

Methodology

UCR Programs gather crime information from the law enforcement agencies under their domain and forward the data to the FBI. Forty-nine states in the nation have their own UCR Programs that streamline the collection of UCR data from local law enforcement agencies, ensure consistency and comparability of data, and provide a higher quality of service to the law enforcement community. Establishment of a UCR Program is not limited to state governments. Territorial, tribal, and federal agencies may also institute UCR Programs. Agencies in states without a program, i.e., direct contributors, submit their crime statistics directly to the FBI, which provides continuous guidance and support to those participating agencies.

Criteria for UCR Programs

The following are the standards under which a UCR Program must operate:

1. A UCR Program must conform to the FBI UCR Program's submission standards, definitions, specifications, and required deadlines.
2. A UCR Program must establish data integrity procedures and have personnel assigned to assist contributing agencies in quality assurance practices and crime reporting procedures. Data integrity procedures should include crime trend assessments, offense classification verification, and technical specification validation.
3. A UCR Program's submissions must cover more than 50 percent of the law enforcement agencies within its established reporting domain and be willing to cover any and all UCR-contributing agencies that wish to use the UCR Program from within its domain. (An agency wishing to become a UCR Program must be willing to report for all of the agencies within the state.)
4. A UCR Program must furnish the FBI UCR Program with all of the UCR data collected by the law enforcement agencies within its domain.

These requirements do not prohibit the state from gathering other statistical data beyond the national collection.

Data completeness and quality

In order to fulfill its responsibilities in connection with the UCR Program, the FBI edits and reviews individual agency reports for both completeness and quality. Members of the national program's staff contact the state UCR Program in connection with crime-reporting matters and, as necessary, when approved by the state, individual contributors. Upon request, staff members conduct training programs within the state on law enforcement record-keeping and crime-reporting procedures. Following audit standards established by the federal government, the FBI conducts an audit of each state's UCR data collection procedures once every 3 years. Should circumstances develop whereby the state program does not comply with the aforementioned requirements, the national program may institute a direct collection of data from law enforcement agencies within the state.

Reporting procedures

Offenses known and value of property—Law enforcement agencies tabulate the number of Part I offenses brought to their attention based on records of all reports of crime received from victims, officers who discover infractions, or other sources, and submit them each month to the FBI either directly or through their state UCR Programs. Part I offenses include murder and nonnegligent manslaughter, rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson. Law enforcement agencies also submit monthly to the FBI the value of property stolen and recovered in connection with the offenses and detailed information pertaining to criminal homicide.

Unfounded offenses and clearances—When, through investigation, an agency determines that complaints of crimes are unfounded or false, the agency eliminates that offense from its crime tally through an entry on the monthly report. The report also provides the total number of actual Part I offenses, the number of offenses cleared, and the number of clearances that involve only offenders under the age of 18. (Law enforcement can clear crimes in one of two ways: by the arrest of at least one person who is charged and turned over to the court for prosecution or by exceptional means—when some element beyond law enforcement's control precludes the arrest of a known offender.)

Persons arrested—In addition to reporting Part I offenses, law enforcement agencies provide monthly to the UCR Program data on the age, sex, race, and ethnicity of persons arrested for Part I and Part II offenses. Part II offenses encompass all crimes, except traffic violations, that are not classified as Part I offenses.

Officers killed or assaulted, and law enforcement employment—Law enforcement agencies also report monthly to the UCR Program information regarding law enforcement officers killed or assaulted, and yearly, the number of full-time sworn and civilian law enforcement personnel employed as of October 31.

Hate crimes—At the end of each quarter, law enforcement agencies report summarized data on hate crimes, i.e., specific offenses that were motivated by an offender’s bias against the perceived race, gender and gender identity, religion, disability, ethnic/national origin, sexual orientation, or ethnicity of the victim. Those agencies participating in the UCR Program’s National Incident-Based Reporting System (NIBRS) submit hate crime data monthly.

Editing procedures

The UCR Program thoroughly examines each report it receives for arithmetical accuracy and for deviations in crime data from month to month and from present to past years’ data that may indicate errors. The UCR staff members compare aggregated data from agencies of similar population size to identify any unusual fluctuations in an agency’s crime counts. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in the jurisdiction’s geopolitical structure.

Evaluation of trends—Data reliability is a high priority of the FBI, which brings any deviations or arithmetical adjustments to the attention of state UCR Programs or the submitting agencies. Typically, FBI staff members study the monthly reports to evaluate periodic trends prepared for individual reporting units. Any significant increase or decrease becomes the subject of a special inquiry. Changes in crime reporting procedures or annexations that affect an agency’s jurisdiction can influence the level of reported crime. When this occurs, the FBI excludes the figures for specific crime categories or totals, if necessary, from the trend tabulations.

Training for contributors—In addition to the evaluation of trends, the FBI provides training seminars and instructional materials on crime reporting procedures to assist contributors in complying with UCR standards. Throughout the country, the national program maintains liaison with state UCR Programs and law enforcement personnel and holds training sessions to explain the purpose of the program, the rules of uniform classification and scoring, and the methods of assembling the information for reporting. When an individual agency has specific problems in compiling its crime statistics and its remedial efforts are unsuccessful, personnel from the FBI’s Criminal Justice Information Services Division may visit the contributor to aid in resolving the difficulties.

Summary Reporting System User Manual—The national UCR Program published the *Summary Reporting System (SRS) User Manual* (June 20, 2013) which details procedures for classifying and scoring offenses and serves as the contributing agencies’ basic resource for preparing reports. The national staff also produces correspondence to UCR contributors as needed and the UCR Program Quarterly. These provide policy updates and new information, as well as clarification of reporting issues.

The final responsibility for data submissions rests with the individual contributing law enforcement agency. Although the FBI makes every effort through its editing procedures, training practices, and correspondence to ensure the validity of the data it receives, the accuracy of the statistics depends primarily on the adherence of each contributor to the established standards of reporting. Deviations from these established standards that the national UCR Program cannot resolve may be brought to the attention of the Criminal Justice Information Systems Committees of the International Association of Chiefs of Police and the National Sheriffs' Association.

Population estimation

For the 2020 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2010 decennial population counts and 2011 through 2019 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2019 Census population estimate to derive the agency's 2020 population estimate.

Population totals for 2000 and 2010 are from the U.S. Census Bureau's decennial population counts.

NIBRS conversion

Forty-two state programs are certified to provide their UCR data in the expanded NIBRS format. For presentation in this publication, the NIBRS data were converted to the historical SRS data. The UCR Program staff constructed the NIBRS database to allow for such conversion so that UCR's long-running time series could continue.

Crime trends

By showing fluctuations from year to year, trend statistics offer the data user an added perspective from which to study crime. Percent change tabulations in this publication are computed only for reporting agencies that provided comparable data for the periods under consideration. The FBI excludes from the trend calculations all figures except those received for common months from common agencies. Also excluded are unusual fluctuations of data that the FBI determines are the result of such variables as improved records procedures, annexations, etc.

Publication Annotation

Narrative portions of this publication present percentage breakdowns for various facets of tabular data. Where percentage breakdowns are used, percentages may not add to 100.0 percent due to rounding.

Caution to users

Data users should exercise care in making any direct comparison between data in this publication and those in prior issues of *Crime in the United States*. Because of differing levels of participation from year to year and reporting problems that require the FBI to estimate crime counts for certain contributors, some data may not be comparable from year to year. In addition, this publication may contain updates to data provided in prior years' publications. For example, because of the receipt of additional data after the 2019 publication deadline, the 2019 Supplementary Homicide Report (SHR) data in that publication may not match the 2019 SHR data in this 2020 report.

2020 arrest data considerations

No 2020 arrest data were received from the District of Columbia's Metropolitan Police Department. The two agencies in the District of Columbia for which 12 months of arrest data were received, the District of Columbia Fire and Emergency Medical Services: Arson Investigation Unit, and the Metro Transit Police, have no attributable population.

For 2020, only arrest totals (with no age or gender breakdowns) are available for Florida. Therefore, Florida arrest totals are included only in Table 69, "Arrests by State, 2020."

Limited arrest data were received from the Illinois state UCR Program. (Arrest counts presented in Table 69, "Arrests by State, 2020" are for Rockford only.)

No 2020 arrest data were received from the New York City Police Department. However, arrest totals for this agency were estimated by the national UCR Program and were included in Table 29 "Estimated Number of Arrests, United States, 2020."

Offense estimation

Tables 1 through 5 and Table 7 of this publication contain statistics for the entire United States. Because not all law enforcement agencies provide data for complete reporting periods, the FBI includes estimated crime numbers in these national presentations. The FBI estimates data for three areas: Metropolitan Statistical Areas (MSAs), cities outside MSAs, and nonmetropolitan counties. The FBI computes estimates for participating agencies not providing 12 months of complete offense data. For agencies supplying 3 to 11 months of offense data, the national UCR Program estimates for the missing data by following a standard estimation procedure using the data provided by the agency. If an agency has supplied less than 3 months of data, the FBI computes estimates by using the known crime figures of similar areas within a state and assigning the same proportion of crime volumes to nonreporting agencies.

The estimation process considers the following: population size covered by the agency; type of jurisdiction, e.g., police department versus sheriff's office; and geographic location.

Estimation of state-level data

In response to various circumstances, the FBI calculates estimated offense totals for certain states. For example, some states do not provide rape figures in accordance with UCR guidelines. In addition, problems at the state level have, at times, resulted in no useable data. Also, the efforts to convert to NIBRS have contributed to the need for unique estimation procedures. A summary of state-specific and offense-specific estimation procedures follows.

State	Year(s)	Reason for Estimation	Estimation Method
Illinois	2001 2002 2003 2004 2005 2006 2007 2008 2009	The state UCR Program was unable to provide complete offense figures in accordance with UCR guidelines.	Valid violent crime and property crime offense counts, with the exception of forcible rape, were available for most of the largest cities (100,000 and over in population). For other agencies, the only available counts generated by the Illinois state UCR Program were state totals based upon an incident-level system without indication of multiple offenses recorded within single incidents. Therefore, the UCR Hierarchy Rule could not be applied in order to convert the state's data to SRS data. (The Hierarchy Rule requires that only the most serious offense in a multiple-offense criminal incident is counted.) To arrive at a comparable state estimate to be included in national compilations, the Illinois state UCR Program's state totals (which were inflated because of the nonapplication of the Hierarchy Rule) were reduced by the proportion of multiple offenses reported within single incidents in the NIBRS database. Valid totals for the large cities were excluded from the reduction process.

	2006 2007 2008 2009	The state UCR Program was unable to provide forcible rape figures in accordance with UCR guidelines.	<p>Forcible rape figures for Rockford include only the forcible rape offenses with female victims that were extracted from the agency's NIBRS data.</p> <p>To derive the state forcible rape estimate, the percentage of female forcible rape victims was extracted from all NIBRS incidents in which a forcible sex offense was reported. That percentage was applied to the forcible rape count received from the Illinois state UCR Program.</p>
Kentucky	2001 2002 2003	The state UCR Program was unable to provide complete offense figures in accordance with UCR guidelines.	<p>2001—To arrive at the 2001 estimates, the 2000 state estimates were updated using 2001 crime trends reported for the East South Central Division.</p> <p>2002—To obtain the 2002 state crime counts, the FBI contacted the state UCR Program, and the state agency provided their latest state totals, 2000. Therefore, the 2001 state estimates were updated for inclusion in the 2002 edition of <i>Crime in the United States</i> by using the 2001 crime trends for the East South Central Division. To derive the 2002 state estimate, the 2002 crime trends for the geographic division were applied to the adjusted 2001 state estimate.</p> <p>2003—To obtain the 2003 estimates, the 2003 crime trends for the East South Central Division were applied to adjusted 2002 state estimates. The 2002 state counts were reestimated by applying the 2002 crime trends for the East South Central Division using more current figures, 2001 totals provided by the state UCR Program. The adjusted 2002 estimates differ from the figures published in the 2002 edition of <i>Crime in the United States</i> which were originally estimated using 2001 totals.</p>

Minnesota	2005 2006 2007 2008 2009 2010 2011 2012	The state UCR Program was unable to provide forcible rape figures in accordance with UCR guidelines.	<p>2005—To arrive at a comparable state estimate for forcible rape offenses to be included in national compilations, Minnesota’s forcible rape total was estimated by using the national rates per 100,000 inhabitants within the eight population groups and proportionally assigning forcible rape volumes to Minnesota’s population groups.</p> <p>2006-2012—Valid forcible rape figures were available for Minneapolis and St. Paul. To arrive at a comparable state estimate for forcible rape offenses to be included in national compilations, the rest of Minnesota’s forcible rape totals were estimated by using the national rates per 100,000 inhabitants within the eight population groups and proportionally assigning forcible rape volumes to Minnesota’s population groups.</p>
-----------	--	--	---

Table methodology

The tables in this report are based upon varying levels of data submissions. For example, some participating agencies may submit data for some but not all months of the reporting year. Using well-established procedures, the FBI estimates for missing offense data for agencies with partial reports and for nonreporting agencies and then aggregates these estimates with data reported to determine the number of offenses for each state and the nation. Tables 1–5, 7, and 29 present these approximations. In addition, various circumstances require the FBI to estimate offense totals from time to time for some states. (An explanation of the estimation procedures applied to particular states during specific reporting years is provided in the Offense Estimation section.)

To be included in Tables 8–11 and 21 and 22, which provide statistics for specific jurisdictions and states, agencies must submit 12 months of complete data prior to the FBI's established deadlines. To be included in Table 20, agencies must submit supplementary homicide data. Tables 12–19, 23–28, 30–75, and 77 provide the number of reporting agencies (data source) and the total population covered by their collective jurisdictions. To be included in Tables 78–81, agencies must submit officer and civilian law enforcement employee counts as of October 31. For information on the classification of jurisdictions, see *Area Definitions*.

The tabular presentation that follows briefly describes the data sources and the methods used to construct Tables 1–81.

(1) Table	(2) Database	(3) Table Construction	(4) General Comments
1–1A	<p>The data used in creating the estimates for these tables were from all law enforcement agencies participating in the UCR Program (including those submitting less than 12 months of data).</p> <p>Crime statistics for the nation include estimated offense totals (except arson) for agencies submitting less than 12 months of offense reports for each year.</p>	<p>These tables provide the estimated number and rate (per 100,000 inhabitants) of reported crimes in the United States for 2001 through 2020, as well as the 2-, 5-, and 10-year trends for 2020 based on these estimates.</p> <p>This table contains estimates based on both the legacy and revised definitions of rape.</p> <p>For the 2020 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2010 decennial population counts and 2011 through 2019 population estimates from the U.S. Census Bureau. Each agency’s rates of growth were averaged; that average was then applied and added to its 2019 Census population estimate to derive the agency’s 2020 population estimate.</p>	<p>The UCR Program does not have sufficient data to estimate for arson.</p> <p>The crime figures for 2019 have been adjusted from the prior year’s publication.</p> <p>In 2013, the FBI’s UCR Program initiated the collection of rape data under a revised definition within the Summary Based Reporting System. The term “forcible” was removed from the offense name, and the definition was changed to “penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.” In 2016, the FBI Director approved the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017.</p>

			the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017.
11	The data used in creating this table were from all state, tribal, and other law enforcement agencies submitting 12 months of complete offense data for 2020.	<p>This table provides the volume of violent crime (murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) and property crime (burglary, larceny-theft, and motor vehicle theft) as reported by state, tribal, and other law enforcement agencies (listed alphabetically by state) that contributed data to the UCR Program. (Note: Arson is not included in the property crime total in this table; however, if complete arson data were provided, they will appear in the arson column.)</p> <p>The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.</p> <p>Rape figures, and violent crime, which rape is a part, will not be published in this table for agencies submitting rape using the legacy definition of rape.</p>	<p>These data represent reported crime from individual state or territorial law enforcement agencies (i.e., state police, highway patrol, tribal, and/or other law enforcement agencies managed by the state or territory) participating in the UCR Program.</p> <p>Readers should take into consideration relevant factors in addition to the areas' crime statistics when making any valid comparisons of crime among different locales. <i>UCR Statistics: Their Proper Use</i> provides more details concerning the proper use of UCR statistics.</p> <p>When the FBI determines that an agency's data collection methodology does not comply with national UCR guidelines, the figure for that agency's offense(s) will not be included in the table, and the discrepancy will be explained in a footnote.</p> <p>In 2013, the FBI's UCR Program initiated the collection of rape data under a revised definition within</p>

			<p>the Summary Based Reporting System. The term “forcible” was removed from the offense name, and the definition was changed to “penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.”</p> <p>In 2016, the FBI Director approved the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017.</p>
12–15	<p>The data used in creating these tables were from all law enforcement agencies submitting at least 6 common months of complete offense reports for 2019 and 2020.</p>	<p>These 2-year trend tables provide the number of offenses for 2019 and 2020 and the percent change between these 2 years.</p> <p>In calculating trends, the UCR Program includes only common reported months for individual agencies.</p> <p>Rape data reported by agencies using the legacy definition of rape for 2019, 2020, or both years are not included in this table.</p> <p>For the 2020 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2010 decennial population counts and 2011 through 2019 population estimates from the U.S. Census Bureau. Each agency’s rates of growth were averaged; that average was then applied and added to its 2019 Census population estimate to derive the agency’s 2020 population estimate.</p>	<p>In 2013, the FBI’s UCR Program initiated the collection of rape data under a revised definition within the Summary Based Reporting System. The term “forcible” was removed from the offense name, and the definition was changed to “penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.”</p> <p>In 2016, the FBI Director approved the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017.</p>

<p>16–19</p>	<p>The data used in creating these tables were from all law enforcement agencies submitting 12 months of complete data (except arson, which is not included in these tables) for 2020.</p>	<p>These tables provide the rate per 100,000 inhabitants and the number of offenses known to law enforcement for violent crime (murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) and property crime (burglary, larceny-theft, and motor vehicle theft) for law enforcement agencies submitting 12 months of complete data (except arson) for 2020. In addition, these tables furnish the number of agencies meeting the criteria for inclusion in these tables and provide the estimated population for each population group.</p> <p>The FBI derived the offense rates by first dividing the total aggregated offense counts by the aggregated populations covered by contributing agencies for which 12 months of complete data were supplied and then multiplying the resulting figure by 100,000.</p> <p>The suburban and nonsuburban cities classifications in Table 17 encompass all cities other than principal cities served by municipal law enforcement agencies in MSAs.</p> <p>Rape data reported by agencies using the legacy definition of rape are not included in this table.</p> <p>For the 2020 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2010 decennial population counts and 2011 through 2019 population estimates from the U.S. Census Bureau. Each agency’s rates of growth were averaged; that average was then applied and added to its 2019 Census population estimate to derive the agency’s 2020 population estimate.</p>	<p>The UCR Program does not have sufficient data to publish arson offenses. Information about arson can be found in Arson Tables 1 and 2.</p> <p>The UCR Program does not include murder or arson offenses in Table 19. Information about these offenses can be found in the respective sections of this report: Expanded Homicide Data and Arson.</p> <p>The totals provided in Table 19 reflect only those offenses for which law enforcement agencies provided additional information to the UCR Program; therefore, the totals will not match those shown in other rate tables.</p> <p>In 2013, the FBI’s UCR Program initiated the collection of rape data under a revised definition within the Summary Based Reporting System. The term “forcible” was removed from the offense name, and the definition was changed to “penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.” In 2016, the FBI Director approved</p>
--------------	--	---	---

			the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017.
20	The data used in creating this table were from all law enforcement agencies that submitted supplementary homicide data for 2020.	<p>This table provides the type of weapons used in murder offenses. The data are based on the aggregated data from agencies within each state for which supplementary homicide data (e.g., weapon information) were reported to the FBI. The table also includes a breakdown of the types of firearms used in murders (i.e., handguns, rifles, shotguns, or firearms [type unknown]).</p> <p>The weapon totals are aggregated from all murders for which the FBI received supplemental homicide data for calendar year 2020.</p>	<p>The supplementary homicide data submitted by the Florida state UCR Program did not meet UCR guidelines and were not included in this table.</p> <p>The FBI received limited supplementary homicide data from the Alabama, Maryland, and Pennsylvania state UCR Programs.</p>
21, 22	The data used in creating these tables were from all law enforcement agencies that submitted complete offense reports for 12 months in 2020.	<p>These tables provide the type of weapons used in robberies (Table 21) and aggravated assaults (Table 22). The tables include the number of agencies that submitted data by state and the population covered by those agencies.</p> <p>The weapon totals are aggregated from all robberies and aggravated assaults for which the FBI received weapon breakdowns.</p> <p>For the 2020 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2010 decennial population counts and 2011 through 2019 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2019 Census population estimate to derive the agency's 2020 population estimate.</p>	<p>The FBI received limited weapon data from the Illinois state UCR Program.</p> <p>Limited data for 2019 were received from Alabama, Maryland, and Pennsylvania.</p>

<p>23, 24</p>	<p>The data used in creating these tables were from all law enforcement agencies submitting at least 6 months of complete property/ circumstance data for 2020.</p>	<p>The FBI derives trends by comparing statistics from agencies with at least 6 common months of complete data reports for 2019 and 2020.</p> <p>Table 23 provides an analysis of the crimes of murder, rape, robbery, burglary, larceny-theft, and motor vehicle theft. The table also lists the number of these offenses reported in 2020 and the percentage change in the number of these offenses when compared with 2019 data.</p> <p>The offense of aggravated assault is not included in Table 23. In the UCR Program, the taking of money or property in connection with an assault is reported as robbery.</p> <p>The percent distribution statistics are based on the offense totals for the crimes of robbery, burglary, and larceny-theft.</p> <p>Table 24 provides property types, the reported value of stolen property, and the value of recovered property. This table also lists the percentage of recovered value of each property type.</p> <p>The rape figures in this table are aggregate totals of data submitted using both the legacy and revised definitions of rape.</p> <p>For the 2020 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2010 decennial population counts and 2011 through 2019 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2019 Census population estimate to derive the agency's 2020 population estimate.</p>	<p>The FBI presents offense totals for the crimes of murder and rape, and then, based on supplemental data supplied by law enforcement, the FBI computes average value lost totals for the crimes of robbery, burglary, larceny-theft, and motor vehicle theft.</p> <p>The data source from which the FBI derives the information for this table does not include arson.</p> <p>Information regarding the average value of property damage due to arson can be found in Arson Table 2.</p> <p>In 2013, the FBI's UCR Program initiated the collection of rape data under a revised definition within the Summary Based Reporting System. The term "forcible" was removed from the offense name, and the definition was changed to "penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim." In 2016, the FBI Director approved the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017.</p>
---------------	---	--	--

<p>25–28</p>	<p>The data used in creating these tables were from all law enforcement agencies submitting at least 6 months of complete offense reports for 2020.</p>	<p>These tables provide the number of violent crimes, property crimes, and arsons with a breakdown of the offenses known to law enforcement and the percentage of those offenses that were cleared by arrest or exceptional means.</p> <p>Not all agencies submit data reports for arson to the FBI. Therefore, the agency counts and estimated population presented in this table do not represent participation for the reporting of arson.</p> <p>The FBI bases percent cleared statistics on aggregated offense and clearance totals.</p> <p>Rape data reported by agencies using the legacy definition of rape are not included in this table.</p> <p>For the 2020 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2010 decennial population counts and 2011 through 2019 population estimates from the U.S. Census Bureau. Each agency’s rates of growth were averaged; that average was then applied and added to its 2019 Census population estimate to derive the agency’s 2020 population estimate.</p>	<p>In 2013, the FBI’s UCR Program initiated the collection of rape data under a revised definition within the Summary Based Reporting System. The term “forcible” was removed from the offense name, and the definition was changed to “penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.” In 2016, the FBI Director approved the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017.</p> <p>The following information pertains only to Table 28:</p> <ul style="list-style-type: none"> • When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program considers the incident to be cleared by arrest, even though a physical arrest may not have occurred. • Clearances for offenses that include both adult and juvenile offenders are
--------------	---	---	--

			<p>classified as clearances for crimes committed by adults and are, therefore, not included in this table.</p> <ul style="list-style-type: none"> • Because the clearance percentages for crimes committed by juveniles include only those clearances in which no adults were involved, the figures in this table should not be used to present a definitive picture of juvenile involvement in crime.
29	<p>The data used in creating the estimates for this table were from all law enforcement agencies submitting 12 months of arrest data for 2020.</p>	<p>This table provides the estimated number of persons arrested in the United States in 2020.</p> <p>The arrest totals presented are national estimates based on the arrest statistics of all law enforcement agencies submitting 12 months of arrest data to the UCR Program.</p> <p>The estimated total number of arrests in this table is the sum of estimated arrest volumes for 27 offenses, not including suspicion.</p> <p>The rape figures in this table are aggregate totals of data submitted using both the legacy and revised definitions of rape.</p> <p>The arrest data for each of the individual offenses in this table is the sum of the estimated volume of arrests for that offense within each of the eight population groups. (See <i>Area Definitions</i>.)</p>	<p>In 2013, the FBI’s UCR Program initiated the collection of rape data under a revised definition within the Summary Based Reporting System. The term “forcible” was removed from the offense name, and the definition was changed to “penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.” In 2016, the FBI Director approved the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017.</p>

		<p>The FBI calculated each of the eight population group's arrest estimates by dividing the reported 12-month volume figures (as shown in Table 31) by the contributing agencies' jurisdictional populations. The resulting figure was then multiplied by the total population for each population group as estimated by the UCR Program.</p>	
30, 31	<p>The data used in creating these tables were from all law enforcement agencies submitting 12 months of arrest data for 2020.</p>	<p>These tables provide the number of persons arrested and the arrest rate per 100,000 inhabitants for the four regions of the United States (Table 30), the eight UCR population groups (Table 31), and the nation as a whole (both tables) in 2020.</p> <p>The FBI derived the arrest rates by first dividing the total number of arrests by the aggregated populations covered by contributing agencies and then multiplying the resulting figure by 100,000.</p> <p>The rape figures in this table are aggregate totals of data submitted using both the legacy and revised definitions of rape.</p> <p>For the 2020 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2010 decennial population counts and 2011 through 2019 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2019 Census population estimate to derive the agency's 2020 population estimate.</p>	<p>These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.</p> <p>In 2013, the FBI's UCR Program initiated the collection of rape data under a revised definition within the Summary Based Reporting System. The term "forcible" was removed from the offense name, and the definition was changed to "penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim." In 2016, the FBI Director approved the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017.</p>
32, 33	<p>The data used in creating these tables were from all</p>	<p>These 10-year trend tables provide the number of persons arrested in 2011 and 2020 and the percent change when the</p>	<p>These data represent the number of persons arrested; however, some</p>

	<p>law enforcement agencies submitting 12 months of arrest data for both 2011 and 2020.</p>	<p>data for these 2 years are compared. Table 32 furnishes a breakdown of these data by juveniles (persons under age 18) and adults. Table 33 furnishes a breakdown of these data by juveniles and adults.</p> <p>The 2011 rape figures are based on the legacy definition. The 2020 rape figures are aggregate totals based on the legacy and revised definitions. For this reason, a percent change is not provided.</p> <p>For the 2020 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2010 decennial population counts and 2011 through 2019 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2019 Census population estimate to derive the agency's 2020 population estimate.</p> <p>For the 2011 population estimates used in this table, The FBI calculated 2011 state growth rates using the U.S. Census Bureau's 2010 decennial state/national population figures and 2011 provisional state/national population estimates. The FBI then estimated population figures for city jurisdictions by applying the 2011 state growth rate to the 2010 U.S. Census Bureau data.</p>	<p>persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.</p> <p>In 2013, the FBI's UCR Program initiated the collection of rape data under a revised definition within the Summary Based Reporting System. The term "forcible" was removed from the offense name, and the definition was changed to "penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim." In 2016, the FBI Director approved the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017.</p>
34, 35	<p>The data used in creating these tables were from all law enforcement agencies submitting 12 months of arrest data for both 2016 and 2020.</p>	<p>These 5-year trend tables provide the number of persons arrested in 2016 and 2020 and the percent change when the data for these 2 years are compared. Table 34 furnishes a breakdown of these data by juveniles (persons under age 18) and adults. Table 35 furnishes a breakdown of these data by gender for juveniles.</p> <p>The rape figures in this table are aggregate totals of data submitted using both the legacy and revised definitions of rape.</p>	<p>These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, statistics in this table could, in some cases, represent multiple arrests of the same person.</p>

		<p>For the 2020 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2010 decennial population counts and 2011 through 2019 population estimates from the U.S. Census Bureau. Each agency’s rates of growth were averaged; that average was then applied and added to its 2019 Census population estimate to derive the agency’s 2020 population estimate.</p> <p>For the 2016 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2010 decennial population counts and 2011 through 2015 population estimates from the U.S. Census Bureau. Each agency’s rates of growth were averaged; that average was then applied and added to its 2015 Census population estimate to derive the agency’s 2016 population estimate</p>	<p>In 2013, the FBI’s UCR Program initiated the collection of rape data under a revised definition within the Summary Based Reporting System. The term “forcible” was removed from the offense name, and the definition was changed to “penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.” In 2016, the FBI Director approved the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017.</p>
36, 37	<p>The data used in creating these tables were from all law enforcement agencies submitting 12 months of arrest data for both 2019 and 2020.</p>	<p>These 2-year trend tables provide the number of persons arrested in 2019 and 2020 and the percent change when the data for these 2 years are compared. Table 36 furnishes a breakdown of these data by juveniles (persons under age 18) and adults. Table 37 furnishes a breakdown of these data by gender for juveniles.</p> <p>Rape figures in this table are aggregate totals of data submitted using both the legacy and revised definitions of rape.</p> <p>For the 2020 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2010 decennial population counts and 2011 through 2019 population estimates from the U.S. Census Bureau. Methodologies Explain Potential Differences in UCR Data

The Uniform Crime Reporting (UCR) Program is in the process of migrating its data releases from static web publications hosted on www.fbi.gov to more dynamic, multi-year displays of data on the Crime Data Explorer (CDE). Just as the data in the tables of the annual publications sometimes differ from those available in the master files for the same year, the data in the publication tables may also differ from those released on the Explorer Pages of the CDE. These variations are due to the difference in methodologies between the publication tables and data displayed on the CDE.

Historically, the agency, state, regional, and national data in Crime in the United States, Hate Crime Statistics, and Law Enforcement Officers Killed and Assaulted must pass internal data quality reviews prior to publication. According to the methodology, data that do not meet established criteria are not included in the publication tables. Individuals who typically use data from tables in Crime in the United States and other UCR web publications on www.fbi.gov will continue to have access to that format via the downloadable publication tables for 2020 and prior years.

As is the case with all the data files released for 1960 through 2020, the data displayed on the CDE include all reported data from agencies and entities aggregated from the agency data, such as states. According to methodology of typical open data websites, all reported data remain in file. Individuals who typically work with data files, such as the Master Files, can also access the CDE releases of data from 2020 and earlier for data based on the same quality methodology.

Starting with the release of 2021 data in calendar year 2022, the UCR Program will be consolidating its data quality review and management practices, which will reduce or eliminate potential differences between the two presentations going forward.

Files last modified: March 15, 2021

The Nation's Two Crime Measures

The U.S. Department of Justice administers two statistical programs to measure the magnitude, nature, and impact of crime in the nation: the Uniform Crime Reporting (UCR) Program and the National Crime Victimization Survey (NCVS). Each of these programs produces valuable information about aspects of the nation's crime problem. Because the UCR and NCVS programs have different purposes, use different methods, and focus on somewhat different aspects of crime, the complementary information they produce together provides a more comprehensive understanding of the nation's crime problem than either could produce alone.

Uniform Crime Reports

The International Association of Chiefs of Police (IACP) began publishing information for the UCR Program in 1929, two years after the IACP had established a committee to research the uniform reporting of crime statistics. Since September 1930, the FBI has administered the program, which currently collects information on murder and nonnegligent manslaughter, rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, arson, cargo theft, and human trafficking through the Summary Reporting System (SRS). Law enforcement agencies report arrest data only for 20 additional crime categories.

The UCR Program compiles data from monthly law enforcement reports or individual crime incident records transmitted directly to the FBI or to centralized agencies that then report to the FBI. The program thoroughly examines each report it receives for reasonableness, accuracy, and deviations that may indicate errors. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in a jurisdiction's boundaries. To identify any unusual fluctuations in an agency's crime counts, the program compares monthly reports to previous submissions from the agency and with those for similar agencies.

The UCR Program presents crime counts for the nation as a whole, as well as for regions, states, counties, cities, towns, tribal areas, and colleges and universities. This permits

analysis among neighboring jurisdictions and among those with similar populations and other common characteristics.

The FBI publishes its findings in a detailed annual report, *Crime in the United States*, issued in the fall. In addition to crime counts and trends, this report includes data on crimes cleared, persons arrested (age, sex, race, and ethnicity), law enforcement personnel, and the characteristics of homicides (including age, sex, and race of victims and offenders; victim-offender relationships; weapons used; and circumstances surrounding the homicides). The UCR Program also generates other specialized periodic reports.

Many local and state law enforcement agencies participating in the UCR Program submit their UCR data via the more comprehensive National Incident-Based Reporting System (NIBRS). NIBRS provides agencies the opportunity to submit additional details about each criminal incident in 23 broad categories of offenses. NIBRS furnishes incident and offense data as well as characteristics of all victims, offenders, and arrestees (age, sex, race, and ethnicity; and victim-offender relationships). The collection includes weapons data, location types, drug information, property descriptions, the type of criminal activity or gang involvement; and it offers the ability for greater analysis.

National Crime Victimization Survey

The NCVS, administered by the Bureau of Justice Statistics (BJS), provides a detailed picture of crime incidents, victims, and trends. The program began in 1973 as the National Crime Survey (NCS). In 1992, NCS was renamed NCVS to reflect a substantial redesign effort that focused primarily on methodological changes to the survey. The redesign also improved the initial questions used to screen for victimization incidents, updated the survey methods to take advantage of new technologies, and broadened the scope of crimes measured. The current NCVS collects detailed information on the frequency and nature of the crimes of rape and other sexual assault, robbery, aggravated and simple assault, personal larceny, household burglary, motor vehicle theft, and other theft.

Each year, BJS interviews a nationally representative sample of approximately 160,000 persons age 12 or older living in households across the nation. Households remain in the sample for 3 years. New households rotate into the sample on an ongoing basis.

NCVS collects information on crimes experienced by individuals and households during the six months preceding the interview, whether or not those crimes were reported to law enforcement. A unique feature of NCVS is that it collects both reported and unreported crimes and reasons why the crime was or was not reported.

The survey also captures specific details about each crime incident. NCVS collects information about victims (such as age, sex, race, ethnicity, marital status, income, and educational level), offenders (such as sex, race, approximate age, and victim-offender relationship), and the crimes (including time and place of occurrence, use of weapons, nature of injury, and economic consequences). In addition, the NCVS asks questions about the experiences of victims with the criminal justice system, self-protective measures used by victims, and possible substance abuse by offenders. The NCVS periodically includes additional questions on particular topics. Recent supplements have covered issues concerning school crime, identity theft, contacts between police and citizens, and stalking.

The BJS publishes NCVS data in *Criminal Victimization*, an annual report that covers the broad range of detailed information collected by NCVS, and the NCVS Victimization Analysis Tool, an online database through which users can examine victimization rates, counts, and percentages by a range of victim and crime characteristics. BJS also publishes detailed reports on topics such as intimate partner violence, workplace violence, hate crime, and crime against persons with disabilities. The National Archive of Criminal Justice Data at the University of Michigan archives the NCVS data files to enable researchers to perform independent analyses.

Comparing UCR and NCVS

Because the BJS designed NCVS in part to complement the UCR Program, the two programs share many similarities. As much as their different collection methods permit, the two measure the same subset of serious crimes, defined alike. Both programs cover rape, robbery, aggravated assault, burglary, theft, and motor vehicle theft. Rape, robbery, theft, and motor vehicle theft are defined virtually identically by both the UCR Program and the NCVS. (Prior to 2013, the UCR Program measured a more limited definition of forcible rape against women only, while the NCVS measured a broader definition of rape against both sexes. Now NCVS and the UCR Program define rape analogously.)

Despite covering a set of similar crimes, the two programs differ significantly. First, the two programs serve different purposes. The UCR Program's primary objective is to provide a reliable set of criminal justice statistics for law enforcement administration, operation, and management. BJS established NCVS to provide previously unavailable information about crime (including crime not reported to police), victims, and offenders.

Second, the two programs measure an overlapping but nonidentical set of crimes. The NCVS includes, but the UCR Program's SRS excludes, sexual assault (completed, attempted, and threatened), attempted robberies, verbal threats of rape, simple assault, and crimes not reported to law enforcement. UCR includes, but NCVS excludes, homicide, arson, commercial crimes, and crimes against children under age 12. The UCR Program's SRS also captures crimes reported to law enforcement but collects only arrest data for simple assault and sex offenses other than rape.

Third, because of methodology, the NCVS and UCR definitions of some crimes differ. For example, the UCR SRS defines burglary as the unlawful entry or attempted entry of a structure to commit a felony or theft. The NCVS defines burglary as the entry or attempted entry of a residence by a person who had no right to be there.

Fourth, for property crimes (burglary, theft, and motor vehicle theft), the two programs calculate crime rates using different bases. The UCR rates for these crimes are per capita (number of crimes per 100,000 persons), whereas the NCVS rates for these crimes are per household (number of crimes per 1,000 households).

Because the number of households may not grow at the same rate each year as the total population, trend data for rates of property crimes measured by the two programs may not be comparable. In addition, some differences in the data from the two programs may result from sampling variation in NCVS and from estimating for nonresponse in UCR.

BJS derives the NCVS estimates from interviewing a sample. The estimates are subject to a margin of error. This error is known and is reflected in the standard error of the estimate. The UCR Program bases its data on the actual counts of offenses reported by law enforcement agencies. In some circumstances, the UCR Program estimates its data for nonparticipating agencies or those reporting partial data. Apparent discrepancies between statistics from the two programs can usually be accounted for by differences in definitions or procedures or resolved by comparing NCVS sampling variations

(confidence intervals) of those crimes said to have been reported to police with UCR statistics.

Each program has unique strengths. UCR provides a measure of the number of crimes reported to law enforcement agencies throughout the country. The UCR SRS's Supplementary Homicide Reports provide reliable, timely data on the extent and nature of homicides in the nation. In addition to providing annual point and change estimates on criminal victimization, NCVS is the primary source of information on the characteristics of criminal victimization incidents and on the number and types of crimes not reported to law enforcement authorities.

By understanding the strengths and limitations of each program, it is possible to use UCR and NCVS to achieve a greater understanding of crime trends and the nature of crime in the United States. For example, changes in police procedures, shifting attitudes toward crime and police, and other societal changes can affect the extent to which people report and law enforcement agencies record crime. NCVS and UCR data can be used in complementary ways to explore why trends in reported and police-recorded crime may differ.

Area Definitions

The FBI's Uniform Crime Reporting (UCR) Program collects crime data and supplemental information that make it possible to generate a variety of statistical compilations, including data presented by reporting areas. These statistics provide data users with the opportunity to analyze local crime data in conjunction with data for areas of similar geographic location or population size. The reporting areas that the UCR Program uses in its data breakdowns include community types, population groups, and regions and geographic divisions. For community types, the UCR Program considers proximity to metropolitan areas using the Office of Management and Budget's (OMB's) designations. (Generally, sheriffs, county police, and state police report crimes within counties but outside cities; local police report crimes within city limits.) The number of inhabitants living in a locale (based on the U.S. Census Bureau's figures) determines the population group into which the program places it. Finally, in its geographic breakdowns, the UCR Program divides the United States into regions and divisions.

Community types

In order to assist data users who wish to analyze and present uniform statistical data about metropolitan areas, the UCR Program uses reporting units that represent major population centers. The program compiles data for these areas according to three types of communities:

1. Metropolitan Statistical Areas (MSAs)—Each MSA contains a principal city or urbanized area with a population of at least 50,000 inhabitants. MSAs include the principal city; the county in which the city is located; and other adjacent counties that have, as defined by the OMB, a high degree of economic and social integration with the principal city and county as measured through commuting. In the UCR Program, counties within an MSA are considered metropolitan. In addition, MSAs may cross state boundaries.

Some presentations in this publication refer to Metropolitan Divisions, which are subdivisions of an MSA that consists of a core with “a population of at least 2.5 million persons. A Metropolitan Division consists of one or more main/secondary counties that

represent an employment center or centers, plus adjacent counties associated with the main county or counties through commuting ties,” (*Federal Register* 65 [249]). Also, some tables reference suburban areas, which are subdivisions of MSAs that exclude the principal cities but include all the remaining cities (those having fewer than 50,000 inhabitants) and the unincorporated areas of the MSAs.

Note: Because the elements that comprise MSAs (particularly the geographic compositions) are subject to change, the program discourages data users from making year-to-year comparisons of MSA data.

2. Cities Outside MSAs—Ordinarily, cities outside MSAs are incorporated areas.

3. Nonmetropolitan Counties Outside MSAs—Most nonmetropolitan counties are composed of unincorporated areas.

Community types are further illustrated in the following table:

Metropolitan	Nonmetropolitan
Principal Cities (50,000+ inhabitants)	Cities outside Metropolitan Areas
Suburban Cities	
Metropolitan Counties	Nonmetropolitan Counties

Population groups

The UCR Program uses the following population group designations:

Population Group	Political Label	Population Range
I	City	250,000 and more
II	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI ^{1, 2}	City	Less than 10,000
VIII (Nonmetropolitan County) ²	County	N/A
IX (Metropolitan County) ²	County	N/A

¹Includes universities and colleges to which no population is attributed.

²Includes state police to which no population is attributed.

Individual law enforcement agencies are the source of UCR data. The number of agencies included in each population group may vary from year to year because of population growth, geopolitical consolidation, municipal incorporation, etc. In noncensus years, the UCR Program estimates population figures for individual jurisdictions. (A more comprehensive explanation of population estimations can be found in the *Methodology*.)

The table below shows the number of agencies within each population group that were eligible to participate in the UCR Program for 2020:

Population Group	Number of Agencies	Population Covered
I	90	64,603,801
II	233	34,003,650
III	504	35,095,300
IV	924	31,937,193
V	1,937	30,801,006
VI ^{1, 2}	9,946	26,371,006
VIII (Nonmetropolitan County) ²	2,800	27,172,995
IX (Metropolitan County) ²	2,185	79,499,172
Total	18,619	329,484,123

¹Includes universities and colleges to which no population is attributed.

²Includes state police to which no population is attributed.

Regions and divisions

The map below illustrates the four regions of the United States along with their nine geographic divisions as established by the U.S. Census Bureau. The UCR Program uses this widely recognized geographic organization when compiling the nation's crime data.

The following table lists the 50 states and the District of Columbia arranged according to the regions and geographic divisions of the United States.

NORTHEASTERN STATES

New England	Middle Atlantic
Connecticut	New Jersey
Maine	New York
Massachusetts	Pennsylvania
New Hampshire	
Rhode Island	
Vermont	

MIDWESTERN STATES

East North Central	West North Central
Illinois	Iowa
Indiana	Kansas
Michigan	Minnesota
Ohio	Missouri
Wisconsin	Nebraska
	North Dakota
	South Dakota

SOUTHERN STATES

South Atlantic	East South Central
Delaware	Alabama
District of Columbia	Kentucky
Florida	Mississippi
Georgia	Tennessee
Maryland	West South Central
North Carolina	Arkansas
South Carolina	Louisiana
Virginia	Oklahoma
West Virginia	Texas

WESTERN STATES

Mountain	Pacific
Arizona	Alaska
Colorado	California
Idaho	Hawaii

Montana	Oregon
Nevada	Washington
New Mexico	
Utah	
Wyoming	

Offense Definitions

The Uniform Crime Reporting (UCR) Program divides offenses into two groups, Part I and Part II crimes, in its Summary Reporting System. Each month, participating law enforcement agencies submit information on the number of Part I offenses that become known to them; those offenses cleared by arrest or exceptional means; and the age, sex, and race of persons arrested for each of the offenses. Contributors provide only arrest data for Part II offenses.

The UCR Program collects data about **Part I** offenses in order to measure the level and scope of crime occurring throughout the nation. The program's founders chose these offenses because they are serious crimes, they occur with regularity in all areas of the country, and they are likely to be reported to the police. The **Part I** offenses are:

Criminal homicide—a.) Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, and accidental deaths are excluded. The program classifies justifiable homicides separately and limits the definition to: (1) the killing of a felon by a law enforcement officer in the line of duty; or (2) the killing of a felon, during the commission of a felony, by a private citizen. b.) Manslaughter by negligence: the killing of another person through gross negligence. Deaths of persons due to their own negligence, accidental deaths not resulting from gross negligence, and traffic fatalities are not included in the category manslaughter by negligence.

Rape—The penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.

Robbery—The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated assault—An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is

accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

Burglary (breaking or entering)—The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny-theft (except motor vehicle theft)—The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles, motor vehicle parts and accessories, shoplifting, pocket-picking, or the stealing of any property or article that is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, confidence games, forgery, check fraud, etc., are excluded.

Motor vehicle theft—The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on land surface and not on rails. Motorboats, construction equipment, airplanes, and farming equipment are specifically excluded from this category.

Arson—Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Human trafficking, commercial sex acts—Inducing a person by force, fraud, or coercion to participate in commercial sex acts, or in which the person induced to perform such act(s) has not attained 18 years of age.

Human trafficking, involuntary servitude—The obtaining of a person(s) through recruitment, harboring, transportation, or provision, and subjecting such persons by force, fraud, or coercion into involuntary servitude, peonage, debt bondage, or slavery (not to include commercial sex acts).

The **Part II** offenses, for which only arrest data are collected, are:

Other assaults (simple)—Assaults and attempted assaults where no weapon was used or no serious or aggravated injury resulted to the victim. Stalking, intimidation, coercion, and hazing are included.

Forgery and counterfeiting—The altering, copying, or imitating of something, without authority or right, with the intent to deceive or defraud by passing the copy or thing altered or imitated as that which is original or genuine; or the selling, buying, or possession of an altered, copied, or imitated thing with the intent to deceive or defraud. Attempts are included.

Fraud—The intentional perversion of the truth for the purpose of inducing another person or other entity in reliance upon it to part with something of value or to surrender a legal right. Fraudulent conversion, obtaining of money or property by false pretenses, confidence games, and bad checks, except forgeries and counterfeiting, are included.

Embezzlement—The unlawful misappropriation or misapplication by an offender to his/her own use or purpose of money, property, or some other thing of value entrusted to his/her care, custody, or control.

Stolen property: buying, receiving, possessing—Buying, receiving, possessing, selling, concealing, or transporting any property with the knowledge that it has been unlawfully taken, as by burglary, embezzlement, fraud, larceny, robbery, etc. Attempts are included.

Vandalism—To willfully or maliciously destroy, injure, disfigure, or deface any public or private property, real or personal, without the consent of the owner or person having custody or control by cutting, tearing, breaking, marking, painting, drawing, covering with filth, or any other such means as may be specified by local law. Attempts are included.

Weapons: carrying, possessing, etc.—The violation of laws or ordinances prohibiting the manufacture, sale, purchase, transportation, possession, concealment, or use of firearms, cutting instruments, explosives, incendiary devices, or other deadly weapons. Attempts are included.

Prostitution and commercialized vice—The unlawful promotion of or participation in sexual activities for profit.

Sex offenses (except rape, prostitution, and commercialized vice)—Offenses against chastity, common decency, morals, and the like.

Drug abuse violations—The violation of laws prohibiting the production, distribution, and/or use of certain controlled substances. The unlawful cultivation, manufacture, distribution, sale, purchase, use, possession, transportation, or importation of any controlled drug or narcotic substance. Arrests for violations of state and local laws, specifically those relating to the unlawful possession, sale, use, growing, manufacturing, and making of narcotic drugs. The following drug categories are specified: opium or cocaine and their derivatives (morphine, heroin, codeine); marijuana; synthetic narcotics—manufactured narcotics that can cause true addiction (Demerol, methadone); and dangerous nonnarcotic drugs (barbiturates, Benzedrine).

Gambling—To unlawfully bet or wager money or something else of value; assist, promote, or operate a game of chance for money or some other stake; possess or transmit wagering information; manufacture, sell, purchase, possess, or transport gambling equipment, devices, or goods; or tamper with the outcome of a sporting event or contest to gain a gambling advantage.

Offenses against the family and children—Unlawful nonviolent acts by a family member (or legal guardian) that threaten the physical, mental, or economic well-being or morals of another family member and that are not classifiable as other offenses, such as assault or sex offenses. Attempts are included.

Driving under the influence—Driving or operating a motor vehicle or common carrier while mentally or physically impaired as the result of consuming an alcoholic beverage or using a drug or narcotic.

Liquor laws—The violation of state or local laws or ordinances prohibiting the manufacture, sale, purchase, transportation, possession, or use of alcoholic beverages, not including driving under the influence and drunkenness. Federal violations are excluded.

Drunkenness—To drink alcoholic beverages to the extent that one's mental faculties and physical coordination are substantially impaired. Driving under the influence is excluded.

Disorderly conduct—Any behavior that tends to disturb the public peace or decorum, scandalize the community, or shock the public sense of morality.

Vagrancy—The violation of a court order, regulation, ordinance, or law requiring the withdrawal of persons from the streets or other specified areas; prohibiting persons from remaining in an area or place in an idle or aimless manner; or prohibiting persons from going from place to place without visible means of support.

All other offenses—All violations of state or local laws not specifically identified as Part I or Part II offenses, except traffic violations.

Suspicion—Arrested for no specific offense and released without formal charges being placed.

Curfew and loitering laws (persons under age 18)—Violations by juveniles of local curfew or loitering ordinances.

¹ Populations are U.S. Census Bureau provisional estimates as of July 1 for each year except 2000 and 2010, which are decennial census counts.² The violent crime figures include the offenses of murder, rape (legacy definition), robbery, and aggravated assault.³ The figures shown in this column for the offense of rape were estimated using the revised UCR definition of rape. See data declaration for further explanation.⁴ The figures shown in this column for the offense of rape were estimated using the legacy UCR definition of rape. See data declaration for further explanation.⁵ The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, are not included in this table.⁶ The crime figures have been adjusted.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Therefore, no arson data are published in this table.

¹ Population figures are U.S. Census Bureau provisional estimates as of July 1, 2020.

² The violent crime figures include the offenses of murder, rape (revised definition), robbery, and aggravated assault.

³ The figures shown in this column for the offense of rape were estimated using the revised Uniform Crime Reporting definition of rape. See data declaration for further explanation.

⁴ The percentage reported under "Area actually reporting" is based upon the population covered by agencies providing 3 months or more of crime reports to the FBI.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Therefore, no arson data are published in this table.

Table 3**Crime in the United States****Offense and Population Percent Distribution by Region, 2020**

Region	Population	Violent crime	Murder and nonnegligent manslaughter	Rape (revised definition) ¹	Robbery	Aggravated assault	Property crime	Burglary	Larceny-theft	Motor vehicle theft
United States Total²	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Northeast	17.0	13.1	11.7	11.9	15.8	12.6	11.9	9.6	13.1	7.9
Midwest	20.7	20.2	22.3	23.9	17.8	20.2	18.9	18.9	19.1	18.0
South	38.4	41.6	47.1	38.2	37.4	43.1	41.4	42.7	41.9	36.6
West	23.9	25.1	18.9	26.0	29.0	24.1	27.9	28.8	26.0	37.4

¹ The figures shown in the rape column were calculated using the revised Uniform Crime Reporting definition of rape. See data declaration for further explanation.

² Because of rounding, the percentages may not add to 100.0.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Therefore, no arson data are published in this table.

¹ The previous year's crime figures have been adjusted.

² Population figures are U.S. Census Bureau provisional estimates as of July 1, 2020.

³ The violent crime figures include the offenses of murder, rape (revised definition), robbery, and aggravated assault.

⁴ The figures shown in the rape (revised definition) column were estimated using the revised Uniform Crime Reporting (UCR) definition of rape. See the data declaration for further explanation.

⁵ Limited data for 2020 were available for Alabama, Maryland and Pennsylvania.

⁶ The FBI determined that the state did not follow national UCR Program guidelines for reporting an offense. Consequently, those figures are not included in this table. The agency of Rockford submits independently and therefore includes all offenses.

⁷ This state's agencies submitted rape data according to the legacy UCR definition of rape.

⁸ Includes offenses reported by the Metro Transit Police and the District of Columbia Fire and Emergency Medical Services: Arson Investigation Unit.

⁹ Because of changes in the state/local agency's reporting practices, figures are not comparable to previous years' data.

* Less than one-tenth of 1 percent.

¹The figures shown in this column for the offense of rape were reported using only the revised Uniform Crime Reporting (UCR) definition of rape. See the data declaration for further explanation.

²Because of changes in the state/local agency's reporting practices, figures are not comparable to previous years' data.

³The FBI determined that the agency's data were overreported. Consequently, those data are not included in this table.

⁴The FBI determined that the state did not follow national UCR Program guidelines for reporting an offense. Consequently, those figures are not included in this table.

⁵The FBI determined that the agency's data were underreported. Consequently, those data are not included in this table.

Motor vehicle theft	767,290	772,943	751,904	

¹ The crime figures have been adjusted.² The figures shown for this offense of rape were estimated using the revised Uniform Crime Reporting definition of rape. See the downloadable Methodo³ Because of rounding, the number of offenses may not add to the total.

Offenses Known to Law Enforcement

The FBI's Uniform Crime Reporting (UCR) Program collects the number of offenses that come to the attention of law enforcement for violent crime and property crime, as well as data regarding clearances of these offenses. In addition, the FBI collects auxiliary information about these offenses (e.g., time of day of burglaries). The expanded offense data include trends in both crime volume and crime rate per 100,000 inhabitants. Finally, the UCR Program collects expanded homicide data, which includes information about homicide victims and offenders, weapons used, the circumstances surrounding the offenses, and justifiable homicides.

Violent Crime

Violent crime is composed of four offenses: murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Violent crimes are defined in the UCR Program as those offenses that involve force or threat of force.

The Violent Crime topic page provides more information about violent crime and an overview of violent crime data for 2020.

Property Crime

Property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson. The object of the theft-type offenses is the taking of money or property, but there is no force or threat of force against the victims.

The Property Crime topic page provides more information about property crime and an overview of property crime data for 2020.

Clearances

Within the UCR Program, law enforcement agencies can clear, or “close,” offenses in one of two ways: by arrest or by exceptional means. Although agencies may administratively close a case, this does not necessarily mean that the agency can clear the offense for UCR purposes.

The Clearances topic page provides more information about the criteria used to clear an offense for UCR purposes and an overview of clearance data for 2020.

Expanded offense data

The FBI collects the number of offenses for the crimes of murder and nonnegligent manslaughter, rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson through the UCR Program. In addition to the number of offenses known to the police, the FBI also collects other data about these offenses, such as the locations of robberies, time of day of burglaries, and types of larcenies. These expanded data include 2-year trends concerning additional information about select offenses (e.g., type of weapon), 2-year trends for crime volumes, and current year crime rates per 100,000 inhabitants.

See the Expanded Offense Data topic page for more information.

Expanded homicide data

The Expanded Homicide Data section of this publication provides information regarding the age, sex, race, and ethnicity of both the murder victim and the offender; the type of weapon used in the murder; the relationship of the victim to the offender; and the circumstance surrounding the incident. These data also include information about justifiable homicides.

See the Expanded Homicide Data topic page for more information.

¹ The figures shown in this column for the offense of rape were reported using only the revised Uniform Crime Reporting (UCR) definition of rape. See the downloadable *Methodology* file for further explanation.

² The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.

³ Limited data for 2020 were available for Alabama, Maryland and Pennsylvania.

⁴ Because of changes in the state/local agency's reporting practices, figures are not comparable to previous years' data.

⁵ The FBI determined that the agency's data were overreported. Consequently, those data are not included in this table.

⁶ The FBI determined that the state did not follow national UCR Program guidelines for reporting an offense. Consequently, those figures are not included in this table. The agency of Rockford submits independently and therefore includes all offenses.

⁷ The FBI determined that the agency's data were underreported. Consequently, those data are not included in this table.

⁸ This agency submits rape data classified according to the legacy UCR definition; therefore the rape offense and violent crime total, which rape is a part of, is not included in this table. See the downloadable *Methodology* file for further explanation.

⁹ Arson offenses are reported by the Toledo Fire Department; therefore, those figures are not included in this report.

Table 9
Offenses Known to Law Enforcement
 by State by University and College, 2020

¹ The student enrollment figures provided by the United States Department of Education are for the 2019 school year, the most recent available. The enrollment figures include full-time and part-time students.

State	University/College	Campus	Student Enrollment ¹	Violent Crime	Violent			Property Crime	Property			
					Murder and nonnegligent manslaughter	Rape ²	Robbery		Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft

² The figures shown in this column for the offense of rape were reported using only the revised Uniform Crime Reporting definition of rape. See the downloadable *Methodology* file for further explanation.

³ The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.

⁴ Limited data for 2020 were available for Alabama, Maryland, and Pennsylvania.

⁵ Because of changes in the state/local agency's reporting practices, figures are not comparable to previous years' data.

⁶ Student enrollment figures were not available.

⁷ The FBI determined that the state did not follow national UCR Program guidelines for reporting an offense. Consequently, this figure is not included in this table.

NOTE: Caution should be exercised in making any intercampus comparisons or ranking schools because university/college crime statistics are affected by a variety of factors. These include demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of the campus to outside visitors, size of enrollment, etc.

Table 10

Offenses Known to Law Enforcement

by State by Metropolitan and Nonmetropolitan Counties, 2020

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office or county police department.]

¹ The figures shown in this column for the offense of rape were reported using only the revised Uniform Crime Reporting (UCR) definition of rape. See the downloadable *Methodology* file for further explanation.

² The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.

³ Limited data for 2020 were available for Alabama, Maryland, and Pennsylvania.

⁴ Because of changes in the state/local agency's reporting practices, figures are not comparable to previous years' data.

⁵ The Tulare County Highway Patrol collects the motor vehicle thefts for this county. These data can be found in Table 11.

⁶ The FBI determined that the agency's data were underreported. Consequently, those data are not included in this table.

⁷ The FBI determined that the agency's data were overreported. Consequently, those data are not included in this table.

State	Metropolitan/Nonmetropolitan	County	Violent Crime	Violent			Property Crime	Property		
				Murder and nonnegligent manslaughter	Rape ¹	Robbery		Aggravated assault	Burglary	Larceny-theft

⁸ The FBI determined that the state did not follow national UCR Program guidelines for reporting an offense. Consequently, this figure is not included in this table.

⁹ This agency submits rape data classified according to the legacy UCR definition; therefore, the rape offense and violent crime total, which rape is a part of, is not included in this table. See the downloadable *Methodology* file for further explanation.

¹ The figures shown in this column for the offense of rape were reported using only the revised Uniform Crime Reporting (UCR) definition of rape. See the downloadable *Methodology* file for further explanation.

² The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.

³ Limited data for 2020 were available for Alabama, Maryland, and Pennsylvania.

⁴ Because of changes in the state/local agency's reporting practices, figures are not comparable to previous years' data.

⁵ The FBI determined that the state did not follow national UCR Program guidelines for reporting an offense. Consequently, those figures are not included in this table.

⁶ The FBI determined that the agency's data were underreported. Consequently, those data are not included in this table.

Table 12
Crime Trends
 by Population Group, 2019-2020

¹ The figures shown in this column for the offense of rape were reported using only the revised Uniform Crime Reporting definition of rape. See the downloadable *Methodology* file for further explanation.

² Includes state police agencies that report aggregately for the entire state.

³ Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban areas exclude all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

¹ The figures shown in the rape column include only those reported by law enforcement agencies that used the revised Uniform Crime Reporting definition of rape. See the downloadable *Methodology* file for further explanation.

² Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban areas exclude all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

Violent Crime

Definition

In the FBI's Uniform Crime Reporting (UCR) Program, violent crime is composed of four offenses: murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Violent crimes are defined in the UCR Program as those offenses that involve force or threat of force.

Data collection

The data presented in *Crime in the United States* reflect the Hierarchy Rule, which requires that only the most serious offense in a multiple-offense criminal incident be counted. The descending order of UCR violent crimes are murder and nonnegligent manslaughter, rape, robbery, and aggravated assault, followed by the property crimes of burglary, larceny-theft, and motor vehicle theft. Although arson is also a property crime, the Hierarchy Rule does not apply to the offense of arson. In cases in which an arson occurs in conjunction with another violent or property crime, both the arson and the additional crime are reported.

In 2016, the FBI Director approved the recommendation to discontinue reporting of rape data using the UCR legacy definition beginning in 2017. However, to maintain the 20-year trend in Table 1, the rape total for the legacy definition is used to calculate the violent crime total.

Overview

- In 2020, an estimated 1,277,696 violent crimes occurred nationwide, an increase of 5.6 percent from the 2019 estimate. (See Tables 1 and 1A.)
- When considering 5- and 10-year trends, the 2020 estimated violent crime total was 2.2 percent above the 2016 level and 5.9 percent above the 2011 level. (See Tables 1 and 1A.)
- There were an estimated 387.8 violent crimes per 100,000 inhabitants in 2020, a rate that rose 5.2 percent when compared with the 2019 estimated violent crime rate and rose 0.2 percent from the 2011 estimate. (See Tables 1 and 1A.)

- Aggravated assaults accounted for 72.1 percent of violent crimes reported to law enforcement in 2020. Robbery offenses accounted for 19.1 percent of violent crime offenses; rape (legacy definition) accounted for 7.1 percent; and murder accounted for 1.7 percent. (Based on Table 1.)
- Information collected regarding types of weapons used in violent crimes showed that firearms were used in 76.7 percent of the nation’s murders, 37.3 percent of robberies, and 34.9 percent of aggravated assaults. (Weapons data are not collected for rape.) (See Expanded Homicide Data Table 7, Robbery Table 3, and the Aggravated Assault Table.)

Murder

Definition

The FBI's Uniform Crime Reporting (UCR) Program defines murder and nonnegligent manslaughter as the willful (nonnegligent) killing of one human being by another.

The classification of this offense is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. The UCR Program does not include the following situations in this offense classification: deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are classified as aggravated assaults.

Data collection

In addition to the number of murder offenses known, the UCR Program also encourages law enforcement agencies to report supplementary homicide data as well as information about justifiable homicides that may have occurred within their jurisdictions.

Supplementary Homicide Data—The UCR Program's supplementary homicide data provide information regarding the age, sex, race, and ethnicity of the murder victim and the offender; the type of weapon used; the relationship of the victim to the offender; and the circumstances surrounding the incident. Law enforcement agencies are asked—but not required—to provide complete supplementary homicide data for each murder they report to the UCR Program. Information gleaned from these supplementary homicide data can be viewed in the Expanded Homicide Data section.

Justifiable homicide—Certain willful killings must be reported as justifiable or excusable. In the UCR Program, justifiable homicide is defined as and limited to:

- The killing of a felon by a peace officer in the line of duty.
- The killing of a felon, during the commission of a felony, by a private citizen.

Because these killings are determined through law enforcement investigation to be justifiable, they are tabulated separately from murder and nonnegligent manslaughter.

More information about justifiable homicide is furnished in the Expanded Homicide Data section and in Expanded Homicide Data Table 14, “Justifiable Homicide by Weapon, Law Enforcement, 2016–2020,” and Expanded Homicide Data Table 15, “Justifiable Homicide by Weapon, Private Citizen, 2016–2020.”

Overview

- In 2020, the estimated number of murders in the nation was 21,570. This was a 29.4 percent increase from the 2019 estimate, a 23.9 percent increase from the 2016 figure, and a 47.1 percent increase from the number in 2011. (See Tables 1 and 1A.)
- There were 6.5 murders per 100,000 people in 2020. The murder rate in 2020 was up from the rate in 2019 (28.9 percent). Also, the murder rate was up 21.6 percent when compared with the 2016 rate and 39.1 percent from the 2011 rate. (See Tables 1 and 1A.)
- Of the estimated number of murders in the United States, 47.1 percent were reported in the South, 22.3 percent were reported in the Midwest, 18.9 percent were reported in the West, and 11.7 percent were reported in the Northeast. (See Table 3.)

Expanded data

UCR expanded offense data are details of the various offenses that the UCR Program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapon used in a crime, type or value of items stolen, and so forth. In addition, expanded data include trends (for example, 2-year comparisons) and rates per 100,000 inhabitants.

Expanded information regarding murder is available in the following tables:

Trends (2-year): Tables 12, 13, and 14

Rates (per 100,000 inhabitants): Tables 16, 17, and 18

Expanded Homicide Data (supplementary homicide information):

Victim data: Expanded Homicide Data Tables 1, 2, 4, 5, 6, 8, 9, 10, 12, and 13

Offender data: Expanded Homicide Data Tables 3, 5, and 6

Victim/offender relationship data: Expanded Homicide Data Table 10

Circumstance data: Expanded Homicide Data Tables 10, 11, 12, and 13

Weapons data: Expanded Homicide Data Tables 7, 8, 9, 11, 14, 15, and Table 20

¹ Total number of murders for which supplemental homicide data were received.

² Pushed is included in hands, fists, feet, etc.

³ Limited data for 2020 were available for Alabama, Maryland and Pennsylvania.

⁴ Data submitted through the Bureau of Indian Affairs.

Rape

Definition

In 2013, the FBI Uniform Crime Reporting (UCR) Program began collecting rape data under a revised definition within the Summary Reporting System. Previously, offense data for forcible rape were collected under the legacy UCR definition: the carnal knowledge of a female forcibly and against her will. Beginning with the 2013 data year, the term “forcible” was removed from the offense title, and the definition was changed. The revised UCR definition of rape is penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim. Attempts or assaults to commit rape are also included in the statistics presented here; however, statutory rape and incest are excluded.

In 2016, the FBI Director approved the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017. However, to maintain the 20-year trend in Table 1, national estimates for rape under the legacy definition are provided along with estimates under the revised definition for 2017.

Data collection

The UCR Program counts one offense for each victim of a rape, attempted rape, or assault with intent to rape, regardless of the victim’s age. Non-consensual sexual relations involving a familial member is considered rape, not incest. All other crimes of a sexual nature are considered to be Part II offenses; as such, the UCR Program collects only arrest data for those crimes. The offense of statutory rape, in which no force is used but the female victim is under the age of consent, is included in the arrest total for the sex offenses category.

Overview

There were an estimated 126,430 rapes (revised definition) reported to law enforcement in 2020. This estimate was 11.7 percent lower than the 2019 estimate and 4.5 percent lower than the 2016 estimate. (See Tables 1 and 1A.)

Expanded data

Expanded offense data are the details of the various offenses that the UCR Program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapon used in a crime, type or value of items stolen, and so forth. In addition, expanded data include trends (for example, 2-year comparisons) and rates per 100,000 inhabitants.

Expanded information regarding rape is available in the following tables:

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Robbery

Definition

The FBI's Uniform Crime Reporting (UCR) Program defines robbery as taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Overview

- There were an estimated 243,600 robberies nationwide in 2020. The estimated number of robberies decreased 9.3 percent from the 2019 estimate and decreased 26.8 percent from the 2016 estimate. The 2020 estimate was down 31.3 percent from the 2011 estimate. (See Tables 1 and 1A.)
- The estimated robbery rate of 73.9 per 100,000 inhabitants in 2020 showed a decrease of 9.6 percent when compared with the 2019 rate. (See Tables 1 and 1A.)
- In 2020, the average dollar value of property stolen per reported robbery was \$1,834. Robberies accounted for an estimated \$447 million in losses. Banks experienced the highest average dollar loss at \$4,339 per offense. (Based on Tables 1 and 23.)
- Among the robberies for which the UCR Program received weapon information in 2019, strong-arm tactics were used in 42.6 percent, firearms in 37.3 percent, and knives or cutting instruments in 9.1 percent. Other dangerous weapons were used in 11.1 percent of robberies in 2020. (Based on Table 19.)

Expanded data

Expanded offense data are the details of the various offenses that the UCR Program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapon used in a crime, type or value of items stolen, and so forth. In addition, expanded data include trends (for example, 2-year comparisons) and rates per 100,000 inhabitants.

Expanded information regarding robbery is available in the following tables:

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Weapons: Tables 15, 19, and 21

Location Type, average value of items stolen by location per robbery: Table 23

Aggravated Assault

Definition

The FBI's Uniform Crime Reporting (UCR) Program defines aggravated assault as an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. The UCR Program further specifies that this type of assault is usually accompanied by the use of a weapon or by other means likely to produce death or great bodily harm. Attempted aggravated assault that involves the display of—or threat to use—a gun, knife, or other weapon is included in this crime category because serious personal injury would likely result if the assault were completed. When aggravated assault and larceny-theft occur together, the offense falls under the category of robbery.

Overview

- In 2020, there were an estimated 921,505 aggravated assaults in the nation. The estimated number of aggravated assaults increased 12.1 percent when compared with the 2019 estimate and increased 22.5 percent when compared with the 2011 estimate. (See Tables 1 and 1A.)
- The estimated rate of aggravated assaults in 2020 was 279.7 per 100,000 inhabitants. From 2011 to 2020, the rate of aggravated assaults increased 15.8 percent. (See Tables 1 and 1A.)
- Of the aggravated assault offenses for which law enforcement provided expanded data in 2020, 34.9 percent were committed with firearms. Personal weapons, such as hands, fists, or feet, were used in 20.2 percent of aggravated assaults, and knives or cutting instruments were used in 16.4 percent. Other weapons were used in 28.5 percent of aggravated assaults. (Based on Table 19.)

Expanded data

Expanded offense data are the details of the various offenses that the UCR Program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapon used in a crime, type or value of items stolen, and

so forth. In addition, expanded data include trends (for example, 2-year comparisons) and rates per 100,000 inhabitants.

Expanded information regarding aggravated assault is available in the following tables:

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Weapons: Tables 15, 19, and 22

Property Crime

Definition

In the FBI's Uniform Crime Reporting (UCR) Program, property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson. The object of the theft-type offenses is the taking of money or property, but there is no force or threat of force against the victims. The property crime category includes arson because the offense involves the destruction of property; however, arson victims may be subjected to force. Because of limited participation and varying collection procedures by local law enforcement agencies, only limited data are available for arson. Arson statistics are included in trend, clearance, and arrest tables throughout *Crime in the United States*, but they are not included in any estimated volume data. The arson section in this report provides more information on that offense.

Data collection

The data presented in *Crime in the United States* reflect the Hierarchy Rule, which requires that only the most serious offense in a multiple-offense criminal incident be counted. In descending order of severity, the violent crimes are murder and nonnegligent manslaughter, rape, robbery, and aggravated assault, followed by the property crimes of burglary, larceny-theft, and motor vehicle theft. Although arson is also a property crime, the Hierarchy Rule does not apply to the offense of arson. In cases in which arson occurs in conjunction with another violent or property crime, both crimes are reported.

Overview

- In 2020, there were an estimated 6,452,038 property crime offenses in the nation. The 2-year trend showed that property crime offenses declined 7.8 percent in 2020 when compared with the 2019 estimate. The 10-year trend showed that property crime offenses decreased 28.7 percent in 2020 when compared with the 2011 estimate. (See Tables 1 and 1A.)

- In 2020, the rate of property crime was estimated at 1,958.2 per 100,000 inhabitants, an 8.1 percent decrease when compared with the 2019 estimated rate. The 2020 property crime rate was 20.1 percent less than the 2016 estimate and 32.6 percent less than the 2011 estimate. (See Tables 1 and 1A.)
- Larceny-theft accounted for 71.4 percent of all property crimes in 2020. Burglary accounted for 16.0 percent, and motor vehicle theft for 12.6 percent. (Based on Table 1.)
- Property crimes in 2020 resulted in losses estimated at \$17.5 billion. (Based on Tables 1 and 23.)

Burglary

Definition

The FBI's Uniform Crime Reporting (UCR) Program defines burglary as the unlawful entry of a structure to commit a felony or theft. To classify an offense as a burglary, the use of force to gain entry need not have occurred. The UCR Program has three subclassifications for burglary: forcible entry, unlawful entry where no force is used, and attempted forcible entry. The UCR definition of "structure" includes an apartment, barn, house trailer, or houseboat when used as a permanent dwelling, office, railroad car (but not automobile), stable, or vessel (i.e., ship).

Overview

- In 2020, there were an estimated 1,035,314 burglaries, a decrease of 7.4 percent when compared with 2019 data. The number of burglaries decreased 31.7 percent when compared with 2016 data and was down 52.6 percent when compared with the 2011 estimate. (See Tables 1 and 1A.)
- Burglaries accounted for 16.0 percent of the estimated number of property crimes. (Based on Table 1.)
- By subcategory, 55.9 percent of burglaries involved forcible entry, 37.5 percent were unlawful entries, and 6.6 percent were attempted forcible entry. (Based on Table 19.)
- Victims of burglary offenses suffered an estimated \$2.8 billion in property losses in 2020. The average dollar loss per burglary offense was \$2,692. (Based on Tables 1 and 23.)
- Burglaries of residential properties accounted for 55.5 percent of all burglary offenses. (See Table 23.)

Expanded data

Expanded offense data are the details of the various offenses that the UCR Program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapon used in a crime, the type or value of items stolen, and so forth. In addition, expanded data include trends (for example, 2-year comparisons) and rates per 100,000 inhabitants.

Expanded information regarding burglary is available in the following tables:

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Offense Analysis: Tables 7 and 23

Larceny-theft

Definition

The FBI's Uniform Crime Reporting (UCR) Program defines larceny-theft as the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles, thefts of motor vehicle parts and accessories, shoplifting, pocket-picking, or the stealing of any property or article that is not taken by force, violence, or fraud. Attempted larcenies are included in offense totals. Embezzlement, confidence games, forgery, check fraud, etc., are excluded.

Overview

- In 2020, there were an estimated 4,606,324 larceny-thefts nationwide. The number of larceny-thefts declined 10.6 percent when compared with the 2019 estimate. The number decreased 18.4 percent when compared with the 2016 estimate, and it declined 25.1 percent when compared with the 2011 estimate. (See Table 1.)
- The rate of estimated larceny-thefts in 2020 was 1,398.0 per 100,000 inhabitants. From 2019 to 2020, the rate of estimated larceny-thefts declined 10.9 percent, and from 2011 to 2020, the rate decreased 29.2 percent. (See Tables 1 and 1A.)
- Larceny-thefts accounted for an estimated 71.4 percent of property crimes in 2020. (Based on Table 1.)
- The average value of property taken during larceny-thefts was \$1,482 per offense. When the average value is applied to the estimated number of larceny-thefts, the loss to victims nationally was an estimated \$6.8 billion. (Based on Tables 1 and 23.)
- Thefts from motor vehicles accounted for 27.5 percent of all larceny-thefts in 2020. (See Table 23.)

Expanded data

Expanded offense data are the details of the various offenses that the UCR Program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapon used in a crime, type or value of items stolen, and so forth. In addition, expanded data include trends (for example, 2-year comparisons) and rates per 100,000 inhabitants.

Expanded information regarding larceny-theft is available in the following tables:

Trends (2-year): Tables 12, 13, and 14

Rates (per 100,000 inhabitants): Tables 16, 17, and 18

Offense Analysis: Table 23

Larceny-theft Table, “Larceny-theft, Percent Distribution by Region, 2020”

Motor Vehicle Theft

Definition

In the FBI's Uniform Crime Reporting (UCR) Program, motor vehicle theft is defined as the theft or attempted theft of a motor vehicle. A motor vehicle is defined in the UCR Program as a self-propelled vehicle that runs on land surfaces and not on rails. Examples of motor vehicles include sport utility vehicles, automobiles, trucks, buses, motorcycles, motor scooters, all-terrain vehicles, and snowmobiles. Motor vehicle theft does not include farm equipment, bulldozers, airplanes, construction equipment, or watercraft such as motorboats, sailboats, houseboats, or jet skis. The taking of a motor vehicle for temporary use by persons having lawful access is excluded from this definition.

Overview

- There were an estimated 810,400 thefts of motor vehicles nationwide in 2020. The estimated rate of motor vehicle thefts was 246.0 per 100,000 inhabitants. (See Table 1.)
- The estimated number of motor vehicle thefts increased 11.8 percent in 2020 when compared with the 2019 estimates, rose 5.6 percent when compared with the 2016 estimates, and increased 13.1 percent when compared with the 2011 estimates. (See Table 1A.)
- More than \$7 billion (\$7.4) was lost nationwide to motor vehicle thefts in 2020. The average dollar loss per stolen vehicle was \$9,166. (Based on Tables 1 and 23.)
- In 2020, of all motor vehicles stolen, 74.0 percent were automobiles. (Based on Table 19.)

Expanded data

Expanded offense data are the details of the various offenses that the UCR Program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapon used in a crime, type or value of items stolen, and so forth. In addition, expanded data include trends (for example, 2-year comparisons) and rates per 100,000 inhabitants.

Expanded information regarding motor vehicle theft is available in the following tables:

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Vehicle Type: Tables 15 and 19

Motor Vehicle Theft Table, “Motor Vehicle Theft, Percent Distribution by Region, 2020”

Arson

Definition

The FBI's Uniform Crime Reporting (UCR) Program defines arson as any willful or malicious burning or attempting to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Data collection

Only the fires that investigation determined to have been willfully set are included in this arson data collection. Fires labeled as suspicious or of unknown origin are excluded from these data. Points to consider regarding arson statistics include:

- This data collection does not include any estimates for arson because the degree of reporting arson offenses varies from agency to agency. Because of this disparity in reporting, arson offenses are excluded from Tables 1-7, all of which contain offense estimations.
- Arson rates are calculated based upon data received from all law enforcement agencies that provide the UCR Program with data for 12 complete months and are presented in Arson Table 1.

The number of arsons reported by individual law enforcement agencies is available in Tables 8-11, arson trend data (indicating a year-to-year change) are in Tables 12-15, and arson clearance data (crimes solved) can be found in Arson Table 2 and Tables 25-28.

Overview

- In 2020, law enforcement agencies (providing from 1 to 12 months of arson data) reported 37,612 arsons. Participating agencies provided expanded offense data regarding 36,098 arsons. (Based on Tables 12 and 15.)
- More than 38 percent (38.5) of all arson offenses involved structures (e.g., residential, storage, public, etc.). Mobile property was involved in 24.3 percent of

arsons, and other types of property (such as crops, timber, fences, etc.) accounted for 37.2 percent of reported arsons. (Based on Table 15.)

- The average dollar loss per arson was \$30,537. (See Arson Table 2.)
- Arsons of community/public structures resulted in the highest average dollar losses (an average of \$433,164). (See Arson Table 2.)
- Arson offenses increased 23.0 percent in 2020 when compared with arson data reported in 2019. (See Table 12.)
- Nationwide, there were 12.8 arson offenses for every 100,000 inhabitants. (Based on Table 12.)

Expanded data

Expanded offense data are the details of the various offenses that the program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapons used in a crime, type or value of items stolen, and so forth. In addition, expanded data include trends (for example, 2-year comparisons) and rates per 100,000 inhabitants.

Expanded information regarding arson is available in the following tables:

Trends (2-year): Tables 12, 13, 14, and 15

Property types: Table 15

Arson Table 1, Arson Rate, by Population Group, 2020

Arson Table 2, Arson, by Type of Property, 2020

Expanded Offense Data

Definition

Expanded offense data are the details of the various offenses that the Uniform Crime Reporting Program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapon used in a crime, type or value of items stolen, and so forth. For example, expanded homicide data provide supplemental details about murders, such as the age, sex, race, and ethnicity of both the victim and the offender, the weapon used in the homicide, the circumstances surrounding the offense, and the relationship of the victim to the offender. In addition to these types of details, expanded data include trends (for example, 2-year comparisons) and crime rates per 100,000 inhabitants.

Data collection

Expanded offense data, including expanded homicide data, are details collected in addition to the reports of the number of crimes known. As a result, law enforcement agencies can report an offense without providing the supplemental information about that offense.

Expanded Homicide Data

Data collection

The FBI's Uniform Crime Reporting (UCR) Program collects supplementary homicide data that provide the age, sex, race, and ethnicity of the murder victim and offender; the type of weapon used; the relationship of the victim to the offender; and the circumstance surrounding the incident. Statistics gleaned from these supplemental data are provided in this section.

This section also includes information about justifiable homicide—certain willful killings that must be reported as justifiable or excusable. In the UCR Program, justifiable homicide is defined as and limited to:

- The killing of a felon by a peace officer in the line of duty.
- The killing of a felon, during the commission of a felony, by a private citizen.

Because these killings are determined through law enforcement investigation to be justifiable, they are tabulated separately from murder and nonnegligent manslaughter. Justifiable homicide information can be found in Expanded Homicide Data Table 14, “Justifiable Homicide, by Weapon, Law Enforcement, 2016–2020” and Expanded Homicide Data Table 15, “Justifiable Homicide, by Weapon, Private Citizen, 2016–2020.”

Overview

- In 2020, most (79.7 percent) of the 17,754 murder victims for whom supplemental data were received were male. (Based on Expanded Homicide Data Table 1.)
- Of the murder victims for whom race was known, 56.8 percent were Black or African American, 40.3 percent were White, and 2.8 percent were of other races. Race was unknown for 315 victims. (Based on Expanded Homicide Data Table 2.)

- Almost half (48.5 percent) of all murders for which the UCR Program received supplemental data were single victim/single offender situations. (See Expanded Homicide Data Table 4.)
- Of the offenders for whom gender was known, 88.2 percent were male. (Based on Expanded Homicide Data Table 3.)
- When the race of the offender was known, 56.6 percent were Black or African American, 40.6 percent were White, and 2.8 percent were of other races. The race was unknown for 6,592 offenders. (Based on Expanded Homicide Data Table 3.)
- More than 76 percent (76.7) of the homicides for which the FBI received weapons data in 2020 involved the use of firearms. (Based on Expanded Homicide Data Table 8.)
- In 2020, 26.5 percent of homicide victims were killed by someone they knew other than family members (acquaintance, neighbor, friend, boyfriend, etc.), 10.9 percent were slain by family members, and 10.0 percent were killed by strangers. The relationship between murder victims and offenders was unknown in 52.6 percent of murder and nonnegligent manslaughter incidents. (Based on Expanded Homicide Data Table 10.)
- Circumstances were known for 54.6 percent of murders for which supplementary details were reported in 2020. Of those, 42.9 percent of victims were murdered during arguments. Felony-type murders (i.e., murders that occurred in conjunction with the commission of another felony crime such as rape, robbery, burglary, etc.) accounted for 19.9 percent of homicides for which circumstances were known. (Based on Expanded Homicide Data Table 11.)
- Law enforcement reported 708 justifiable homicides in 2020. Of those, law enforcement officers justifiably killed 303 felons, and private citizens justifiably killed 405 offenders during the commission of crimes. (See Expanded Homicide Data Tables 14 and 15.)

Expanded homicide data tables

The following tables were compiled using information from the Supplementary Homicide Data:

Expanded Homicide Data Table 1—“Murder Victims by Race, Ethnicity, and Sex, 2020”

Expanded Homicide Data Table 2—“Murder Victims by Age, Sex, Race, and Ethnicity, 2020”

Expanded Homicide Data Table 3—“Murder Offenders by Age, Sex, Race, and Ethnicity, 2020”

Expanded Homicide Data Table 4—“Murder, by Victim/Offender Situations, 2020”

Expanded Homicide Data Table 5—“Murder, Age of Victim by Age of Offender, 2020 [Single victim/single offender]”

Expanded Homicide Data Table 6—“Murder, Race, Ethnicity, and Sex of Victim by Race, Ethnicity, and Sex of Offender, 2020 [Single victim/single offender]”

Expanded Homicide Data Table 7—“Murder, Types of Weapons Used, Percent Distribution by Region, 2020”

Expanded Homicide Data Table 8—“Murder Victims by Weapon, 2016–2020”
