINE IMMIGRATION OFFICIALS

The Biden Administration’s mass release of millions of illegal aliens into the United States is matched by a similarly disastrous approach to removing illegal aliens from the country. In transcribed interviews with the Committee, ICE officials, including ICE Field Office Directors and an ICE Enforcement and Removal Operations (ERO) official, confirmed ICE’s inability to confront the ballooning number of illegal aliens in the United States due to the border crisis.

One Field Office Director stated that the hundreds of thousands of aliens in his area of responsibility’s non-detained docket represent the highest number he has seen in his more than a decade of serving as a Field Office Director.⁸⁴ He blamed the rise on the southwest border crisis and said the volume of cases is the largest he has encountered in his decades-long career.⁸⁵ Despite the expanded docket, his office employs only roughly 200 law enforcement officers.⁸⁶ Another Field Office Director said he has seen his office’s non-detained docket double in just the last few years,⁸⁷ and a Field Office Director in a major urban center far from the border

described how his area of responsibility’s non-detained docket has nearly tripled in the past two years alone.⁸⁸ This Field Office Director blamed the increase on the surge of reporting at the field office, which he attributed to swelling southwest border encounters.⁸⁹

Of the more than 2.1 million illegal aliens released into the United States between January 2021 and March 2023, 90,613 were released with Notices to Report (NTR).⁹⁰ Typically, when an illegal alien is encountered by an immigration officer, the alien is either subject to expedited removal or issued a Notice to Appear (NTA) and placed into removal proceedings.⁹¹ The NTA is the charging document that states the grounds on which the alien is inadmissible to or removable from the United States. Under section 239 of the Immigration and Nationality Act, “an NTA must provide the alien with certain information, including the grounds of removability and the time, date, and place of the first removal hearing.”⁹² Beginning in March 2021, however, the Biden Administration’s Border Patrol authorized the release of aliens arriving at the southwest border without first serving them with an NTA and placing them in removal proceedings, as the statute requires.⁹³ Instead, Border Patrol issued aliens an NTR, with instructions to report to a local ICE office to be served with an NTA and processed.⁹⁴ Those offices are backlogged for years, with one office’s appointments at 97 percent capacity through September 2028 and the appointments for single adults in a major urban area at 81 percent capacity through September 2033.⁹⁵

That processing has resulted in logistical hurdles at ICE field offices across the country. One Field Office Director described how his field office has been “historically busier” over the past two years.⁹⁶ Because of the increased number of aliens, his field office had to hire additional security guards, work with local partners, and establish initiatives to ensure the orderly processing of aliens.⁹⁷ Another Field Office Director stated that his field office “was not made to sustain that large amount of reporting” of illegal aliens.⁹⁸

Due to the large number of recent border crossers who need to be processed, two Field Office Directors and two Deputy Field Office Directors have been forced to reassign officers

from their Criminal Apprehension Program and Fugitive Operations Program.⁹⁹ At least one office has had to detail officers to the southwest border, with roughly 10 percent of the Field Office Director's officers detailed to the border on a rotating basis at one point.¹⁰⁰ Another Field Office Director estimated an ICE officer must devote an average of one hour to an hour and a half to process each alien.¹⁰¹ Consequently, instead of locating aliens with final orders of removal or arresting criminal aliens released from jail, the officers reassigned from Fugitive Operations "are either processing individuals that were not processed by the Border Patrol or they were dealing with individuals that were coming in to report to ICE as part of their order of supervision."¹⁰² The former Acting Field Office Director for a major city said that the reassignment of ICE officers has contributed to fewer arrests and lower removal numbers.¹⁰³ In fact, he linked lower removal numbers to the border crisis:

Q. So given that your officers from Fugitive Operations and the Criminal Apprehension Program have been reassigned, including on a rotation basis, is it safe to say that that reassignment has also contributed to lower arrests and lower removal numbers?

A. I would say yes.

Q. And that – what has led to that reassignment?

A. The numbers on our non-detained docket.

Q. And what has led to the increased numbers on your non-detained docket?

A. The cases that we're getting from the southwest border.

Q. So then you would agree that the volume of encounters at the southwest border is directly correlated to lower removal numbers and lower arrests of criminal aliens?

A. I would agree that the numbers that we're seeing on our non-detained docket are directly from the southwest border and moving staff. Yeah, I think it would definitely contribute.¹⁰⁴

One Deputy Field Office Director, who previously served as Acting Field Office Director in two jurisdictions, said his office has been forced to reassign half of the office’s Fugitive Operations officers to process aliens, which he acknowledged had made the office less effective at arresting and removing criminal aliens from the United States.¹⁰⁵ He also agreed that a Biden Administration memorandum that prohibits ICE officers from taking enforcement actions in or near courthouses negatively impacts enforcement of criminal aliens, with the memorandum having the effect of endangering officers, aliens, and American communities.¹⁰⁶

Overall, the Biden Administration’s release of illegal aliens only degrades ICE’s ability to remove aliens from the United States. An ERO official acknowledged that, with the current rate of removals, ICE would need 20 years to remove the aliens currently on the non-detained docket who have a final order of removal.¹⁰⁷

BIDEN ADMINISTRATION’S DECREASED IMMIGRATION ENFORCEMENT

The Biden Administration’s immigration enforcement policies also compound both the crisis at the southwest border and the crisis in the interior of the country through ICE’s failure to remove aliens from the United States. In September 2021, Secretary Mayorkas issued a memorandum entitled “Guidelines for the Enforcement of Civil Immigration Law” (“Mayorkas Memo”), which outlined three enforcement priorities: national security, public safety, and border security.¹⁰⁸ The Mayorkas Memo begins with the assumption that “undocumented noncitizens” work hard and contribute to “our communities” and that “bipartisan groups” have “tried to pass legislation that would provide a path to citizenship or other lawful status for the approximately 11 million undocumented noncitizens” in the country.¹⁰⁹

From that premise, Secretary Mayorkas articulated a new policy that the mere fact that aliens are removable pursuant to U.S. law “should not alone be the basis of an enforcement action against them.”¹¹⁰ Under the Mayorkas Memo, for instance, “[b]efore ICE officers [could] arrest and detain aliens as a threat to public safety, they [were] now required to conduct an assessment of the individual and the totality of facts and circumstances, including various aggravating or mitigating factors.”¹¹¹ In this assessment, ICE officers were prohibited from relying solely on the fact of an alien’s conviction, regardless of the seriousness of the underlying crime.¹¹² After listing certain aggravating and mitigating factors, the Mayorkas Memo states that the listed factors were “not exhaustive” and that “the overriding question is whether the noncitizen poses a *current* threat to public safety.”¹¹³ The Mayorkas Memo also does not

presumptively subject aliens with aggravated felony convictions to enforcement action or detention.¹¹⁴

An ERO official and a Field Office Director described how the Mayorkas Memo requires a lengthier review process before an ICE officer can arrest or remove an illegal alien.¹¹⁵ This review process was required even for cases with known gang members.¹¹⁶ As a result, this official testified, ICE officers were less likely to pursue cases.¹¹⁷

A Field Office Director explained how, under the Mayorkas Memo, an alien's commission of a crime is not alone sufficient to justify an ICE arrest, as the facts of the case are examined to determine whether the crime involved factors such as violence.¹¹⁸ The Field Office Director agreed that having a final order of removal would not currently be sufficient to justify removing a noncriminal alien from the United States, even though it would have been sufficient historically.¹¹⁹ He agreed that even *criminal* aliens would not necessarily be subject to removal today under the Biden Administration, due to mitigating factors, such as "how old the crime is, what he actually did, are there other crimes or is it just one isolated incident that happened, and depending on what it was."¹²⁰ The Field Office Director stated that a decreased number of removals of criminal aliens "allows for a criminal individual to re-offend, which often happens."¹²¹ He said "possibly" and "probably" more criminal aliens are on the street today than two to three years ago.¹²²

Another Field Office Director agreed that the Mayorkas Memo contributed to fewer ICE arrests of criminal aliens, including those with assault offenses and sexual assault offenses, in 2022 than in 2018.¹²³ A Deputy Field Office Director also linked lower removal numbers to enforcement priorities and policies, including the Mayorkas Memo, put in place by the Biden Administration.¹²⁴ He said aliens who committed larceny or theft would not be presumptive priorities under the Mayorkas Memo and would require additional approval from a field office director.¹²⁵

ICE's arrest and removal numbers during the Biden Administration speak for themselves. In fiscal year 2018, ICE made 158,581 administrative arrests of aliens in the United States.¹²⁶ Those arrests included 105,140 convicted criminals; 32,977 with pending criminal charges; and

20,464 with other immigration violations.¹²⁷ During the same time, ICE removed 95,360 aliens from the interior of the United States.¹²⁸ The Biden Administration reversed course, arresting only 36,322 convicted criminals and only 10,074 with pending criminal charges in fiscal year 2022.¹²⁹ The drop in removals was even more staggering, with only 28,204 interior removals during the year.¹³⁰ Those numbers remained stagnant for fiscal year 2023: As of August 19, 2023, ICE had removed only 38,942 aliens from the interior of the United States.¹³¹

A comparison of administrative arrests by criminal charge/conviction category further highlights the differences in immigration enforcement between the Trump and Biden Administrations.¹³² In fiscal year 2018, the Trump Administration made 76,585 arrests of criminal aliens charged with or convicted of dangerous drug crimes, compared to only 29,228 such arrests under the Biden Administration in fiscal year 2022.¹³³ For assault offenses, there were 50,753 arrests in fiscal year 2018 but only 21,531 in fiscal year 2022.¹³⁴ And for sex offenses, that number was 6,888 in 2018 but only 4,763 in 2022.¹³⁵ Across the board, in categories ranging from murder to kidnapping to weapons offenses, the Trump Administration in 2018 arrested far more criminal aliens than the Biden Administration in 2022.¹³⁶

At a hearing before the Subcommittee on Immigration Integrity, Security, and Enforcement in July 2023, former ICE Field Office Director John Fabbriatore testified that, had the Biden Administration removed criminal aliens from the United States at the same rate as the Trump Administration, 90,000 additional criminal aliens would have been removed from the country, with those criminal aliens being responsible for 300,000 crimes.¹³⁷ Instead, the criminal aliens remain in the United States, free to reoffend.

At the same time of low removal numbers, Field Office Directors sounded the alarm in transcribed interviews to the Committee about rampant vacancies in their offices.¹³⁸ A Deputy Field Office Director said, “[T]he vacancy rate that we have now is really hurting us with regards to being able to effectively do our job. And it’s probably the worst I’ve seen in my career.”¹³⁹

The Field Office Director in a major urban area attributed the vacancies and recruitment difficulties to “the narrative against law enforcement”:¹⁴⁰

Q. You mentioned a narrative against law enforcement as being a contributing factor to decreased officers and recruitment issues. Can you be more specific about what you mean by that?

A: Well, there’s, you know, stuff or talk that’s put out through media, through individuals, that, you know, law enforcement, you know, has issues. And the fact that they – anti-ICE rhetoric too. You know, it feeds into morale of people, that if they want to become an officer, it might sway them away from it. So that’s basically what I’m talking about with that.¹⁴¹

Although not directly tying such instances to high vacancy numbers, a Former Acting Field Office Director in a major city, who currently serves as Deputy Field Office Director in another jurisdiction, emphasized how his staff members have dealt with protests at ICE offices as well as doxing by the public.¹⁴² In one instance, protestors put an ICE official’s face on a piece of paper that read, “Gestapo.”¹⁴³ Although he could not pinpoint the particular group responsible, the Former Acting Field Office Director noted that Antifa had participated in the protest outside the ICE official’s home.¹⁴⁴

CONCLUSION

In the wake of Title 42’s end and a brief respite from *historically* high border encounters, the Biden Administration celebrated the “significant reduction in encounters” while declaring, “The Administration’s plan is working as intended.”¹⁴⁵ Just four months after those statements, sustained increases in southwest border encounters reflect chaos instead. Border encounters have increased every month since June, with 183,494 southwest border encounters in July and an additional 232,972 encounters in August.¹⁴⁶ Despite an outcry from the American public, including from lawmakers in his own party, President Biden has shown no interest in controlling the southwest border. According to data current through just March 2023, the Biden Administration has released more than 2.1 million illegal aliens into the U.S.,¹⁴⁷ with more than 200,000 additional aliens allowed into the country through illegal categorical parole programs.¹⁴⁸

To downplay the crisis, Democrats portray illegal aliens at the border as asylum seekers, all while the Biden Administration has screened for a fear of persecution only six percent of

those aliens released into the United States through March 31, 2023.¹⁴⁹ Instead of relying on Trump-era policies that controlled the border, the Biden Administration has reduced the nation's immigration laws to little more than a speed bump in the path of mass releases of millions of illegal aliens. The dangers of an open southwest border are only rivaled by the Biden Administration's abandonment of interior immigration enforcement by restricting ICE officers' ability to arrest and detain aliens.¹⁵⁰

Far from slowing down, the Biden border crisis is only accelerating. Crossings in Panama's Darién Gap, through which aliens travel en route to the United States, have increased exponentially: "In September alone, 75,268 migrants crossed the Darién jungle, the second-highest monthly tally ever recorded, only behind the 82,000 crossings reported there in August."¹⁵¹ And with southwest land border encounters for September 2023 set to break the record for highest number of monthly encounters,¹⁵² the Biden Administration jumped into action to boost the magnet for illegal immigration by granting Temporary Protected Status to at least 470,000 Venezuelans, including illegal border crossers.¹⁵³ Meanwhile, approximately 50,000 additional Venezuelans illegally crossed the southwest border in September alone, up from 22,090 in August.¹⁵⁴

In passing H.R. 2 on May 11, 2023, the House of Representatives proposed a solution to end the chaos. Congress must secure the southwest border and eliminate the incentives for illegal immigration or this crisis will continue to intensify. This interim staff report helps to inform these legislative proposals. It is now up to the Senate and President Biden to act on H.R. 2 and other measures to ensure the safety and security of all Americans through a secure southwest border and robust immigration enforcement.

Appendix 1

HJC HEARING: OVERSIGHT OF THE DEPARTMENT OF HOMELAND SECURITY July 26, 2023

Chairman Jordan “Get Back” Correspondence Responses (September 19, 2023)

Chairman Jim Jordan: Credible Fear Data

1. *Since January 20, 2021, the total number of inadmissible aliens who have been encountered by CBP along the southwest border and who were a) released into the United States (whether paroled, issued an NTA, issued an NTR, etc) (also broken down by category of release (NTA, parole, NTR, etc).), and b) who have remained in DHS detention and have not been released.*

It is important to understand current encounter numbers in context. There are more people displaced throughout the world today than at any time since World War II. Violence, food insecurity, severe poverty, corruption, climate change, the fall-out of the COVID-19 pandemic, and dire economic conditions have all contributed to a significant increase in irregular migration around the globe. In the Western Hemisphere, failing authoritarian regimes in Venezuela, Cuba, and Nicaragua, along with an ongoing humanitarian crisis in Haiti, have driven millions of people from those countries to leave their homes. Moreover, violence, corruption, and the lack of economic opportunity—challenges that are endemic throughout the region—are driving many from Colombia, Ecuador, Guatemala, Honduras, and Peru to make the dangerous journey to the U.S. Southwest Border (SWB).

These historic challenges were exacerbated by the application of the Title 42 public health order at the SWB had on migration in our hemisphere. Because expulsions under Title 42 had no immigration consequence for migrants, these expulsions did not have the same impact as removals under Title 8 processing, including at least a five-year bar to admission and other legal consequences such as criminal prosecution.

The application of Title 42 at the border—which DHS was required by a court order to continue to implement after the CDC initially announced it would terminate the order in April 2022—likely *increased* border encounters overall, particularly for single adults expelled to Mexico. This is due to the significant increase in recidivism, or multiple encounters of the same person, observed for individuals processed under Title 42 as compared to those processed under Title 8 authorities.

CBP encountered a total of 3,447,327 unique individuals at the SWB between January 20, 2021, and March 31, 2023. These individuals accounted for a total of 4,675,406 encounters during this period. As noted above, recidivism rates were elevated during the pandemic; noncitizens expelled under Title 42 authority were about three times more likely to be re-encountered than those removed or returned under Title 8 authority. From the start of the pandemic and the initiation of Title 42 expulsions through February 28, 2023, 33 percent of all Title 42 expulsions were followed by a re-encounter of the same individual within 30 days (as of March 31, 2023), as compared with a 30-day re-encounter rate of just 5.3 percent for Title 8 repatriations.

Similarly, the 12-month re-encounter rates were 42 percent for Title 42 expulsions versus 10 percent for Title 8 repatriations.

Except as otherwise noted, all data in this response are reported at the event level, not at the person level. This means that individual noncitizens encountered more than once in the period covered by this response are counted more than once. A total of 2,526,668 encounters (54 percent) were continuously in CBP or ICE custody from the time of encounter to removal, return, or expulsion. Additionally, a total of 672,748 encounters (14 percent) were transferred to ICE ERO for a custody determination and released from detention while removal proceedings were pending. A total of 1,475,990 encounters (32 percent of all encounters) resulted in releases at the Southwest Border. Table 1 provides additional details about the detention histories of these encounters.

Table 1: Detention Histories of CBP Encounters, January 20, 2021 – March 31, 2023

	BP	OFO	Total
Releases	1,262,715	213,275	1,475,990
Non-CBP One Release with NTA	499,216	160,209	659,425
CBP One Release with NTA	-	52,182	52,182
I-94 Parole	663,530	-	663,530
Notice to Report	90,613	-	90,613

Total	4,332,784	342,622	4,675,406

Note: Table reports on encounter events, not unique individuals.

Source: Office of Immigration Statistics Persist Dataset.

2. *The number and percentage of those aliens in question 1 who claimed a fear of persecution for purposes of asylum and received a fear determination.*

The Title 42 public health order was in effect until May 11, 2023. Accordingly, as reflected in Table 1, most encounters during the time frame in question resulted in Title 42 expulsions.

A total of 265,604 noncitizens encountered between January 20, 2021 and March 31, 2023 were processed under Title 8 authority and placed in expedited removal, accounting for 5.7 percent of all encounters during this period and 11 percent of encounters processed under Title 8 authorities during this period.

Of those encounters placed in expedited removal between January 20, 2021 and March 31, 2023, 197,531 noncitizens (4.2 percent of all encounters and 74 percent of encounters placed in expedited removal) initially claimed a fear of persecution for purposes of asylum while in CBP custody. Of these, 134,449 noncitizens (2.9 percent of all encounters and 51 percent of encounters placed in expedited removal) had their fear claims adjudicated by USCIS and either received a fear determination or had their fear claims administratively closed by USCIS. The

remaining 63,082 fear claims were not adjudicated by USCIS because the cases were reprocessed by ICE into a disposition other than expedited removal, or because the fear claims were withdrawn prior to an interview.

3. The number and percentage of those aliens in question 2 who received a negative fear determination.

Among noncitizens placed in expedited removal whose fear claims were adjudicated by USCIS, approximately 33,346 (or 25 percent of those adjudications) were removable without being referred to EOIR, either because they received a negative fear determination from USCIS that was not vacated by EOIR (30,734 cases, 23 percent of USCIS adjudications) or because their case was administratively closed and did not result in a referral to EOIR (2,382 cases, 1.8 percent of USCIS adjudications).¹

4. The number and percentage of those aliens in question 3 who have been removed from the U.S.

Again, the Title 42 public health Order was in effect until May 11, 2023. Accordingly, as reflected in Table 1, most encounters during the time frame in question resulted in Title 42 expulsions.

Of the 33,345 noncitizens placed in expedited removal who were removable without being referred to EOIR (due to a negative fear determination or case closure that did not result in a referral to EOIR), a total of 17,629 noncitizens had been removed as of March 31, 2023. This represents 53 percent of ER cases that were removable without being referred to EOIR. A large majority of ER removal orders that had not yet been executed as of March 31, 2023 were nationals from countries with limited Title 8 removal flights during this time period and/or diplomatic relations that impede removals.

37 percent of unexecuted orders were of nationals of Cuba, Haiti, Nicaragua, or Venezuela—countries to which the United States had limited ability to repatriate people during this time period. 42 percent of unexecuted orders were of nationals of Colombia, the Dominican Republic, Ecuador, or Peru—countries to which almost all repatriation flights were reserved for Title 42 expulsions during this period. Four percent of removals not executed as of March 31, 2023 were of Mexican, Guatemala, Honduran, or El Salvadoran nationals. Most remaining unexecuted orders were of nationals from Eastern Hemisphere countries without regular removal flights.

DHS has worked and continues to increase its capacity to conduct repatriation flights of removable noncitizens, including through an increased cadence of diplomatic engagements with international partners to secure agreement to accept removal flights, provide travel documents, and streamline requirements. As a result, the number of charter removal flights conducted by ICE Air Operations more than doubled in the latter half of FY 2023, compared with the first half

¹ A total of 40,225 credible fear claims resulted in negative fear determinations by USCIS, but 9,491 were appealed to EOIR and vacated, resulting in a referral to EOIR for removal proceedings. The total reported here (33,346 credible fear reviews not referred to EOIR) is an upper limit; some of the administrative closures counted here may eventually result in a referral to EOIR.

of the fiscal year. Removals via commercial air have also increased substantially; as of August 12, 2023, ICE Air Operations has completed 4,282 commercial removals in FY 2023, an 85% increase over the same period in FY 2022. These efforts, combined with other measures to expand expedited removal to eligible populations, have expanded the Department's ability to swiftly and humanely return those without a legal basis to remain in the United States.

5. The number and percentage of those aliens in question 2 who received a positive fear determination.

Among noncitizens placed in expedited removal who had fear claims adjudicated by USCIS, a total of 101,103 (75 percent of cases adjudicated by USCIS) were referred to EOIR for removal proceedings, either because the noncitizens received a positive fear determination from USCIS (87,606 cases, 65 percent of credible fear adjudications), because the noncitizen received a negative fear determination that was then vacated during removal proceedings by EOIR (9,491 cases, 7.1 percent of credible fear adjudications), or because the noncitizen's case was administratively closed by USCIS and referred to EOIR for removal proceedings (4,236 cases, 3.2 percent of credible fear adjudications).

6. The number and percentage of those alien in question 5 who have been placed in removal proceedings.

All 101,103 (100 percent) of noncitizens described in question 5 were placed in removal proceedings.

7. The number and percentage of those aliens in question 6 whose claims have been adjudicated on the merits.

Among noncitizens placed in expedited removal and subsequently referred to EOIR for removal proceedings, 3,483 (three percent of those in proceedings) have had their cases adjudicated on the merits.² Among those referred to EOIR for removal proceedings, 68,830 noncitizens (87 percent) remain in removal proceedings.

This rate of completed adjudications within the given time frame is consistent with recent historical trends, which predict a lengthy backlog for those who establish a credible fear. Half of all cases referred to EOIR for removal proceedings take more than four years to complete, and in many cases much longer. Indeed, 39 percent of all SWB credible fear referrals to EOIR from FY 2014 to FY 2019 remain in EOIR proceedings today.

As of FY 2022 year-end, more than a quarter (26 percent) of EOIR cases resulting from SWB encounters making credible fear claims from as long ago as FY 2014 remained in proceedings, one-third (33 percent) of EOIR cases resulting from FY 2016 encounters remained in proceedings, and almost half (48 percent) of EOIR cases resulting from FY 2019 encounters remained in proceedings. Excluding in absentia orders, the mean completion time for EOIR cases completed in FY 2022 was 4.2 years.

² Adjudications on the merits include grants of relief and removal orders not issued in absentia.

8. *The number and percentage of those aliens in question 7 who have received a final order of removal.*

Among cases adjudicated on the merits, 2,370 final adjudications (68 percent of cases adjudicated on the merits) resulted in orders of removal. 1,896 (54 percent) were not appealed to the Board of Immigration Appeals (BIA) and became final orders of removal. For more information on BIA appeals, we refer you to the Department of Justice.

9. *The number and percentage of those aliens in question 8 who have been removed from the U.S.*

Among noncitizens with final orders of removal on the merits, 874 (46 percent of final orders not pending appeal) have confirmed removals from the United States. 37 percent were nationals of Cuba, Haiti, Nicaragua, or Venezuela—countries to which the United States had limited ability to repatriate people during this time period. 26 percent were nationals of Colombia, the Dominican Republic, Ecuador, or Peru—countries to which almost all repatriation flights were reserved for Title 42 expulsions during this period. Nine percent of removal orders not yet executed as of March 31 were of Mexican, Guatemala, Honduran, or El Salvadoran nationals. Most remaining unexecuted orders were of nationals from Eastern Hemisphere countries without regular removal flights.

Of the 219,359 removals conducted during this time period, the 874 removals above represent less than one percent. During the same time period, when Title 42 was in effect, DHS conducted 2,863,319 removals, returns, and expulsions; the 874 removals above represent less than one tenth of one percent of this total.

Rep. Matt Gaetz: Removals

Since January 20, 2021, over 5.6 million illegal aliens have been encountered at the Southwest Border, not including the more than 1.5 million “gotaways” who have evaded Border Patrol. At the hearing, Representative Gaetz asked you how many of the aliens who have entered since the beginning of the Biden Administration have had their claims adjudicated on the merits, received a final order of removal, and been removed by ICE. You could not provide the answer. When pressed again for the same data, you eventually told Chairman Jordan that the number of those removals is over 1,000, but you declined to provide a definitive number. You also committed to providing the requested data “as promptly as possible.” Therefore, we reiterate our request for this data.

The response to Rep. Gaetz’s question is included in the data set above (7, 8, and 9):

- During the period from January 20, 2021 to March 31, 2023, DHS completed 2,863,319 removals, returns, and expulsions.
- Among noncitizens placed in expedited removal and subsequently referred to EOIR for removal proceedings, 3,483 (three percent of those in proceedings) have had their cases adjudicated on the merits.³ Among those referred to EOIR for removal proceedings, 68,830 noncitizens (87 percent) remain in removal proceedings.
- Among cases adjudicated on the merits, 2,370 final adjudications (68 percent of cases adjudicated on the merits) resulted in orders of removal. 1,896 (54 percent) were not appealed to the Board of Immigration Appeals (BIA) and became final orders of removal. For more information on BIA appeals, we refer you to the Department of Justice.
- Among noncitizens with final orders of removal on the merits, 874 (46 percent of final orders not pending appeal) have confirmed removals from the United States.
- 37 percent were nationals of Cuba, Haiti, Nicaragua, or Venezuela—countries to which the United States had limited ability to repatriate people during this time period; 26 percent were nationals of Colombia, the Dominican Republic, Ecuador, or Peru—countries to which almost all repatriation flights were reserved for Title 42 expulsions during this period. Nine percent of removal orders not yet executed as of March 31 were of Mexican, Guatemala, Honduran, or El Salvadoran nationals. Most remaining unexecuted orders were of nationals from Eastern Hemisphere countries without regular removal flights.
- Of the 219,359 removals conducted during this time period, the 874 removals above represent less than one percent. During the same time period, when Title 42 was in effect, DHS conducted 2,863,319 removals, returns, and expulsions; the 874 removals above represent less than one tenth of one percent of this total.
- DHS has worked and continues to increase its capacity to conduct repatriation flights of removable noncitizens, including through an increased cadence of diplomatic engagements with international partners to secure agreement to accept removal flights, provide travel documents, and streamline requirements. As a result, the number of charter removal flights conducted by ICE Air Operations more than doubled in the latter half of FY 2023, compared with the first half of the fiscal year. Removals via commercial air have also increased substantially; as of August 12, 2023, ICE Air Operations has completed 4,282 commercial removals in FY 2023, an 85% increase over the same

period in FY 2022. These efforts, combined with other measures to expand expedited removal to eligible populations, have expanded the Department's ability to swiftly and humanely return those without a legal basis to remain in the United States.

Chairman Jim Jordan: Status of arrested noncitizen smugglers

According to your written testimony, the Department conducted a “campaign” that resulted in “the arrest of nearly 14,000 smugglers.” Chairman Jordan requested the case status of those 14,000 smugglers. Specifically, he asked, “Have they been indicted, taken to trial? Found guilty? Are they in prison somewhere? What’s the status?” You replied, “Very pleased to provide that data to you.” Chairman Jordan then asked, “Have you arrested any of them multiple times?” You responded, “Congressman, I’ll provide that information for you.” Pursuant to that exchange, please provide the case status of each of the “nearly 14,000” smugglers you noted in your testimony and whether any (and if so, how many) of those have been arrested more than once by the Department since January 20, 2021.

From April 1, 2022 through the preparation of Secretary Mayorkas’s July testimony, U.S. Customs and Border Protection (CBP) and Homeland Security Investigations (HSI) arrested more than 14,000 human smugglers as part of a coordinated campaign to counter transnational criminal organizations (TCOs). As of July 30, 2023, CBP and HSI arrests of suspected human smugglers have increased to more than 15,000. These efforts are the result of a first-of-its-kind effort, launched under the Biden Administration and unprecedented in scale, to disrupt and dismantle these human smuggling networks. The campaign is an interagency effort led by the Department that has committed resources and surged personnel in Latin America and along the Southwest Border. DHS is working with our international partners to bring the swift hand of justice down on these criminal organizations. This interagency effort is organized around several different aspects of criminal operations – targeting by CBP, investigations by HSI, prosecutions by the Department of Justice (DOJ), financial sanctions by the Department of Treasury, as well as indications and warning from the Intelligence Community.

It is DHS policy to refer all suspected violations of human smuggling to local U.S. attorneys, under DOJ, for prosecution. Of the 15,000-plus arrests, CBP is responsible for more than 8,000, with approximately 6,500 having been accepted by U.S. attorneys so far.⁴ HSI is responsible for more than 7,000 arrests; from these arrests HSI has initiated nearly 3,000 cases, which have resulted in more than 2,000 indictments and more than 1,500 convictions in partnership with the U.S. attorneys. In addition to those individuals who are detained as part of the criminal justice system, as of mid-August, more than 1,200 noncitizens involved in these cases have been removed from the United States and more than 100 are currently in ICE detention. It is important to note that approximately half of the arrests are noncitizens and therefore, eligible for removal while the remaining half are U.S. citizens. Based on our data, recidivism is not a significant portion of the 15,000-plus arrests, meaning the vast majority of our efforts are targeting unique individuals.

The decision as to which of those individuals arrested are ultimately indicted falls within the jurisdiction of the Justice Department. For an example, an individual referred to DOJ for prosecution may simply be deported and never indicted nor convicted. An individual arrested and referred for prosecution may also decide after being indicted to cooperate with the government and be deported and never convicted.

⁴ CBP presents instances of suspected violations of U.S. law pertaining to human smuggling to local USAOs (under DOJ) for prosecution. The AUSA will evaluate the referral and determine whether to accept and prosecute.

Beyond the arrests, as a result of this concerted effort, HSI has seized nearly \$13 million in bulk cash and more than \$50 million in assets such as homes, vehicles, and other property from these human smuggling organizations. These financial and asset seizures are a means of more permanently disrupting and degrading human smuggling organizations' ability to engage in illicit activity and endanger lives in the future.

Rep. Barry Moore: Criminal noncitizen information

Representative Moore mentioned the case of a 29-year-old illegal alien from Honduras who was charged with assaulting a teenage girl in Prattville, Alabama. The alien reportedly entered the United States in November 2021 in Texas, using a fake name, and was “allowed into the country” despite his criminal history. You stated that you were “very sorry, of course, to learn of the tragedy that occurred.” On May 24, 2023, however, the Committee requested that individual’s alien file (A-file) and “[i]nformation regarding the time, date, and place of any and all of the alien’s entries into the United States.” Despite this request letter—and repeated attempts by the Committee to receive information about the alien—you stated you were surprised to learn of the horrific crime occurring in Rep. Moore’s district. Now that you have been reminded of this crime, we ask that you provide the Committee with the information first requested more than two months ago.

The partial response to this letter was transmitted to the Committee on August 28, 2023. DHS OLA anticipates transmitting the final responsive documents soon.

¹ Includes individuals that arrived at a port of entry (POE) with a status indicating 'returned to foreign' or dispositions in Crew member, Deserter, Expedited Removal (ER) without fear claim, Reinstatement of deportation order (REINST) without fear claim, In transit refusal, Stowaway, and

² T42 expulsions includes Title 42 immediate and delayed expulsions from U.S. Customs and Border Protection (CBP) U.S. Border Patrol (USBP) and Title 42 immediate expulsions from CBP Office of Field Operations (OFO).

³ Migrant Protection Protocols (MPP) include individuals in the original program between March of 2019 through January of 2021. In August 2021, DHS was ordered to reimplement MPP in good faith. The reimplement began in December 2021 and continued until August 2022, when it

⁴ Transfers to ICE include all Bag and Baggage, Detainer, Deported, Administrative Deportation, ER, REINST, Stowaway, Transfer, and VWP who are not in T8 repatriations group; and those with Notice to Appear (NTA) type dispositions who are not in Releases; and individuals who arr

⁵ Transfers to HHS includes UCs who are not returned by CBP to Mexico.

⁶ Releases includes individuals processed by USBP as NTA/OR, Notice to Report (NTR), Prosecutorial Discretion (PD), Paroles enrolled in Alternative to Detention (ATD), Parole with Condition, and individuals processed at a POE with a disposition of Deferred inspection, NTA, or any I

⁷ USBP parole includes humanitarian parole, significant public benefit parole, parole plus Alternatives to Detention (ATD) (which ended on March 8, 2023), and parole with conditions (which ended on May 11, 2023).

⁸ Includes individuals released with NTA (DT Parole) after a CBP One appointment at a POE. (Excludes noncitizens with CBP One appointments who are not granted parole.)

⁹ Other outcomes includes transfers to other law enforcement and less common outcomes.

¹⁰ Withdrawals of application for admission that are terminated without prejudice.

Notes: Data is current as of report date; future month-end and year-end reporting may include corrections that update previous months' data. Data are limited to SW Border encounters, including CBP One arrivals. All data reported by CBP encounter date. Individuals are classified with the I Source: Office of Immigration Statistics Persist Dataset.

Appendix 3

Final or Most Current Outcomes, SW Border Encounters: January 20, 2021 to March 31, 2023

MOST RECENT OUTCOMES	
Total Encounters ¹	5,022,027
Repatriations	2,557,603
Title 42 Expulsion	2,344,877
Removals	108,102
Expedited	63,572
Reinstatement	38,112
Administrative removals	425
Other removals ²	5,993
Returns	89,379
Re-encounters ³	15,245
No confirmed departure	2,464,424
Being processed	1,951,953
Being processed by DHS	915,553
In EOIR proceedings ⁴	865,269
EOIR case completed - additional DOJ action ⁵	171,131
Final order/voluntary departure	83,522
Unexecuted removal orders	82,173
In absentia	54,812
Not in absentia	27,361
Unexecuted voluntary departures	1,349
Relief	30,782
SIJ or affirmative asylum	7,237
LPR status granted by DHS	2,127
EOIR relief ⁶	9,521
Other ⁷	11,897
EOIR Termination	115,193
MPP	658
Non-MPP	114,535
No Subsequent Event ⁸	282,974

Notes: For all encounters, table describes most current enforcement outcomes as of March 31, 2023 (cohort reporting) Table is event-based, so noncitizens encountered on multiple occasions appear in the table

¹ Excludes Accompanied Minors (AM) and OFO administrative cases including crewmembers, parolee, and withdrawals Exclusions account for 3.5 percent of total encounters between FY2013 and FY2023 Q2

² Other removals include removals executed pursuant to an INA §240 proceeding

³ Includes noncitizens encountered more than once by CBP without a known intervening removal or return OIS assumes the noncitizen departed of their own accord during the intervening period

⁴ Includes noncitizens in proceedings, including those whose cases have been closed and are not on an active docket

⁵ Includes noncitizens subject to a final order or other EOIR case completion who are subject to a motion to reopen or reconsider or who appeal their case to the Board of Immigration Appeals

⁶ Includes noncitizens granted asylum and other forms of relief from removal This category also includes withholding of removal and protection under the Convention Against Torture even though they are not

⁷ Includes noncitizens granted cancelation of removal, DHS prosecutorial discretion, T visas, S visas, U visas, Temporary Protected Status, and EOIR conditional grants, as well as people found to be U.S. citizen:

⁸ Initial enforcement action cannot be linked to a subsequent enforcement outcome; may result from data errors, missing identifier data, and/or because the noncitizen awaits further processing

Source: DHS Office of Immigration Statistics Enforcement Lifecycle using OIS Persist Dataset as of March 31, 2023

multiple times

technically forms of relief

s or lawfully present noncitizens not subject to removal

Appendix 4

Final or Most Current Outcomes, Total SW Border Encounters by Fear Claims: January 20, 2021 - March 31, 2023

MOST CURRENT OUTCOMES	
Total Encounters ¹	4,670,695
T8 Encounters	2,325,864
Processed for Expedited Removal	265,604
No fear claim ²	68,073
<i>confirmed removal or return</i>	48,448
Reprocessed or fear claim withdrawn ³	63,082
<i>confirmed removal or return</i>	498
Credible fear claims ⁴	134,449
Positive fear determinations	87,606
Negative fear determinations	40,225
Negative fear determinations appealed to EOIR	37,860
Negative fear determinations vacated by EOIR	9,491
Negative fear determinations upheld by EOIR	28,369
Case closures	6,618
Case closures referred to EOIR	4,236
Case closures not referred to EOIR	2,382
ER CF claims not referred to EOIR ⁵	33,346
Executed Removal Orders	17,629
ER CF claims referred to EOIR ⁶	101,103
EOIR cases started	79,059
Still in EOIR Proceedings	68,830
EOIR Cases completed	10,229
Terminations / Dismissals	2,826
Asylum Granted or other EOIR Relief from Removal	1,114
Merit ⁷	1,113
Not on merit ⁷	1
Removal Orders	6,289
In Absentia	3,919
<i>Executed Removal Orders</i>	51
Not in Absentia	2,370
<i>Executed Removal Orders</i>	874
Appeals to BIA	516
Grants of relief + other favorable-to-noncitizen judgements appealed to BIA	42
EOIR Removal Orders + other favorable-to-OPLA judgements appealed to BIA	474

Notes: For all encounters, table describes most current enforcement outcomes as of March 31, 2023 (cohort reporting). Table is event-based, so noncitizens encountered on multiple occasions appear in the table multiple times.

¹ Excludes unaccompanied children, accompanied minors, and OFO administrative cases including, crewmembers, parolee, and withdrawals, none of whom are amenable to expedited removal. Exclusions account for 12 percent of total encounters.

² No fear claim in CBP custody and no associated record of a fear claim in USCIS APSO data. Includes cases reprocessed with other dispositions in ICE custody.

³ Fear claim in CBP custody; booked into ICE custody; but no associated record of a fear claim in USCIS APSO data; most of these cases are reprocessed by ICE into non-ER dispositions.

⁴ Based on USCIS APSO clock-ins.

⁵ Includes negative CF interviews not appealed to EOIR, negative CF interviews upheld by EOIR, and case closures not referred to EOIR and excludes fear claims withdrawn prior to a credible fear interview. Cases result in final ER removal.

⁶ Includes positive credible fear interviews, negative CF interviews vacated by EOIR, and case closures referred to EOIR.

⁷ Cases decided on merits includes grants of relief; relief not on merits include administrative closures and grants of prosecutorial discretion. (Note that OIS is working with EOIR to update these definitions beginning with FY23Q3 data. Source: DHS Office of Immigration Statistics Enforcement Lifecycle using OIS Persist Dataset as of March 31, 2023.)

encounters between FY2013 and FY2023 Q2.

NA - Data not available.

Note: Applications are those individuals who have received I-134/A confirmation, completed their beneficiary materials, and been passed to CBP for vetting and approval or denial of a travel authorization; note that not all application individuals will have completed their beneficiary materials in CBP One. Approved travel authorizations are for those individuals who have passed the security check by CBP for the CHNV parole processes. Each authorization only covers one individual, but an individual may be authorized multiple times. Applications approved are those that have not expired due to failure to travel within a 90-day window and have not been cancelled. These include approved applications for people who have already entered the United States. Travel authorization dates are the received date for the application; for example, if an application was received in October but approved in November, it would be counted in October. Paroles include individuals who received a CHNV parole disposition from OFO at the time of arrival and inspection at the port of entry. An individual eligible for a parole process may not necessarily have the same nationality as that type of parole; for example, a minor with Costa Rican nationality may be eligible for Venezuelan parole if that minor has a Venezuelan mother. Venezuela numbers start October 18, 2022, the date the Venezuela parole process started. All other numbers start January 6, 2023, the date the Cuba, Haiti, and Nicaragua parole processes started. OFO disposition data as of September 7, 2023; all other data as of September 26, 2023.
