

Methodology

UCR Programs gather crime information from the law enforcement agencies under their domain and forward the data to the FBI. All fifty states in the nation have their own UCR Programs that streamline the collection of UCR data from local law enforcement agencies, ensure consistency and comparability of data, and provide a higher quality of service to the law enforcement community. Establishment of a UCR Program is not limited to state governments. Territorial, tribal, and federal agencies may also institute UCR Programs.

On January 1, 2021, the FBI's Uniform Crime Reporting (UCR) Program transitioned to a National Incident-Based Reporting System (NIBRS) only data collection. Since the transition, the FBI's UCR Program has worked diligently to offer resources such as programming and technical support, training, and outreach to law enforcement agencies. Despite more than 11,500 law enforcement agencies submitting NIBRS data, participation for 2021 remained below a statistically acceptable level to be nationally representative. To mitigate risks associated with low participation due to the NIBRS transition, the UCR Program published a limited release of the traditional *CIUS, 2021*, along with a trend study comparing 2020 and 2021 crime data using a selection of the new NIBRS estimation data.

The limited *CIUS, 2021*, data release included the traditional tables 8-11 (agency level data by state), 20 (homicide by weapon by state), 21 (robbery by weapon by state), 22 (aggravated assault by weapon by state), and 69 (arrest by state), on the CDE. All tables that represented a national view or presented a trending view of 2021 versus previous years were eliminated. The decreased participation for the 2021 data release can cause a misinterpretation of reported crime data, and an incorrect understanding of national crime trends. For the 2022 data year, to provide nationally representative data, the FBI accepted Summary Reporting System data submissions from non-transitioned agencies.

Criteria for UCR Programs

The following are the standards under which a UCR Program must operate:

1. A UCR Program must conform to the FBI's UCR Program submission standards, definitions, specifications, and required deadlines.

2. A UCR Program must establish data integrity procedures and have personnel assigned to assist contributing agencies in quality assurance practices and crime reporting procedures. Data integrity procedures should include crime trend assessments, offense classification verification, and technical specification validation.
3. A UCR Program's submissions must cover more than 50 percent of the law enforcement agencies within its established reporting domain and be willing to cover any and all UCR-contributing agencies that wish to use the UCR Program from within its domain. (An agency wishing to become a UCR Program must be willing to report for all of the agencies within the state.)
4. A UCR Program must furnish the FBI's UCR Program with all of the UCR data collected by the law enforcement agencies within its domain.

These requirements do not prohibit the state from gathering other statistical data beyond the national collection.

Data completeness and quality

In order to fulfill its responsibilities in connection with the UCR Program, the FBI edits and reviews individual agency data for both completeness and quality. Members of the national program's staff contact state UCR Programs in connection with crime-reporting matters and, as necessary, when approved by the state, individual contributors. Upon request, staff members conduct training programs within the state on law enforcement record-keeping and crime-reporting procedures. Following audit standards established by the federal government, the FBI conducts an audit of each state's UCR data collection procedures once every 3 years. Should circumstances develop whereby a state program does not comply with the aforementioned requirements, the national program may institute a direct collection of data from law enforcement agencies within that state.

NIBRS reporting and conversion

All fifty state programs are certified to provide their UCR data in the expanded NIBRS format. For presentation in this publication, the NIBRS data were converted to the historical SRS data. The UCR Program staff constructed the NIBRS database to allow for such conversion so that UCR's long-running time series could continue.

Editing procedures

The UCR Program thoroughly examines agency data for deviations in crime data from month to month and from present to past years' data that may indicate errors. UCR staff members compare aggregated data from agencies of similar population size to identify any unusual fluctuations in an agency's crime counts. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in the jurisdiction's geopolitical structure.

Evaluation of trends—Data reliability is a high priority of the FBI, which brings any deviations or arithmetical adjustments to the attention of state UCR Programs or the submitting agencies. Typically, FBI staff members study the monthly reports to evaluate periodic trends prepared for individual reporting units. Any significant increase or decrease becomes the subject of a special inquiry. Changes in crime reporting procedures or annexations that affect an agency's jurisdiction can influence the level of reported crime. When this occurs, the FBI excludes the figures for specific crime categories or totals, if necessary, from the trend tabulations.

Training for contributors—In addition to the evaluation of trends, the FBI provides training seminars and instructional materials on crime reporting procedures to assist contributors in complying with UCR standards. Throughout the country, the national program maintains liaison with state UCR Programs and law enforcement personnel and holds training sessions to explain the purpose of the program, the rules of uniform classification and scoring, and the methods of assembling the information for reporting. When an individual agency has specific problems in compiling its crime statistics and its remedial efforts are unsuccessful, personnel from the FBI's Criminal Justice Information Services Division may visit the contributor to aid in resolving the difficulties.

Population estimation

For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.

Population totals for 2010 are from the U.S. Census Bureau's decennial population counts.

Crime trends

By showing fluctuations from year to year, trend statistics offer the data user an added perspective from which to study crime. Percent change tabulations in this publication are computed only for reporting agencies that provided comparable data for the periods under consideration. The FBI excludes from the trend calculations all figures except those received for common months from

common agencies. Also excluded are unusual fluctuations of data that the FBI determines are the result of such variables as improved records procedures, annexations, etc.

Publication Annotation

Narrative portions of this publication present percentage breakdowns for various facets of tabular data. Where percentage breakdowns are used, percentages may not add to 100.0 percent due to rounding.

Caution to users

Data users should exercise care in making any direct comparison between data in this publication and those in prior issues of *Crime in the United States*. Because of differing levels of participation from year to year and reporting problems that require the FBI to estimate crime counts for certain contributors, some data may not be comparable from year to year. In addition, this publication may contain updates to data provided in prior years' publications.

Offense Estimation

Tables 1 through 5 and Table 7 of this publication contain statistics for the entire United States. Because not all law enforcement agencies provide data for complete reporting periods, the FBI includes estimated crime numbers in these national presentations. The FBI estimates data for three areas: Metropolitan Statistical Areas (MSAs), cities outside MSAs, and nonmetropolitan counties. The FBI computes estimates for participating agencies not providing 12 months of complete offense data. For agencies supplying 3 to 11 months of offense data, the national UCR Program estimates for the missing data by following a standard estimation procedure using the data provided by the agency. If an agency has supplied less than 3 months of data, the FBI computes estimates by using the known crime figures of similar areas within a state and assigning the same proportion of crime volumes to nonreporting agencies. The estimation process considers the following: population size covered by the agency; type of jurisdiction, e.g., police department versus sheriff's office; and geographic location.

Estimation Notes:

For the 2021 collection year, the FBI's UCR Program transitioned from the traditional Summary Reporting System to the more comprehensive National Incident-Based Reporting System. A significant number of agencies were unable to complete the transition to NIBRS in 2021. Due to the lower volume of participation, the FBI was unable to produce the traditional national estimates for that year. Because SRS data was not directly collected by the FBI, in order to compile estimates for 2021, the FBI has since gathered a sampling of 2021 SRS data to augment the information collected via NIBRS and compile reliable estimates.

For the 2022 collection year, the FBI resumed collecting SRS data from agencies that had not yet transitioned to NIBRS to supplement the 2022 NIBRS data collection. The FBI will assess the level of NIBRS transition yearly and continue to accept SRS data until it is no longer needed.

Estimation of state-level data

In response to various circumstances, the FBI calculates estimated offense totals for certain states. For example, some states do not provide rape figures in accordance with UCR guidelines. In addition, problems at the state level have, at times, resulted in no useable data. Also, the efforts to convert to NIBRS have contributed to the need for unique estimation procedures. A summary of state-specific and offense-specific estimation procedures follows.

State	Year(s)	Reason for Estimation	Estimation Method
Illinois	2003 2004 2005 2006 2007 2008 2009	The state UCR Program was unable to provide complete offense figures in accordance with UCR guidelines.	Valid violent crime and property crime offense counts, with the exception of forcible rape, were available for most of the largest cities (100,000 and over in population). For other agencies, the only available counts generated by the Illinois state UCR Program were state totals based upon an incident-level system without indication of multiple offenses recorded within single incidents. Therefore, the UCR Hierarchy Rule could not be applied in order to convert the state’s data to SRS data. (The Hierarchy Rule requires that only the most serious offense in a multiple-offense criminal incident is counted.) To arrive at a comparable state estimate to be included in national compilations, the Illinois state UCR Program’s state totals (which were inflated because of the nonapplication of the Hierarchy Rule) were reduced by the proportion of multiple offenses reported within single incidents in the NIBRS database. Valid totals for the large cities were excluded from the reduction process.

	2006 2007 2008 2009	The state UCR Program was unable to provide forcible rape figures in accordance with UCR guidelines.	Forcible rape figures for Rockford include only the forcible rape offenses with female victims that were extracted from the agency's NIBRS data. To derive the state forcible rape estimate, the percentage of female forcible rape victims was extracted from all NIBRS incidents in which a forcible sex offense was reported. That percentage was applied to the forcible rape count received from the Illinois state UCR Program.
Kentucky	2003	The state UCR Program was unable to provide complete offense figures in accordance with UCR guidelines.	2003—To obtain the 2003 estimates, the 2003 crime trends for the East South Central Division were applied to adjusted 2002 state estimates. The 2002 state counts were reestimated by applying the 2002 crime trends for the East South Central Division using more current figures, 2001 totals provided by the state UCR Program. The adjusted 2002 estimates differ from the figures published in the 2002 edition of <i>Crime in the United States</i> which were originally estimated using 2001 totals.
Minnesota	2005 2006 2007 2008 2009 2010 2011 2012	The state UCR Program was unable to provide forcible rape figures in accordance with UCR guidelines.	2005—To arrive at a comparable state estimate for forcible rape offenses to be included in national compilations, Minnesota's forcible rape total was estimated by using the national rates per 100,000 inhabitants within the eight population groups and proportionally assigning forcible rape volumes to Minnesota's population groups. 2006-2012—Valid forcible rape figures were available for Minneapolis and St. Paul. To arrive at a comparable state estimate for forcible rape offenses to be included in national compilations, the rest of Minnesota's forcible rape totals were estimated by using the national rates per 100,000 inhabitants within the eight population groups and proportionally assigning forcible rape volumes to Minnesota's population groups.

2022 arrest data considerations

Limited data for 2022 were available for Florida, Illinois, Maryland, and Pennsylvania.

For 2022, only arrest totals (with no age or gender breakdowns) are available for Florida agencies that reported via the Summary Reporting System. Therefore, Florida arrest totals are included in only in Table 69, “Arrests by State, 2022” for those agencies. Arrest data reported by NIBRS submitting agencies are included in all arrest tables except for the 2, 5, and 10-year arrest trend tables.

No 2022 arrest data were received from the New York City Police Department. However, arrest totals for this agency were estimated by the national UCR Program and were included in Table 29 “Estimated Number of Arrests, United States, 2022.”

Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in National Incident Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

Table methodology

The tables in this report are based upon varying levels of data submissions. For example, some participating agencies may submit data for some but not all months of the reporting year. Using well-established procedures, the FBI estimates for missing offense data for agencies with partial reports and for nonreporting agencies and then aggregates these estimates with data reported to determine the number of offenses for each state and the nation. Tables 1–5, 7, and 29 present these approximations. In addition, various circumstances require the FBI to estimate offense totals from time to time for some states.

To be included in Tables 8–11 and 21 and 22, which provide statistics for specific jurisdictions and states, agencies must submit 12 months of complete data prior to the FBI’s established deadlines. To be included in Table 20, agencies must submit supplementary homicide data. Tables 12–19, 23–28, 30–75, and 77 provide the number of reporting agencies (data source) and the total population covered by their collective jurisdictions. To be included in Tables 78–81, agencies must submit officer and civilian law enforcement employee counts as of October 31. For information on the classification of jurisdictions, see *Area Definitions*.

The tabular presentation that follows briefly describes the data sources and the methods used to construct Tables 1–81.

(1) Table	(2) Database	(3) Table Construction	(4) General Comments
1	<p>The data used in creating the estimates for these tables were from all law enforcement agencies participating in the UCR Program (including those submitting less than 12 months of data).</p> <p>Crime statistics for the nation include estimated offense totals (except arson) for agencies submitting less than 12 months of offense reports for each year.</p>	<p>These tables provide the estimated number and rate (per 100,000 inhabitants) of reported crimes in the United States for 2003 through 2022, as well as the 2-, 5-, and 10-year trends for 2022 based on these estimates.</p> <p>This table contains estimates based on both the legacy and revised definitions of rape.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	<p>The UCR Program does not have sufficient data to estimate for arson.</p> <p>The crime figures for 2021 have been adjusted from the prior year's publication.</p> <p>In 2013, the FBI's UCR Program initiated the collection of rape data under a revised definition within the Summary Based Reporting System. The term "forcible" was removed from the offense name, and the definition was changed to "penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim." In 2016, the FBI Director approved the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017.</p>

<p>2</p>	<p>The data used in creating the estimates for this table were from all law enforcement agencies participating in the UCR Program (including those submitting less than 12 months of data).</p> <p>Crime statistics for the nation and for community types include estimated offense totals (except arson) for agencies submitting less than 12 months of offense reports for each year.</p>	<p>This table provides estimated crime statistics for the nation, Metropolitan Statistical Areas (MSAs), cities outside metropolitan areas, and nonmetropolitan counties; the rate (per 100,000 inhabitants) for each grouping; and their estimated populations. For MSAs, cities outside metropolitan areas, and nonmetropolitan counties, the table also includes crime statistics by area actually reporting.</p> <p>The statistics under the heading “Area actually reporting” represent offense totals for agencies submitting 12 months of data and estimated totals for agencies submitting less than 12 but more than 2 months of data.</p> <p>The statistics under the heading “Estimated total” represent the totals under “Area actually reporting” plus estimated totals for agencies submitting 2 months or less of data.</p> <p>The FBI derives national statistics for community types by using the community type estimates for individual states as shown in Table 5.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency’s rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency’s 2022 population estimate.</p>	<p>The UCR Program does not have sufficient data to estimate for arson.</p> <p>In 2013, the FBI’s UCR Program initiated the collection of rape data under a revised definition within the Summary Based Reporting System. In 2016, the FBI Director approved the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017.</p>

8	<p>The data used in creating this table were from all city and town law enforcement agencies submitting 12 months of complete offense data for 2022.</p>	<p>This table provides the volume of violent crime (murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) and property crime (burglary, larceny-theft, and motor vehicle theft) as reported by city and town law enforcement agencies (listed alphabetically by state) that contributed data to the UCR Program. (Note: Arson is not included in the property crime total in this table; however, if complete arson data were provided, they will appear in the arson column.)</p> <p>The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	<p>Readers should take into consideration relevant factors in addition to the areas' crime statistics when making any valid comparisons of crime among different locales. <i>UCR Statistics: Their Proper Use</i> provides more details concerning the proper use of UCR statistics.</p>
9	<p>The data used in creating this table were from all university/college law enforcement agencies submitting 12 months of complete offense data for 2022.</p>	<p>This table provides the volume of violent crime (murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) and property crime (burglary, larceny-theft, and motor vehicle theft) as reported by university/college law enforcement agencies (listed alphabetically by state) that contributed data to the UCR Program. (Note: Arson is not included in the property crime total in this table;</p>	<p>Readers should take into consideration relevant factors in addition to the areas' crime statistics when making any valid comparisons of crime among different locales. <i>UCR Statistics: Their Proper Use</i> provides more</p>

		<p>however, if complete arson data were provided, they will appear in the arson column.)</p> <p>The student enrollment figures provided by the U.S. Department of Education are for 2021, the most recent available. They include full- and part-time students.</p> <p>The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.</p>	<p>details concerning the proper use of UCR statistics.</p>
10	<p>The data used in creating this table were from all county law enforcement agencies submitting 12 months of complete offense data for 2022.</p>	<p>This table provides the volume of violent crime (murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) and property crime (burglary, larceny-theft, and motor vehicle theft) as reported by law enforcement agencies (such as individual sheriffs' offices and/or county police departments) in metropolitan counties and nonmetropolitan counties (listed alphabetically by state) that contributed data to the UCR Program. (Note: Arson is not included in the property crime total in this table; however, if complete arson data were provided, they will appear in the arson column.)</p> <p>The Metropolitan Counties classification encompasses jurisdictions covered by noncity law enforcement agencies located within currently designated Metropolitan Statistical Areas (MSAs). The Nonmetropolitan Counties classification encompasses jurisdictions covered by noncity agencies located outside currently designated MSAs.</p>	<p>These data do not represent county totals because they exclude crime counts for city agencies and other types of agencies that have jurisdiction within each county.</p> <p>Readers should take into consideration relevant factors in addition to the areas' crime statistics when making any valid comparisons of crime among different locales. <i>UCR Statistics: Their Proper Use</i> provides more details concerning the proper use of UCR statistics.</p>

		The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.	
11	The data used in creating this table were from all state, tribal, and other law enforcement agencies submitting 12 months of complete offense data for 2022.	<p>This table provides the volume of violent crime (murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) and property crime (burglary, larceny-theft, and motor vehicle theft) as reported by state, tribal, and other law enforcement agencies (listed alphabetically by state) that contributed data to the UCR Program. (Note: Arson is not included in the property crime total in this table; however, if complete arson data were provided, they will appear in the arson column.)</p> <p>The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.</p>	<p>These data represent reported crime from individual state or territorial law enforcement agencies (i.e., state police, highway patrol, tribal, and/or other law enforcement agencies managed by the state or territory) participating in the UCR Program.</p> <p>Readers should take into consideration relevant factors in addition to the areas' crime statistics when making any valid comparisons of crime among different locales. <i>UCR Statistics: Their Proper Use</i> provides more details concerning the proper use of UCR statistics.</p>
12–15	The data used in creating these tables were from all law enforcement agencies submitting at least 6 common months of complete offense	<p>These 2-year trend tables provide the number of offenses for 2021 and 2022 and the percent change between these 2 years.</p> <p>In calculating trends, the UCR Program includes only common reported months for individual agencies.</p>	

	<p>reports for 2021 and 2022.</p>	<p>On January 1, 2021, the FBI's UCR) Program transitioned to a NIBRS only data collection. Despite more than 11,500 law enforcement agencies submitting NIBRS data, participation for 2021 remained below a statistically acceptable level to be nationally representative. The lower participation in 2021 resulted in lowering the number of agencies meeting the threshold to be included in Tables 12-15 in 2022. Population coverage for these tables is approximately 69%. This level of population coverage remains below a statistically acceptable level for national representation and risks potential bias in the available trends.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	
<p>16–19</p>	<p>The data used in creating these tables were from all law enforcement agencies submitting 12 months of complete data (except arson, which is not included in these tables) for 2022.</p>	<p>These tables provide the rate per 100,000 inhabitants and the number of offenses known to law enforcement for violent crime (murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) and property crime (burglary, larceny-theft, and motor vehicle theft) for law enforcement agencies submitting 12 months of complete data (except arson) for 2022. In addition, these tables furnish the number of agencies meeting the criteria for inclusion in these</p>	

		<p>tables and provide the estimated population for each population group.</p> <p>The FBI derived the offense rates by first dividing the total aggregated offense counts by the aggregated populations covered by contributing agencies for which 12 months of complete data were supplied and then multiplying the resulting figure by 100,000.</p> <p>The suburban and nonsuburban cities classifications in Table 17 encompass all cities other than principal cities served by municipal law enforcement agencies in MSAs.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	
20	<p>The data used in creating this table were from all law enforcement agencies that submitted supplementary homicide data for 2022.</p>	<p>This table provides the type of weapons used in murder offenses. The data are based on the aggregated data from agencies within each state for which supplementary homicide data (e.g., weapon information) were reported to the FBI. The table also includes a breakdown of the types of firearms used in murders (i.e., handguns, rifles, shotguns, or firearms [type unknown]).</p>	<p>The FBI received limited supplementary homicide data from the Florida, Illinois, Maryland, and Pennsylvania state UCR Programs.</p> <p>NIBRS homicide data were included in this table for Florida. The SRS supplementary homicide data submitted by the</p>

		<p>The weapon totals are aggregated from all murders for which the FBI received supplemental homicide data for calendar year 2022.</p>	<p>Florida state UCR Program did not meet UCR guidelines and were not included.</p>
21, 22	<p>The data used in creating these tables were from all law enforcement agencies that submitted complete offense reports for 12 months in 2022.</p>	<p>These tables provide the type of weapons used in robberies (Table 21) and aggravated assaults (Table 22). The tables include the number of agencies that submitted data by state and the population covered by those agencies.</p> <p>The weapon totals are aggregated from all robberies and aggravated assaults for which the FBI received weapon breakdowns.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	<p>The FBI received limited data from the Florida, Illinois, Maryland, and Pennsylvania state UCR Programs.</p>

<p>23, 24</p>	<p>The data used in creating these tables were from all law enforcement agencies submitting at least 6 months of complete property/circumstance data for 2022.</p>	<p>The FBI derives trends by comparing statistics from agencies with at least 6 common months of complete data reports for 2021 and 2022.</p> <p>Table 23 provides an analysis of the crimes of murder, rape, robbery, burglary, larceny-theft, and motor vehicle theft. The table also lists the number of these offenses reported in 2022 and the percentage change in the number of these offenses when compared with 2021 data.</p> <p>Due to technical system changes and data quality issues, some average values may be inflated in Table 23.</p> <p>Due to technical system changes and data quality issues, some property stolen and recovered data may be inflated in Table 24.</p> <p>The offense of aggravated assault is not included in Table 23. In the UCR Program, the taking of money or property in connection with an assault is reported as robbery.</p> <p>The percent distribution statistics are based on the offense totals for the crimes of robbery, burglary, and larceny-theft.</p> <p>Table 24 provides property types, the reported value of stolen property, and the value of recovered property. This table also lists the percentage of recovered value of each property type.</p>	<p>The FBI presents offense totals for the crimes of murder and rape, and then, based on supplemental data supplied by law enforcement, the FBI computes average value lost totals for the crimes of robbery, burglary, larceny-theft, and motor vehicle theft.</p> <p>The data source from which the FBI derives the information for this table does not include arson.</p> <p>Information regarding the average value of property damage due to arson can be found in Arson Table 2.</p>
---------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

		<p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	
25–28	<p>The data used in creating these tables were from all law enforcement agencies submitting at least 6 months of complete offense reports for 2022.</p>	<p>These tables provide the number of violent crimes, property crimes, and arsons with a breakdown of the offenses known to law enforcement and the percentage of those offenses that were cleared by arrest or exceptional means.</p> <p>Not all agencies submit data reports for arson to the FBI. Therefore, the agency counts and estimated population presented in this table do not represent participation for the reporting of arson.</p> <p>The FBI bases percent cleared statistics on aggregated offense and clearance totals.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	<p>The following information pertains only to Table 28:</p> <ul style="list-style-type: none"> • When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program considers the incident to be cleared by arrest, even though a physical arrest may not have occurred. • Clearances for offenses that include both adult and juvenile offenders are classified as clearances for crimes committed by adults and are, therefore, not included in this table.

			<ul style="list-style-type: none"> Because the clearance percentages for crimes committed by juveniles include only those clearances in which no adults were involved, the figures in this table should not be used to present a definitive picture of juvenile involvement in crime.
29	<p>The data used in creating the estimates for this table were from all law enforcement agencies submitting 12 months of arrest data for 2022.</p>	<p>This table provides the estimated number of persons arrested in the United States in 2022.</p> <p>The arrest totals presented are national estimates based on the arrest statistics of all law enforcement agencies submitting 12 months of arrest data to the UCR Program.</p> <p>The estimated total number of arrests in this table is the sum of estimated arrest volumes for 27 offenses, not including suspicion.</p> <p>The arrest data for each of the individual offenses in this table is the sum of the estimated volume of arrests for that offense within each of the eight population groups. (See <i>Area Definitions</i>.)</p> <p>The FBI calculated each of the eight population group’s arrest estimates by dividing the reported 12-month volume figures (as shown in Table 31) by the</p>	

		contributing agencies' jurisdictional populations. The resulting figure was then multiplied by the total population for each population group as estimated by the UCR Program.	
30, 31	The data used in creating these tables were from all law enforcement agencies submitting 12 months of arrest data for 2022.	<p>These tables provide the number of persons arrested and the arrest rate per 100,000 inhabitants for the four regions of the United States (Table 30), the eight UCR population groups (Table 31), and the nation as a whole (both tables) in 2022.</p> <p>The FBI derived the arrest rates by first dividing the total number of arrests by the aggregated populations covered by contributing agencies and then multiplying the resulting figure by 100,000.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.
32, 33	The data used in creating these tables were from all law enforcement agencies submitting 12 months of arrest data for both 2013 and 2022.	These 10-year trend tables provide the number of persons arrested in 2013 and 2022 and the percent change when the data for these 2 years are compared. Table 32 furnishes a breakdown of these data by juveniles (persons under age 18) and adults. Table 33 furnishes a breakdown of these data by juveniles and adults.	These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some

		<p>The 2013 rape figures are based on the legacy definition. The 2022 rape figures are aggregate totals based on the legacy and revised definitions. For this reason, a percent change is not provided.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency’s rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency’s 2022 population estimate.</p> <p>For the 2013 population estimates used in this table, the FBI calculated 2013 state growth rates using the U.S. Census Bureau’s 2010 decennial state/national population figures and 2013 provisional state/national population estimates. The FBI then estimated population figures for city jurisdictions by applying the 2013 state growth rate to the 2010 U.S. Census Bureau data.</p>	<p>cases, represent multiple arrests of the same person.</p> <p>In 2013, the FBI’s UCR Program initiated the collection of rape data under a revised definition within the Summary Based Reporting System. The term “forcible” was removed from the offense name, and the definition was changed to “penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.” In 2016, the FBI Director approved the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017.</p>
34, 35	<p>The data used in creating these tables were from all law enforcement agencies submitting 12 months of arrest data for both 2018 and 2022.</p>	<p>These 5-year trend tables provide the number of persons arrested in 2018 and 2022 and the percent change when the data for these 2 years are compared. Table 34 furnishes a breakdown of these data by juveniles (persons under age 18) and adults. Table 35 furnishes a breakdown of these data by gender for juveniles.</p>	<p>These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, statistics in this table could, in some cases, represent multiple arrests of the same person.</p>

		<p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p> <p>For the 2018 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2010 decennial population counts and 2011 through 2017 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2017 Census population estimate to derive the agency's 2018 population estimate.</p>	
36, 37	The data used in creating these tables were from all law enforcement agencies submitting 12 months of arrest data for both 2021 and 2022.	<p>These 2-year trend tables provide the number of persons arrested in 2021 and 2022 and the percent change when the data for these 2 years are compared. Table 36 furnishes a breakdown of these data by juveniles (persons under age 18) and adults. Table 37 furnishes a breakdown of these data by gender for juveniles.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were</p>	These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.

		<p>averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p> <p>For the 2021 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2010 decennial population counts and 2011 through 2020 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2020 Census population estimate to derive the agency's 2021 population estimate.</p>	
38-43	<p>The data used in creating these tables were from all law enforcement agencies submitting 12 months of arrest data for 2022.</p>	<p>These tables provide the number of persons arrested nationwide in 2022 for the offenses for which the UCR Program collects arrest data. Tables 38-40 provide these data broken down by the age of the arrestee and include the percent distribution of arrests by offense type. Table 41 furnishes the data within the following age groups: Under 15, Under 18, Under 21, and Under 25 years. Table 42 supplies breakdowns of these data for each offense and supplies a percent distribution of males and females arrested among all offense types. Table 43 provides the data by the race and ethnicity of the arrestee and the percent distribution of arrests by race for each offense.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were</p>	<p>These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.</p> <p>Table 39 provides these data for males only and Table 40 provides the data for females only.</p> <p>The totals provided in Table 43 reflect only those persons arrested by law enforcement agencies that provided race information to the UCR</p>

		<p>averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	<p>Program; therefore, the totals may not match those shown in other arrest tables for the nation.</p> <p>In Table 43, the ethnicity totals are representative of those agencies that provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not be equal.</p>
44, 45	<p>The data used in creating these tables were from all city law enforcement agencies submitting 12 months of arrest data for both 2021 and 2022.</p>	<p>These 2-year trend tables provide the number of persons arrested in cities in 2021 and 2022 and the percent change when the data for these 2 years are compared. Table 44 furnishes a breakdown of these data by juveniles (persons under age 18) and adults. Table 45 furnishes a breakdown of these data by gender for juveniles.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p> <p>For the 2021 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using</p>	<p>These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in these tables could, in some cases, represent multiple arrests of the same person.</p>

		2010 decennial population counts and 2011 through 2020 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2020 Census population estimate to derive the agency's 2021 population estimate.	
46–49	The data used in creating these tables were from all city law enforcement agencies submitting 12 months of arrest data for 2022.	<p>These tables provide the number of persons arrested in cities in 2022 for the offenses for which the UCR Program collects arrest data. Table 46 provides these data broken down by the age of the arrestee and includes the percent distribution of arrests by offense type. Table 47 furnishes the data within the following age groups: Under 15, Under 18, Under 21, and Under 25 years. Table 48 supplies breakdowns of these data for each offense and supplies a percent distribution of males and females arrested among all offense types. Table 49 provides the data by the race and ethnicity of the arrestee and the percent distribution of arrests by race for each offense.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	<p>These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.</p> <p>The totals provided in Table 49 reflect only those persons arrested by law enforcement agencies that provided race information to the UCR Program; therefore, the totals may not match those shown in other arrest tables for cities. Not all agencies that provide race data provide ethnicity data; therefore, numbers will not match.</p>
50, 51	The data used in creating these tables were from all	These 2-year trend tables provide the number of persons arrested in metropolitan counties in 2021 and	These data represent the number of persons arrested;

	<p>metropolitan county law enforcement agencies submitting 12 months of arrest data for both 2021 and 2022.</p>	<p>2022 and the percent change when the data for these 2 years are compared. Table 50 furnishes a breakdown of these data by juveniles (persons under age 18) and adults. Table 51 furnishes a breakdown of these data by gender for juveniles.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each</p>	<p>These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.</p>

		agency's rates of growth were averaged; that average was then applied and added to its 2020 Census population estimate to derive the agency's 2021 population estimate.	
58–61	The data used in creating these tables were from all nonmetropolitan county law enforcement agencies submitting 12 months of arrest data for 2022.	<p>These tables provide the number of persons arrested in nonmetropolitan counties in 2022 for the offenses for which the UCR Program collects arrest data. Table 58 supplies these data broken down by age of the arrestee and includes the percent distribution of arrests by offense type. Table 59 furnishes the number arrested within the following age groups: Under 15, Under 18, Under 21, and Under 25 years. Table 60 provides breakdowns of these data for each offense and supplies a percent distribution of males and females arrested among all offense types. Table 61 furnishes the data broken down by race and ethnicity of the arrestee and the percent distribution of arrests by race for each offense.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	<p>These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.</p> <p>The totals provided in Table 61 reflect only those persons arrested by law enforcement agencies that provided race and ethnicity information to the UCR Program; therefore, the totals may not match those shown in other arrest tables for nonmetropolitan counties.</p>
62, 63	The data used in creating these tables were from all suburban area law enforcement agencies	These 2-year trend tables provide the number of persons arrested in suburban areas for 2021 and 2022 and the percent change when the data for these 2 years are compared. Table 62 furnishes a breakdown of	These data represent the number of persons arrested; however, some persons may be arrested more than once during

	<p>submitting 12 months of arrest data for both 2021 and 2022.</p>	<p>these data by juveniles (persons under age 18) and adults. Table 63 furnishes a breakdown of those data by gender for juveniles.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p> <p>For the 2021 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2010 decennial population counts and 2011 through 2020 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2020 Census population estimate to derive the agency's 2021 population estimate.</p>	<p>a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.</p>
64–67	<p>The data used in creating these tables were from all suburban area law enforcement agencies submitting 12 months of arrest data for 2022.</p>	<p>These tables provide the number of arrests in suburban areas in 2022 for the offenses for which the UCR Program collects arrest data. The data included in Table 64 are broken down by age of the arrestee and include the percent distribution of arrests by offense type. Table 65 provides the number arrested within the following age groups: Under 15, Under 18, Under 21, and Under 25 years. Table 66 furnishes breakdowns for each offense and supplies a percent distribution of males and females arrested among all</p>	<p>These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.</p>

		<p>offense types. Table 67 furnishes the data broken down by race and ethnicity of the arrestee. In addition, the table shows the percent distribution of arrests by race for each offense.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	<p>The totals provided in Table 67 reflect only those persons arrested by law enforcement agencies that provided race and ethnicity information to the UCR Program; therefore, the totals may not match those shown in other arrest tables for suburban areas.</p>
68	<p>The data used in creating this table were from all law enforcement agencies submitting 12 months of arrest data for 2022 and providing juvenile disposition information.</p>	<p>The totals in this table represent the reported number of juvenile offenders taken into custody, aggregated by population group. In addition, this table provides the number of juveniles handled within six different disposition categories. The percent distribution within these categories for each population group is also included.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	<p>These data represent the reported number of juvenile offenders taken into custody; however, some juveniles may be taken into custody more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple detentions of the same person.</p> <p>In constructing this table, the FBI accepted each individual state's age definition for juveniles.</p>

69	<p>The data used in creating this table were from all law enforcement agencies that submitted 12 months of arrest data for 2022.</p>	<p>This table provides arrest data for the offenses for which the UCR Program collects data and is broken down by state for 2022. The table provides both total arrests and arrests of juveniles (persons under the age of 18).</p> <p>Arrest totals are aggregates of the totals reported by agencies providing data to the UCR Program within each state.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	<p>These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.</p> <p>Any comparison of statistics in this table should take into consideration variances in arrest practices, particularly for Part II crimes. (<i>Offenses in Uniform Crime Reporting</i> defines the UCR Program's Part II offenses.)</p>

Methodologies Explain Potential Differences in UCR Data

The Uniform Crime Reporting (UCR) Program is in the process of migrating its data releases from static web publications hosted on www.fbi.gov to more dynamic, multi-year displays of data on the Crime Data Explorer (CDE). Just as the data in the tables of the annual publications sometimes differ from those available in the master files for the same year, the data in the publication tables may also differ from those released on the Explorer Pages of the CDE. These variations are due to the difference in methodologies between the publication tables and data displayed on the CDE.

Historically, the agency, state, regional, and national data in Crime in the United States, Hate Crime Statistics, and Law Enforcement Officers Killed and Assaulted must pass internal data quality reviews prior to publication. According to the methodology, data that do not meet established criteria are not included in the publication tables. Individuals who typically use data from tables in Crime in the United States and other UCR web publications on www.fbi.gov will continue to have access to that format via the downloadable publication tables for 2020 and prior years.

As is the case with all the data files released for 1960 through 2020, the data displayed on the CDE include all reported data from agencies and entities aggregated from the agency data, such as states. According to methodology of typical open data websites, all reported data remain in file. Individuals who typically work with data files, such as the Master Files, can also access the CDE releases of data from 2020 and earlier for data based on the same quality methodology.

Starting with the release of 2021 data in calendar year 2022, the UCR Program will be consolidating its data quality review and management practices, which will reduce or eliminate potential differences between the two presentations going forward.

Files last modified: March 15, 2021

The Nation's Two Crime Measures

The U.S. Department of Justice administers two statistical programs to measure the magnitude, nature, and impact of crime in the nation: the Uniform Crime Reporting (UCR) Program and the National Crime Victimization Survey (NCVS). Each of these programs produces valuable information about aspects of the nation's crime problem. Because the UCR and NCVS programs have different purposes, use different methods, and focus on somewhat different aspects of crime, the complementary information they produce together provides a more comprehensive understanding of the nation's crime problem than either could produce alone.

Uniform Crime Reports

The International Association of Chiefs of Police (IACP) began publishing information for the UCR Program in 1929, two years after the IACP had established a committee to research the uniform reporting of crime statistics. Since September 1930, the FBI has administered the program, which currently collects information on murder and nonnegligent manslaughter, rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, arson, cargo theft, and human trafficking through the Summary Reporting System (SRS). Law enforcement agencies report arrest data only for 20 additional crime categories.

The UCR Program compiles data from monthly law enforcement reports or individual crime incident records transmitted directly to the FBI or to centralized agencies that then report to the FBI. The program thoroughly examines each report it receives for reasonableness, accuracy, and deviations that may indicate errors. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in a jurisdiction's boundaries. To identify any unusual fluctuations in an agency's crime counts, the program compares monthly reports to previous submissions from the agency and with those for similar agencies.

The UCR Program presents crime counts for the nation as a whole, as well as for regions, states, counties, cities, towns, tribal areas, and colleges and universities. This permits

analysis among neighboring jurisdictions and among those with similar populations and other common characteristics.

The FBI publishes its findings in a detailed annual report, *Crime in the United States*, issued in the fall. In addition to crime counts and trends, this report includes data on crimes cleared, persons arrested (age, sex, race, and ethnicity), law enforcement personnel, and the characteristics of homicides (including age, sex, and race of victims and offenders; victim-offender relationships; weapons used; and circumstances surrounding the homicides). The UCR Program also generates other specialized periodic reports.

Many local and state law enforcement agencies participating in the UCR Program submit their UCR data via the more comprehensive National Incident-Based Reporting System (NIBRS). NIBRS provides agencies the opportunity to submit additional details about each criminal incident in 23 broad categories of offenses. NIBRS furnishes incident and offense data as well as characteristics of all victims, offenders, and arrestees (age, sex, race, and ethnicity; and victim-offender relationships). The collection includes weapons data, location types, drug information, property descriptions, the type of criminal activity or gang involvement; and it offers the ability for greater analysis.

National Crime Victimization Survey

The NCVS, administered by the Bureau of Justice Statistics (BJS), provides a detailed picture of crime incidents, victims, and trends. The program began in 1973 as the National Crime Survey (NCS). In 1992, NCS was renamed NCVS to reflect a substantial redesign effort that focused primarily on methodological changes to the survey. The redesign also improved the initial questions used to screen for victimization incidents, updated the survey methods to take advantage of new technologies, and broadened the scope of crimes measured. The current NCVS collects detailed information on the frequency and nature of the crimes of rape and other sexual assault, robbery, aggravated and simple assault, personal larceny, household burglary, motor vehicle theft, and other theft.

Each year, BJS interviews a nationally representative sample of approximately 160,000 persons age 12 or older living in households across the nation. Households remain in the sample for 3 years. New households rotate into the sample on an ongoing basis.

NCVS collects information on crimes experienced by individuals and households during the six months preceding the interview, whether or not those crimes were reported to law enforcement. A unique feature of NCVS is that it collects both reported and unreported crimes and reasons why the crime was or was not reported.

The survey also captures specific details about each crime incident. NCVS collects information about victims (such as age, sex, race, ethnicity, marital status, income, and educational level), offenders (such as sex, race, approximate age, and victim-offender relationship), and the crimes (including time and place of occurrence, use of weapons, nature of injury, and economic consequences). In addition, the NCVS asks questions about the experiences of victims with the criminal justice system, self-protective measures used by victims, and possible substance abuse by offenders. The NCVS periodically includes additional questions on particular topics. Recent supplements have covered issues concerning school crime, identity theft, contacts between police and citizens, and stalking.

The BJS publishes NCVS data in *Criminal Victimization*, an annual report that covers the broad range of detailed information collected by NCVS, and the NCVS Victimization Analysis Tool, an online database through which users can examine victimization rates, counts, and percentages by a range of victim and crime characteristics. BJS also publishes detailed reports on topics such as intimate partner violence, workplace violence, hate crime, and crime against persons with disabilities. The National Archive of Criminal Justice Data at the University of Michigan archives the NCVS data files to enable researchers to perform independent analyses.

Comparing UCR and NCVS

Because the BJS designed NCVS in part to complement the UCR Program, the two programs share many similarities. As much as their different collection methods permit, the two measure the same subset of serious crimes, defined alike. Both programs cover rape, robbery, aggravated assault, burglary, theft, and motor vehicle theft. Rape, robbery, theft, and motor vehicle theft are defined virtually identically by both the UCR Program and the NCVS. (Prior to 2013, the UCR Program measured a more limited definition of forcible rape against women only, while the NCVS measured a broader definition of rape against both sexes. Now NCVS and the UCR Program define rape analogously.)

Despite covering a set of similar crimes, the two programs differ significantly. First, the two programs serve different purposes. The UCR Program's primary objective is to provide a reliable set of criminal justice statistics for law enforcement administration, operation, and management. BJS established NCVS to provide previously unavailable information about crime (including crime not reported to police), victims, and offenders.

Second, the two programs measure an overlapping but nonidentical set of crimes. The NCVS includes, but the UCR Program's SRS excludes, sexual assault (completed, attempted, and threatened), attempted robberies, verbal threats of rape, simple assault, and crimes not reported to law enforcement. UCR includes, but NCVS excludes, homicide, arson, commercial crimes, and crimes against children under age 12. The UCR Program's SRS also captures crimes reported to law enforcement but collects only arrest data for simple assault and sex offenses other than rape.

Third, because of methodology, the NCVS and UCR definitions of some crimes differ. For example, the UCR SRS defines burglary as the unlawful entry or attempted entry of a structure to commit a felony or theft. The NCVS defines burglary as the entry or attempted entry of a residence by a person who had no right to be there.

Fourth, for property crimes (burglary, theft, and motor vehicle theft), the two programs calculate crime rates using different bases. The UCR rates for these crimes are per capita (number of crimes per 100,000 persons), whereas the NCVS rates for these crimes are per household (number of crimes per 1,000 households).

Because the number of households may not grow at the same rate each year as the total population, trend data for rates of property crimes measured by the two programs may not be comparable. In addition, some differences in the data from the two programs may result from sampling variation in NCVS and from estimating for nonresponse in UCR.

BJS derives the NCVS estimates from interviewing a sample. The estimates are subject to a margin of error. This error is known and is reflected in the standard error of the estimate. The UCR Program bases its data on the actual counts of offenses reported by law enforcement agencies. In some circumstances, the UCR Program estimates its data for nonparticipating agencies or those reporting partial data. Apparent discrepancies between statistics from the two programs can usually be accounted for by differences in definitions or procedures or resolved by comparing NCVS sampling variations

(confidence intervals) of those crimes said to have been reported to police with UCR statistics.

Each program has unique strengths. UCR provides a measure of the number of crimes reported to law enforcement agencies throughout the country. The UCR SRS's Supplementary Homicide Reports provide reliable, timely data on the extent and nature of homicides in the nation. In addition to providing annual point and change estimates on criminal victimization, NCVS is the primary source of information on the characteristics of criminal victimization incidents and on the number and types of crimes not reported to law enforcement authorities.

By understanding the strengths and limitations of each program, it is possible to use UCR and NCVS to achieve a greater understanding of crime trends and the nature of crime in the United States. For example, changes in police procedures, shifting attitudes toward crime and police, and other societal changes can affect the extent to which people report and law enforcement agencies record crime. NCVS and UCR data can be used in complementary ways to explore why trends in reported and police-recorded crime may differ.

UCR Summary of Crime in the Nation, 2022

Introduction

The FBI's Uniform Crime Reporting (UCR) Program provides a nationwide view of crime based on data submissions voluntarily reported by non-federal law enforcement agencies throughout the country. The data submitted to the distinct collections detail criminal incidents and law enforcement workforce and operations. For decades, several of these compilations have been published annually. Though each collection presents details of crime data based on numbers provided by participating agencies, the reports vary in context, participation, and publication criteria.

Crime in the Nation, 2022, includes data received from 15,724 law enforcement agencies that provided either the National Incident-Based Reporting System (NIBRS) or the Summary Reporting System (SRS) data. These agencies represent 83.3 percent of agencies actively enrolled in the UCR Program and covering a combined population of 311,628,976 (93.5 percent) inhabitants. Notably, every city agency covering a population of 1,000,000 or more inhabitants contributed a full 12 months of data to the UCR Program in 2022.

In addition to the *UCR Summary of Crime in the Nation, 2022*, which contains a synopsis of the data, *Crime in the Nation, 2022* is comprised of the following components:

- *Crime in the United States (CIUS), 2022*
- *NIBRS, 2022*
- *NIBRS Estimates, 2022*
- *Hate Crime Statistics, 2022*
- *Law Enforcement Officers Killed and Assaulted (LEOKA), 2022: Officers Assaulted*

Each of these components contains multiple distinct tables providing details on various facets of crime and law enforcement data submitted to the UCR Program.

On January 1, 2021, the UCR Program transitioned to collecting crime data only through NIBRS. To facilitate the transition, the UCR Program has worked diligently to offer resources such as programming and technical support, training, and outreach to law enforcement agencies; these resources continue to be available to agencies that have yet to complete the transition. In addition to publishing the NIBRS data of more than 11,500 law enforcement agencies for 2021, the UCR Program produced NIBRS estimates in conjunction with the Bureau of Justice Statistics. However, participation for 2021 remained below a statistically acceptable level to be nationally representative for trend analyses. To mitigate risks associated with low participation due to several agencies not yet completing the transition to NIBRS, the UCR Program published a limited release of the traditional *CIUS, 2021* as part of *Crime in the Nation, 2021*.

The decreased participation for the 2021 data release could have caused a misinterpretation of reported crime data and potentially an incorrect understanding of national crime trends. Thus, the abridged *CIUS, 2021* data release included some traditional tables, but eliminated tables that represented a national view or presented a trending view of 2021 data versus previous years'

data. For the 2022 data year, in order to resume providing nationally representative data, the FBI accepted SRS data submissions from agencies that have not yet transitioned to NIBRS. This measure will help ensure continuity to the UCR Program’s crime statistics.

Although the increase in participation from 2021 to 2022 is partially due to the inclusion of SRS data, an additional 1,499 law enforcement agencies submitted data through NIBRS in 2022 when compared to 2021.

	2021 Volume	2021 Percentage	2022 Volume	2022 Percentage
NIBRS Agencies	11,794	62.7%	13,293	70.4%
NIBRS Population	215,058,917	64.8%	256,187,698	76.9%
SRS Agencies	0	0.0%	2,431	12.9%
SRS Population	0	0.0%	55,441,278	16.6%
Total Participating Agencies	11,794	62.7%	15,724	83.3%
Total Participating Population	215,058,917	64.8%	311,628,976	93.5%
Enrolled Agencies	18,806		18,884	
Enrolled Population	331,895,048		333,287,557	

A description of each component’s content and publication criteria, as well as where to access each component’s tables, is provided within the Collection Summaries section below. Following the Collection Summaries section is a Data Synopsis section providing analyses of NIBRS violent and property crime estimates, LEOKA estimates, and Hate Crime year-over-year trends and visualizations. In the Highlights segment within the Data Synopsis, readers will find additional noteworthy crime statistics gleaned from 2022 NIBRS estimation data.

Collection Summaries

CIUS, 2022

An annual publication for more than eight decades, the *CIUS* report contains a compilation of the volume and rate of violent and property crime offenses for the nation by state using SRS data and summarized data from NIBRS. Data at the level of local law enforcement agencies are also provided for those contributors supplying 12 months of complete offense data. Because not all law enforcement agencies provide data for complete reporting periods, the FBI includes estimated crime numbers in these national presentations.

CIUS presents data tables containing information on topics of offenses known to law enforcement, arrests, clearances, trends, rates, property stolen and recovered, and law enforcement employee data. Data in *CIUS, 2022* include—

- Traditional Summary Estimations – statistics for the entire United States with estimated crime numbers accounting for law enforcement agencies that did not provide data for complete reporting periods. Includes information about violent crime offenses (murder and non-negligent manslaughter, rape, robbery, and aggravated assault) and property crime offenses (burglary, larceny-theft, motor vehicle theft, and arson).
 - Estimated offense volume and rate – 20-year table presenting national estimates.
 - Estimated offense percent change for two years, five years, and ten years.
 - Estimated offense volume and rate by community type.
 - Estimated offense volume percent distribution by region.
 - Estimated offense volume and rate percent change by region, geographic division, and state.
 - Estimated offense volume and rate for each state by community type.
 - Estimated offense volume and rate for each individual metropolitan statistical area.
 - Estimated breakdown for the offenses of robbery (by location), burglary (by time of day), and larceny-theft (by type) over the last five years.
- Offenses Known to Law Enforcement – information about violent crime offenses and property crime offenses for those agencies reporting 12 months of complete data.
- Traditional Summary Trends – two-year crime trends by population groupings and additional information about selected offenses.
- Traditional Summary Rates – crime rates by population groupings and additional information about selected offenses
- Weapons - data concerning weapons used in the violent crimes of murder, robbery, and aggravated assault by state.
- Property -
 - Analysis of the value of property lost through the crimes of robbery, burglary, motor vehicle theft, and larceny-theft. Table provides a percent change in offense volume, percent distribution of offense breakdowns, and the average value of property lost.
 - Type and value of property stolen and recovered.

- Clearances - information about crimes “solved” either by arrest or exceptional means.
 - By population groupings, geographic region, division, and additional information about selected offense.
 - Percent of clearances involving persons under 18 years of age by population group.
- Expanded Homicide Data – additional details about homicides and justifiable homicides that includes information about murder victims, offenders, weapons, victim to offender relationships, and circumstances.
- Expanded Offense Data – additional data the program collects on the eight offenses. Depending on the offense, these details may include the type of weapon and the type and value of items stolen.
- Persons Arrested –
 - Number of arrests made by law enforcement and the age, sex, race, and ethnicity of arrestees for 28 offenses.
 - Estimated number of arrests by offense.
 - Number and rate of arrests by region and population groupings.
 - Two-year, five-year, and ten-year arrest trends.
 - Disposition of juvenile offenders taken into custody.
- Full-time Law Enforcement Employee Data – information regarding sworn officers and civilian law enforcement personnel.
 - Volume and rate of law enforcement employees by region, geographic division, state, and by population group.
 - Volume and rate of law enforcement officers by region, geographic division, state, and by population group.
 - Volume of full-time law enforcement employees by male/female.
- Federal Data – information about violent crime offenses and property crime offenses from contributing federal law enforcement agencies and employee data from participating federal agencies.
- *Human Trafficking, 2022* – information about human trafficking (commercial sex acts and involuntary servitude) offenses, clearances, and arrests.
- *Cargo Theft, 2022* – data collected on reported cargo thefts offenses.

Data users can access *CIUS, 2022*, through the Documents & Downloads section on the CDE website. This offers users the ability to download tables and resources including methodology, tables by titles, area definitions, and offense definitions.

NIBRS, 2022

NIBRS, established in 1989, is a crime data collection that improves the overall quality of crime data collected by law enforcement. NIBRS collects data for 71 offenses, plus ten additional offenses for which only arrests are reported. It captures details on each single crime incident—as well as on separate offenses within the same incident including information on victims, known offenders, relationships between victims and offenders, arrestees, and property involved in crimes. For crime incidents, NIBRS can also provide circumstances and context like location, time of day, and whether the incident was cleared by arrest or exceptional means.

NIBRS, 2022 is based on data submitted to the UCR Program by law enforcement agencies via NIBRS for one or more months of the 2022 calendar year. It presents an overview of the offense categories that show the diversity and complexity of the data collected only via NIBRS, and is not augmented by SRS data. In addition, the report includes detailed agency-level data by offense type in tables for all 50 states, the District of Columbia, and the territory of Guam. Data tables in *NIBRS, 2022* include—

- Participation –
 - Number of Law Enforcement Agencies and Population Covered, Enrolled, Participation Status, and Method of Data Submission by Population Group and Participation by State
- Incident –
 - Incidents, Offenses, Victims, and Known Offenders by Offense
- Victim –
 - Adult and Juvenile Age by Offense
 - Age, Sex, and Race by Offense
- Offender –
 - Adult and Juvenile Age by Offense
 - Age, Sex, and Race by Offense
- Arrestee –
 - Adult and Juvenile Age by Offense
 - Age, Sex, and Race by Offense
- Relationship –
 - Victims to Offenders by Offense
- Location –
 - Crimes Against Persons, Property, and Society by Location
- Time-of-Day –
 - Crimes Against Persons, Property, and Society by Time of Day
- Type Weapon/Force Involved –
 - Offenses Involving Weapon Use by Type of Weapon/Force Involved
- Offense Circumstance –
 - Murder and Nonnegligent Manslaughter and Aggravated Assault Victims by Circumstance
 - Negligent Manslaughter Victims by Circumstance
 - Individuals Justifiably Killed by Aggravated Assault/Homicide Circumstance
- State Offense (Totals) –
 - Crimes Against Persons, Property, and Society by State
- Completed and Attempted Offenses –
 - Number of Offenses Completed and Attempted by Offense
- Clearance –
 - Incidents Cleared by Offense
- Suspected Use, Drugs/Narcotics and Alcohol –
 - Incidents with Drugs/Narcotics Seized by Suspected Drug Type
 - Offenses Involving Offender’s Suspected Use of Drugs/Narcotics and Alcohol
- State –
 - Offenses by Agency

- Federal –
 - Offenses by Federal Agencies that submitted NIBRS

Data users can access the *NIBRS, 2022* tables through the Documents & Downloads section on the Crime Data Explorer (CDE) website. This offers users the ability to download tables and resources including methodology, component descriptions, offense definitions, and frequently asked questions about individual agency data.

NIBRS Estimates, 2022

The UCR Program has estimated crime statistics for the nation, its regions, and for states since the 1960s. Beginning in 2021, the FBI partnered with the Bureau of Justice Statistics to create a robust NIBRS Estimation Process to account for agencies that have not yet transitioned to NIBRS. In 2022, nearly 77 percent of the population was represented through NIBRS data. The *NIBRS Estimates, 2022* tables bridge the gap to provide the granularity of NIBRS details for the remainder of the population.

In addition to the estimates, confidence intervals (the mean of an estimate plus or minus the variation possible in that estimate) are provided, as well as indications of whether the estimate is considered statistically significant. Estimates found to have a level of statistical uncertainty beyond established standards are not published by the UCR Program. To better understand the NIBRS Estimation Process, please read [Estimation Procedures for Crimes in the United States Based on NIBRS Data](#).

Data users can access the NIBRS estimation tables through the Documents & Downloads section on the CDE website. For data year 2022, two sets of NIBRS Estimation tables are available. The analytical tables provide estimated current year and two-year trend analyses for a variety of select crimes, demographics, and geographic locations. These tables offer a cleaner, more digestible overview of NIBRS estimation data. The indicator tables deliver all estimates calculated using NIBRS data for crime offenses, demographics, and geographic location and contain additional statistical details for each estimate.

NIBRS estimates also feature tables that provide estimated LEOKA assault data. This helps account for officers who may not have been represented in the second installment of 2022 LEOKA data, which is comprised of tables that provide reported data on assaults against officers. Data users can access LEOKA estimation tables containing estimated information on officers assaulted on the Law Enforcement Officers Killed and Assaulted Annual Reports section of the Documents & Downloads section on the CDE website.

Hate Crime Statistics, 2022

Each year, the FBI publishes data concerning bias-motivated offenses reported by law enforcement to gauge the scope and nature of hate crime in the nation. This report chronicles crimes that were motivated, in whole or in part, by the offender's bias against the victim's race, ethnicity, ancestry, religion, sexual orientation, disability, gender, or gender identity, and were committed against persons, property, or society. Because determining motivation is subjective, it

is sometimes difficult to know with certainty whether a crime resulted from the offender's bias. Moreover, the presence of bias alone does not necessarily mean that a crime can be considered a hate crime. Only when a law enforcement investigation reveals sufficient evidence to lead a reasonable and prudent person to conclude that the offender's *actions* were motivated, in whole or in part, by his or her bias, should an agency report an incident as a hate crime.

Law enforcement agencies report hate crimes brought to their attention monthly or quarterly to the FBI either through their state UCR Programs or directly. To be included in this release, NIBRS agencies must have submitted at least one *Group A Incident Report*, a *Group B Arrest Report*¹, or a *Zero Report* for at least one month of the calendar year. Agencies that have not transitioned to NIBRS reporting must have either submitted a *Hate Crime Incident Report* or a *Zero Report* via the electronic hate crime record layout specified in the *Hate Crime Technical Specification*. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months (or four quarters) of the calendar year. Please note the UCR Program does not apply offense estimation procedures to account for missing data from agencies that do not participate in the Hate Crime Statistics Data Collection. Data tables in *Hate Crime Statistics, 2022* include—

- Number of Participating Agencies and Population Covered by Population Group and Federal
- Incidents, Offenses, Victims, and Known Offenders by Bias Motivation
- Incidents, Offenses, Victims, and Known Offenders by Offense Type
- Known Offender's Race and Ethnicity by Offense Type
- Offense Type by Bias Motivation
- Known Offender's Race and Ethnicity by Bias Motivation
- Victim Type by Offense Type
- Offense Type by Bias Motivation
- Victim Type by Bias Motivation
- Known Offender's Race, Ethnicity, and Age
- Bias Motivation by Location
- Offense Type by Participating State, Territory, and Federal
- Hate Crime Reporting by State, Territory, and Federal
- Hate Crime Incidents per Bias Motivation and Quarter by State, Territory, Federal, and Agency
- Hate Crime Zero Data Submitted per Quarter by State, Federal, and Agency

Data users can access *Hate Crime Statistics, 2022* through the Documents & Downloads section on the CDE website. This offers users the ability to download tables and resources including methodology, component descriptions, and offense definitions.

¹ Group A includes 71 offenses captured within NIBRS that include NIBRS data elements. Group B includes ten additional offenses for which only arrest data is gathered.

LEOKA, 2022: Officers Assaulted

An annual publication since 1972, the LEOKA report provides data on law enforcement officers who were feloniously killed, accidentally killed, or assaulted in the line of duty. The UCR Program collects information monthly about assaults on duly sworn federal, state, county, local, college and university, tribal, and territorial law enforcement officers. For assault data to be included in *LEOKA, 2022: Officers Assaulted*, law enforcement agencies must have submitted information for all 12 months of 2022 regarding their sworn officers who were assaulted, as well as the number of officers and civilians their agencies employed full time for the reporting year.

LEOKA, 2022: Officers Assaulted focuses on details about incidents in which law enforcement officers, while engaged in or on account of the performance of their official duties, received nonfatal injuries as a direct result of a willful and intentional act by an offender. This report collects assault incident details regarding injuries, times of incidents, circumstances, clearances, assignments, and weapons. Data tables in *LEOKA, 2022: Officers Assaulted* include—

- Law Enforcement Officers Assaulted by Region and Geographic Division
- Law Enforcement Officers Assaulted by Population Group
- Time of Incident by Number of Assaults and Percent Distribution
- Circumstance at Scene of Incident by Population Group and Percent Cleared
- Circumstance at Scene of Incident by Type of Assignment and Percent Distribution
- Type of Weapon and Percent Injured
- Region, Geographic Division, and State by Type of Weapon
- Population Group by Type of Weapon and Percent Distribution
- Circumstance at Scene of Incident by Type of Weapon and Percent Distribution

Data users can access the *LEOKA, 2022: Officers Assaulted* tables through the Documents & Downloads section on the CDE website. The CDE offers users the ability to download tables and resources including a methodology, a topic page, the assault data map, and LEOKA figures.

Data Synopsis

CIUS, 2022 provides a set of traditional estimations based on SRS data methodology. These estimates have been relied upon by the public for decades to provide a comprehensive look of crime in the United States for a selection of major crime offense categories. These estimations also allow the creation of trends showing how crime has changed year over year. This data synopsis includes an examination of those year over year trends for the nation.

In 2022, the FBI UCR Program accepted SRS data submissions from agencies not yet transitioned to the NIBRS. This means the FBI was able to include both NIBRS (converted to SRS) data and data reported from SRS agencies in *CIUS, 2022*. This is similar to what has been done for the history of *CIUS* and allows for a more complete picture of crime offenses than NIBRS or SRS alone. These estimated trends from *CIUS, 2022* reflect estimates generated from reported data provided by 15,724 agencies covering a population of 93.5 percent.

Violent Crime

Violent crime consists of murder and non-negligent manslaughter, rape (revised definition), aggravated assault, and robbery. Nationwide, from 2021 to 2022, the estimated volume of violent crime offenses showed the following changes:

- ↓ Violent crime decreased 1.7 percent.
- ↓ Murder and non-negligent manslaughter decreased 6.1 percent.
- ↓ Rape (revised definition) decreased 5.4 percent.
- ↓ Aggravated assault decreased 1.1 percent.
- ↑ Robbery increased 1.3 percent.

An estimated 1,232,428 violent crime offenses were committed in 2022, indicating an offense rate of 369.8 violent crimes per 100,000 inhabitants, down from the 2021 offense rate of 377.6 violent crimes per 100,000 inhabitants.

Property Crime

Property crime consists of burglary/breaking and entering, larceny-theft offenses, and motor vehicle theft. Nationwide, from 2021 to 2022, the estimated volume of property crime offenses showed the following changes:

- ↑ Property crime increased 7.1 percent.
- ↔ Burglary/breaking and entering remained static with 0.0 percent change.
- ↑ Larceny-theft offenses increased 7.8 percent.
- ↑ Motor vehicle theft increased 10.9 percent.

An estimated 6,513,829 property crime offenses were committed in 2022, indicating an offense rate of 1,954.4 property crimes per 100,000 inhabitants, up from the 2021 offense rate of 1,832.3 property crimes per 100,000 inhabitants.

NIBRS Estimates, 2022 Highlights

A robust and complex NIBRS estimation process generated the *NIBRS Estimates, 2022* report to provide an adequate representation of granular crime details for the entire nation. Accordingly, *NIBRS Estimates, 2022* will be examined to assess these detailed national crime trends within this summary.

Statistical significance is a measure indicating whether an observed change was precipitated by a specific cause or by chance. A statistically significant change would be a change determined to be caused by a specific factor; a change that does not meet the criteria for statistical significance may have been caused by mere chance. In some instances, differences in the comparison of 2022 data to 2021 data do not meet the criteria for statistical significance. The statistically significant increases or decreases from 2021 to 2022 are specifically identified, when relevant, in the analytical tables in *NIBRS Estimates, 2022*.

Violent Crime with Weapon

A criminal offense might involve the use of one or more weapons. An estimated 1,238,000 violent crime offenses involved at least one weapon in 2022, a 0.2 percent decrease from the 1,239,900 violent crime offenses involving at least one weapon in 2021. An estimated 90,000 violent crime offenses involved no weapons.

Sometimes, a weapon may have been used in the commission of an offense, but it is unknown what type of weapon. Of reported known weapons, firearms were the weapons used the most in violent crime offenses, with an estimated 488,900 violent crime offenses involving one or more

firearms reported in 2022, a 0.6 percent increase compared to the 486,100 violent crime offenses involving firearms in 2021.

Firearms made up the majority (80.3 percent) of all known weapons² associated with estimated murder and non-negligent manslaughter offenses. Personal weapons were most often (87.2 percent) involved in estimated rape (revised definition) offenses with known weapons. Of estimated aggravated assault offenses with known weapons, firearms were involved in 39.6 percent and personal weapons were involved in about one-fifth (20.3 percent). Of estimated robbery offenses with known weapons, nearly half (46.0 percent) involved firearms and over one-third (34.1 percent) involved personal weapons.

Known Involved Weapons by Violent Crime Offense, 2022

	Murder and non-negligent manslaughter	Revised rape	Aggravated assault	Robbery
Blunt instruments	1.9%	0.6%	9.3%	3.2%
Other non-personal weapons	5.2%	7.9%	15.3%	7.2%
Knives and other cutting instruments	8.5%	1.6%	15.5%	9.5%
Personal weapons	4.2%	87.2%	20.3%	34.1%
Firearms	80.3%	2.7%	39.6%	46.0%

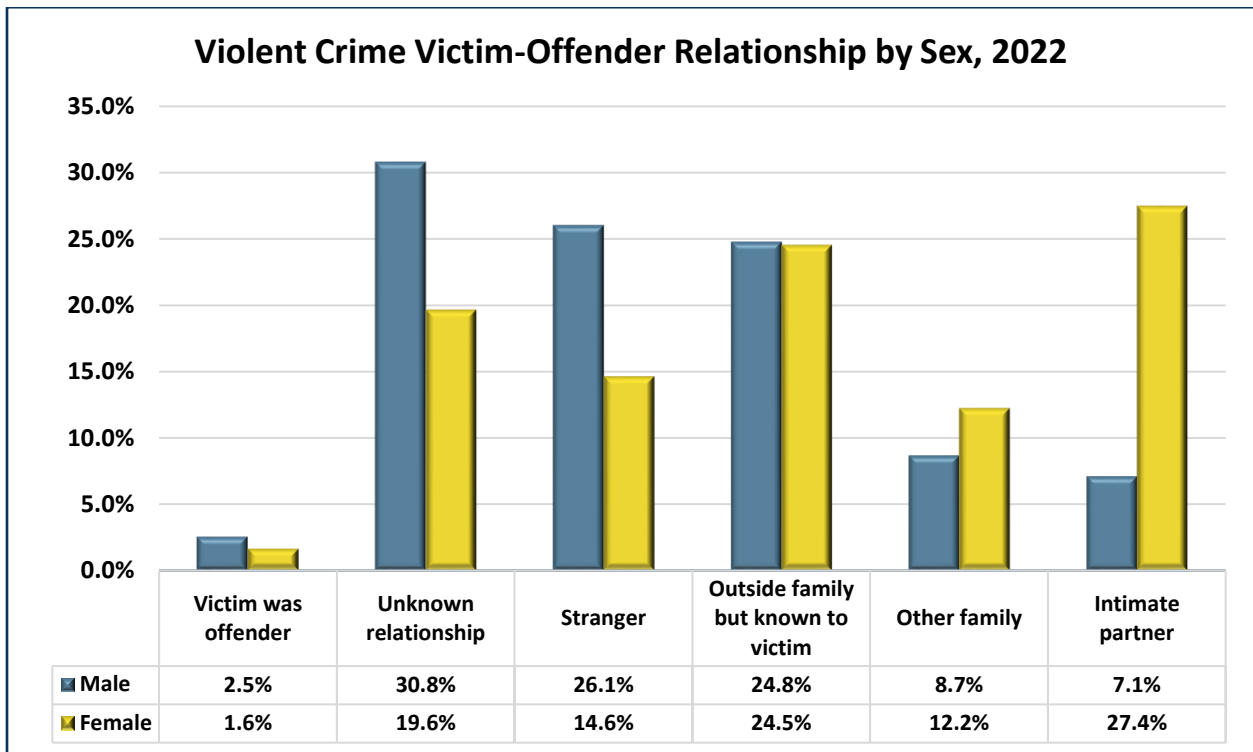

² Known weapons considers the sum of involved personal weapons, firearms, knives and other cutting instruments, blunt instruments, and other non-personal weapons.

Violent Crime Victim Demographics

In 2022, an estimated 40.1 percent of male violent crime victims and 34.3 percent of female violent crime victims were between the ages of 35 and 64 years old. Considering the age distribution percentages, violent crime victims below the age of 35 were more often female, while violent crime victims aged 35 or older were more often male.

Intimate partners comprised over a quarter (27.4 percent) of relationships female violent crime victims reportedly had with their offenders, while strangers comprised over a quarter (26.1 percent) of relationships male violent crime victims had with their offenders.

Property Crime Arrestee Demographics

In 2022, an estimated 42.7 percent of male property crime arrestees and 42.9 percent of female property crime arrestees were between 35 and 64 years old.

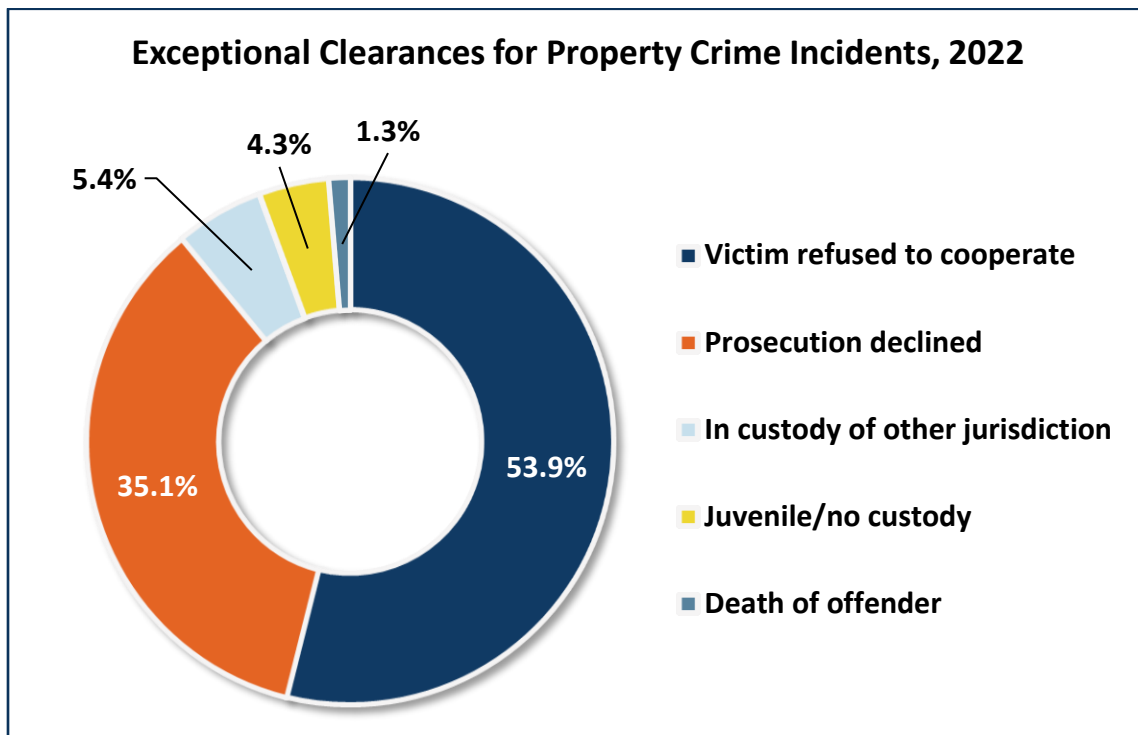

Clearance Percentages

Law enforcement agencies can clear, or “close,” incidents by arrest or exceptional means (i.e., there is enough evidence to arrest an offender who has been identified and located, but a special circumstance prevents law enforcement from being able to arrest him or her). Across both violent and property crime, estimates of clearances remained the same or nearly the same, while exceptional clearance estimates declined from 2021 to 2022.

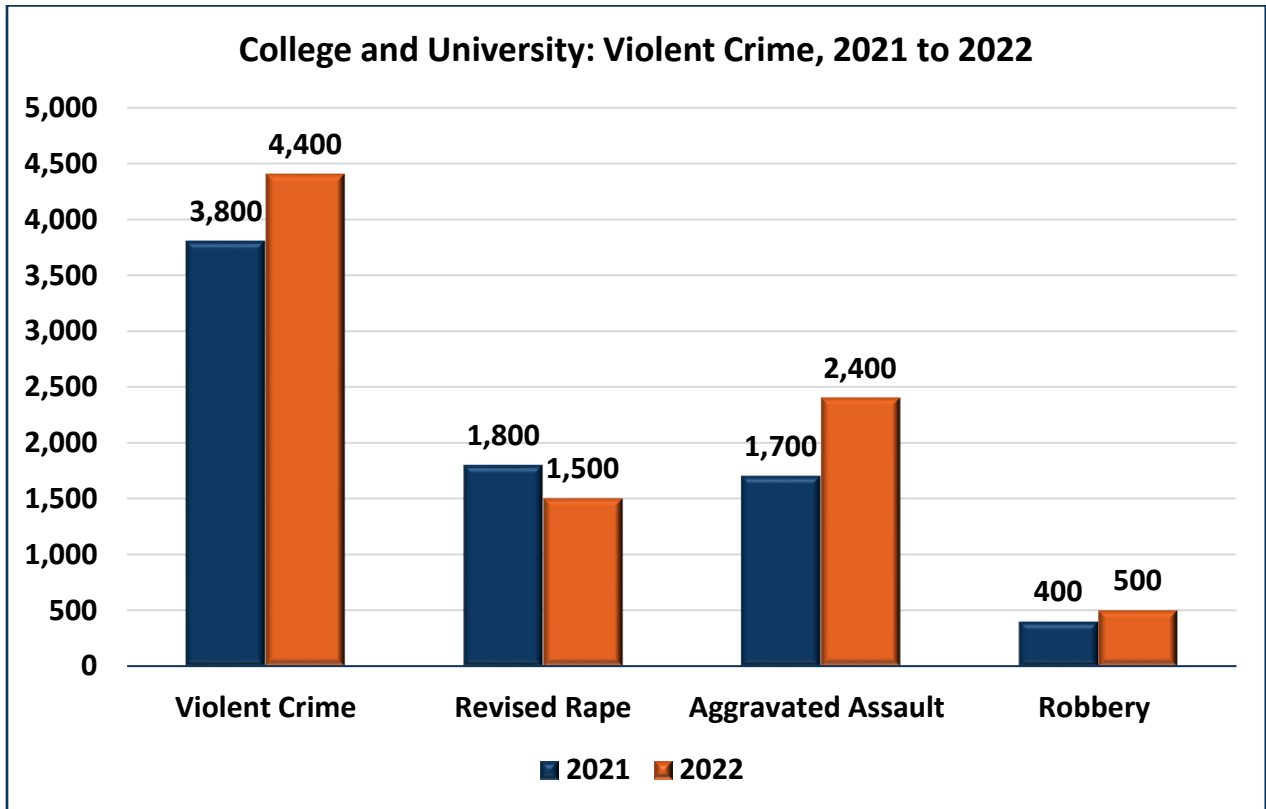

Of the exceptionally cleared violent crime incidents, nearly half (47.5 percent) were due to victims refusing to cooperate, with another 44.6 percent of exceptionally cleared violent crime incidents reporting prosecution declined. Victims refused to cooperate in over half (53.9 percent) of exceptionally cleared property crime incidents.

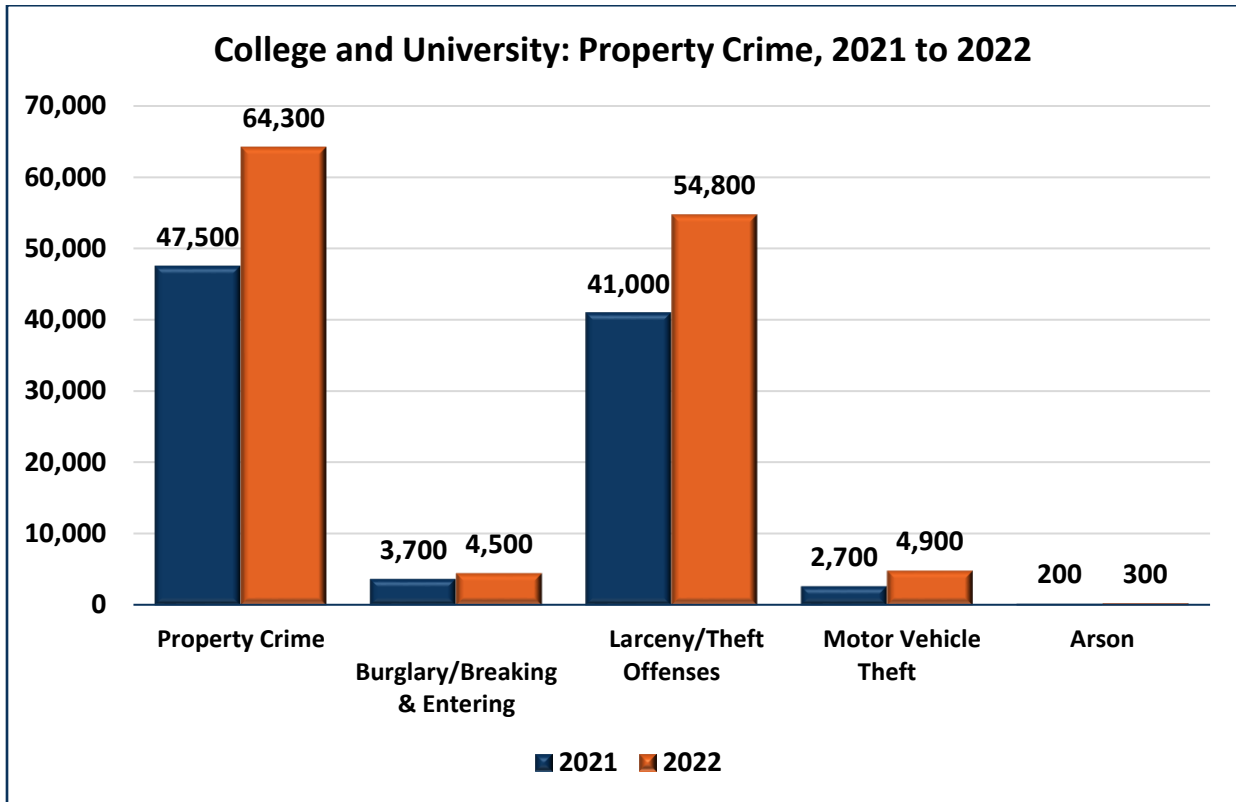

College and University

In 2022, 4,400 violent crime offenses were estimated for college and university agencies, indicating an offense rate of 31.3 violent crimes per 100,000 inhabitants. Estimated violent crime offenses increased 13.3 percent from 2021 to 2022. The murder and non-negligent manslaughter estimate is suppressed for college and university agencies based on NIBRS Estimation suppression rules.

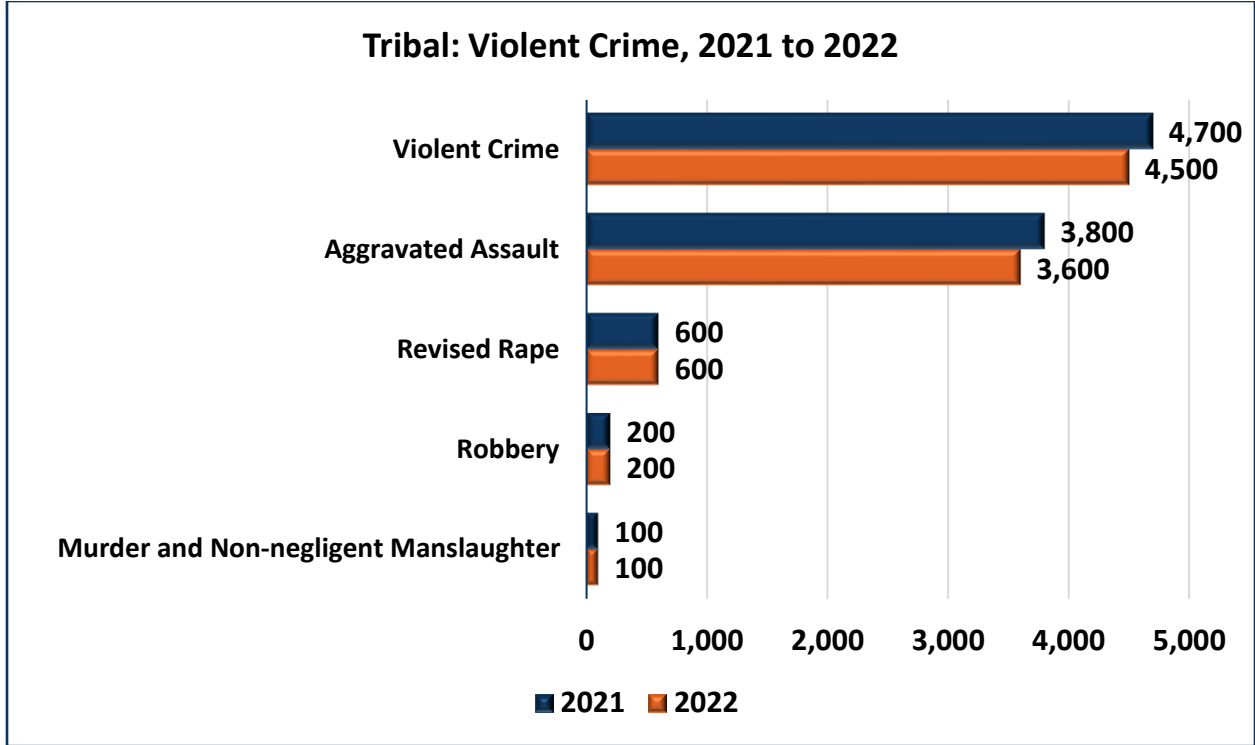

In 2022, 64,300 property crime offenses were estimated for college and university agencies, indicating an offense rate of 461.8 property crimes per 100,000 inhabitants. Estimated property crime offenses increased 35.4 percent from 2021 to 2022.

In 2022, there were an estimated 1,200 violent crime arrests by college and university agencies, indicating a rate of 8.4 arrestees for violent crime offenses per 100,000 inhabitants. There were 4,100 property crime arrests, indicating a rate of 29.5 arrestees for property crime offenses per 100,000 inhabitants.

Tribal

In 2022, 4,500 violent crimes were estimated for tribal agencies, decreasing 4.6 percent from an estimated 4,700 violent crimes in 2021.

In 2022, 15,700 property crimes were estimated for tribal agencies, increasing 1.8 percent from an estimated 15,500 property crimes in 2021.

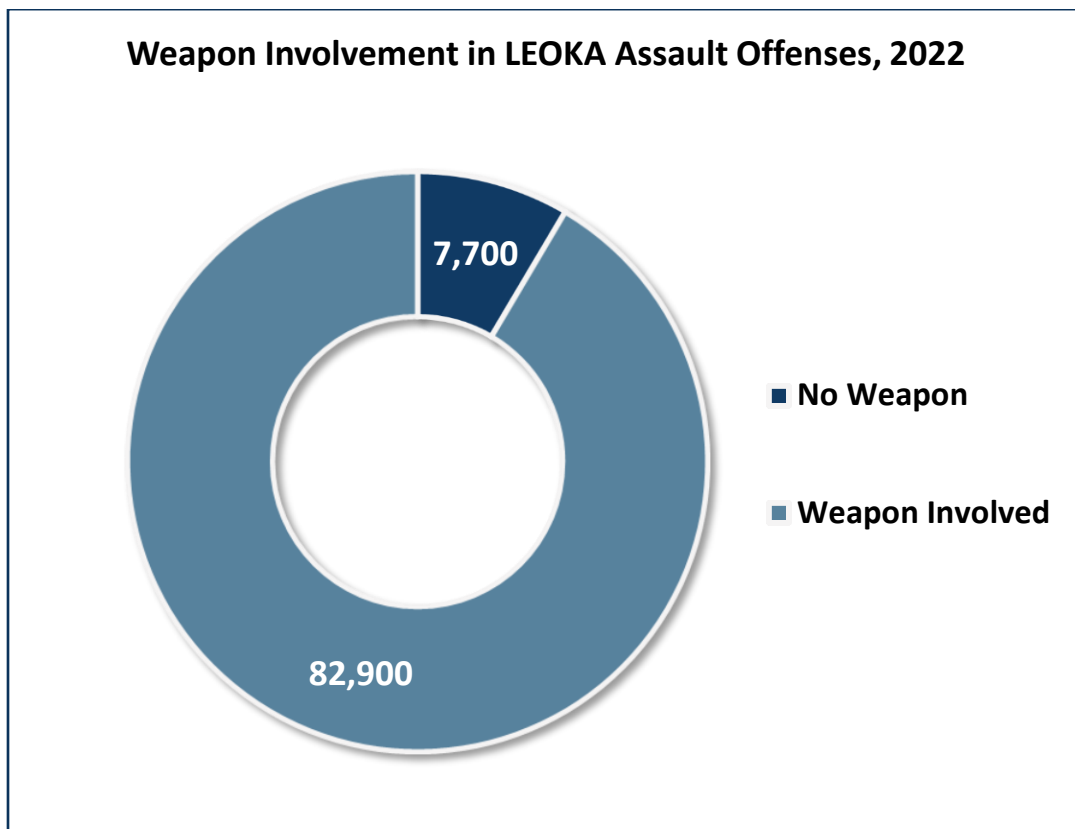

Considering those arrested by tribal agencies in 2022, an estimated 1,900 arrestees had committed violent crime offenses and an estimated 2,000 arrestees had committed property crime offenses.

LEOKA Estimates

Nationwide, assault offenses — which include aggravated assault, simple assault, and intimidation — against law enforcement officers increased 1.8 percent from an estimated 100,300 in 2021 to an estimated 102,100 in 2022. An estimated 31,400 assault offenses against officers resulted in injuries in 2022, reflecting a 1.7 percent increase compared to the estimated 30,800 assault offenses resulting in injuries in 2021. The national rate for LEOKA assaults in 2022 was 11,073.3 offenses per 100,000 police employees, a 1.7 percent decrease from 11,263.8 offenses per 100,000 police employees in 2021.

An estimated 82,900 assault offenses against law enforcement officers involved weapons in 2022, an increase of 2.5 percent from the previous year. An estimated 7,700 assault offenses against law enforcement officers involved no weapons.

Sometimes, a weapon may have been used in the commission of a LEOKA assault offense, but it is unknown what type of weapon. Of known weapons, personal weapons greatly surpassed other more lethal weapons and were the most often involved weapons in LEOKA assaults, with an estimated 61,500 of assault offenses indicating personal weapons were used.

Assaults against law enforcement officers were least likely to occur between the hours of 4a.m. and 8a.m. Following 8a.m., estimated assaults increased throughout the remainder of the day, with 8p.m. to midnight estimated to be the most common time for an officer to be assaulted.

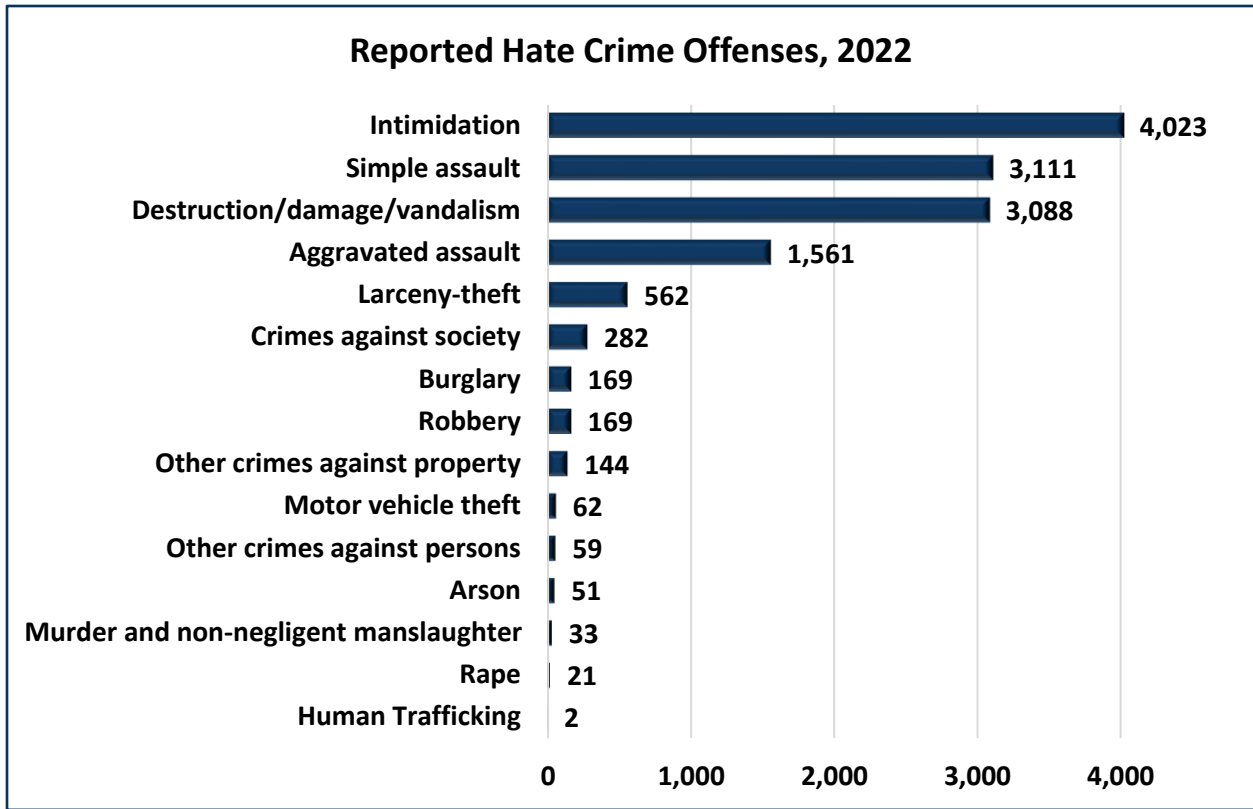

Hate Crime

The following information from *Hate Crime Statistics, 2022*, reflects data received from 77.5 percent of agencies actively enrolled in the UCR Program with a population coverage of 91.7 percent. Comparatively, the 2021 Hate Crime Supplement reflected data received from 79.0 percent of agencies with a population coverage of 91.1 percent. As previously indicated in the Hate Crime Collection Summary, the presented data does not necessarily represent reports from each participating agency for all 12 months (or four quarters) of the calendar year.

Considering all reported hate crime data, regardless of the number of months or quarters submitted by law enforcement agencies, hate crime incidents increased from 10,840 to 11,634, offenses increased from 12,411 to 13,337, victims increased from 12,822 to 13,711, and known offenders increased from 9,606 to 10,299.

The most often reported bias-motivated offense in 2022 was intimidation, followed by simple assault and destruction/damage/vandalism. Together, these three offenses comprised over three quarters (76.6 percent) of total reported hate crime offenses.

Two-Year Hate Crime Trend, 2021-2022

To determine a meaningful national trend, the UCR Program created a dataset that covers a common time period of reporting by agency for both years. Hate crime is reported quarterly; therefore, the dataset used to calculate the following percent change includes those agencies reporting six or more common months or two or more common quarters (six months) of hate crime data to the UCR Program for both years.

According to the above-described dataset used to determine a two-year hate crime trend, reported hate crime incidents increased 0.5 percent from 9,589 in 2021 to 9,641 in 2022.

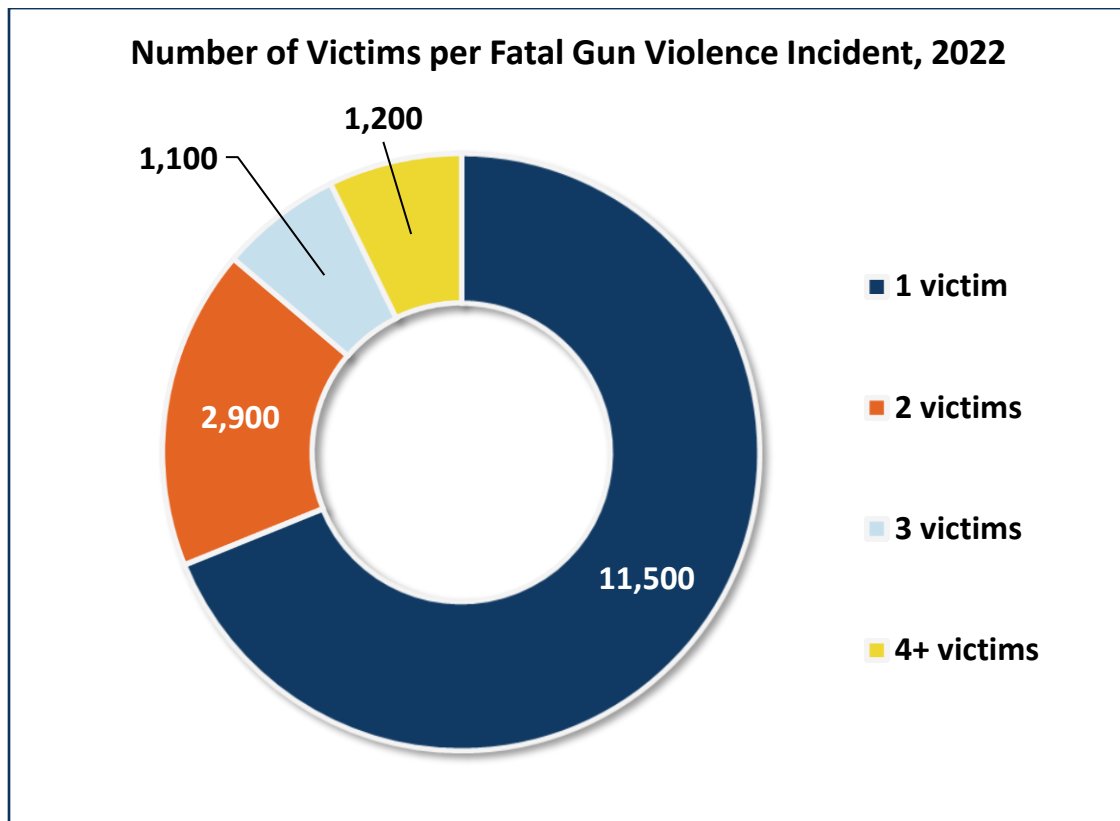

Highlights of NIBRS Estimates, 2022

Fatal and Non-fatal Gun Violence

The granularity of NIBRS allows a more comprehensive examination into aspects of criminal incidents beyond the committed offense. Two new trends available in *NIBRS Estimates, 2022* – fatal and non-fatal gun violence – estimate the percent change in violent crime offenses with an involved firearm. Within these two new trend tables, fatal violent crime offenses include murder and non-negligent manslaughter, while non-fatal violent crime offenses include rape (revised definition), robbery, aggravated assault, kidnapping/abduction, human trafficking – commercial sex acts, and human trafficking – involuntary servitude. Age categories, sex, and race of victims are analyzed, as well as the number of victims within each incident. None of the estimated changes from 2021 to 2022 data within the gun violence trends were determined to be statistically significant.

Fatal gun violence offenses decreased 5.2 percent from an estimated 17,700 offenses in 2021 to 16,800 in 2022. The national rate of fatal gun violence offenses decreased from 5.3 per 100,000 inhabitants in 2021 to 5.0 per 100,000 inhabitants in 2022.

In 2022, most (11,500) fatal gun violence incidents resulted in a single murder or non-negligent manslaughter victim while the remainder resulted in multiple murder or non-negligent manslaughter victims.

From 2021 to 2022, the estimated volume of adult victims of fatal gun violence decreased 6.6 percent from 16,300 to 15,300, while the estimated volume of juvenile victims of fatal gun violence increased 11.8 percent, from 1,300 to 1,500.

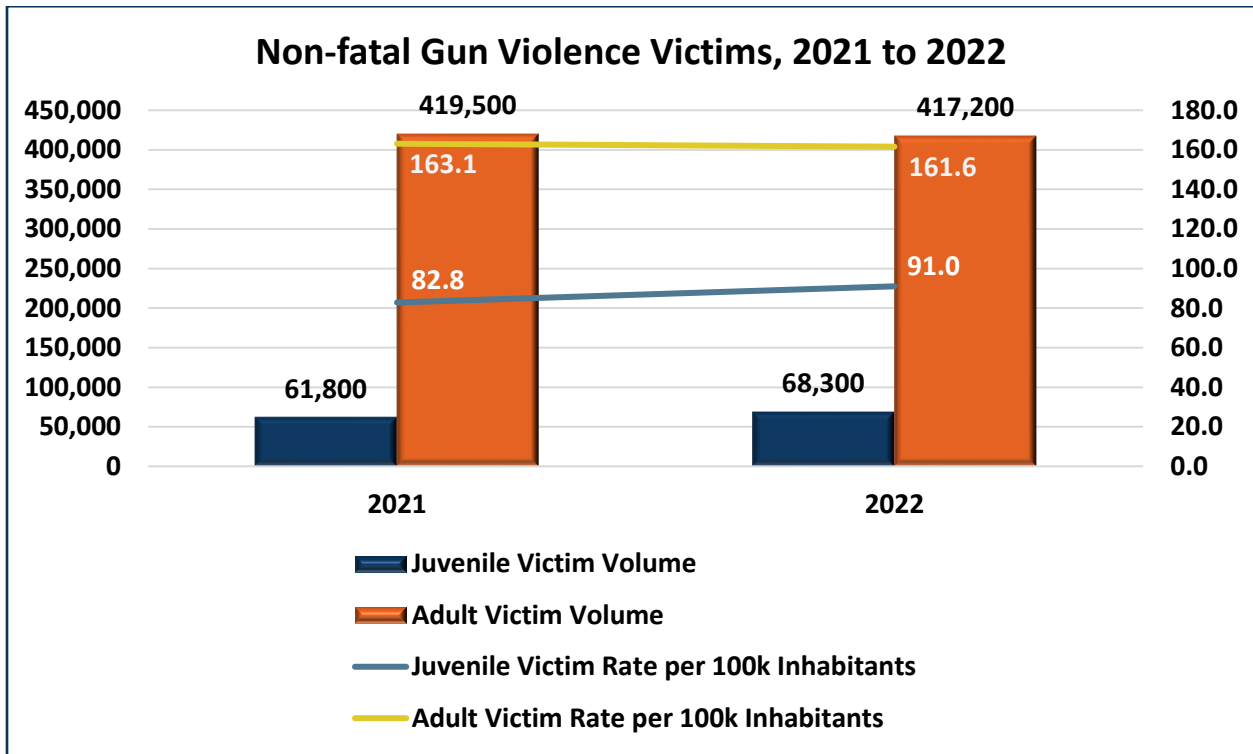

Non-fatal gun violence offenses increased 0.9 percent from an estimated 481,300 offenses in 2021 to 485,500 in 2022. The national rate of non-fatal gun violence offenses increased from 145.0 per 100,000 inhabitants in 2021 to 145.7 per 100,000 inhabitants in 2022.

In 2022, 241,200 non-fatal gun violence incidents resulted in a single victim while the remainder resulted in multiple victims.

From 2021 to 2022, the estimated volume of adult victims of non-fatal gun violence decreased approximately 0.6 percent from 419,500 to 417,200, while the estimated volume of juvenile victims of non-fatal gun violence increased 10.6 percent, from 61,800 to 68,300.

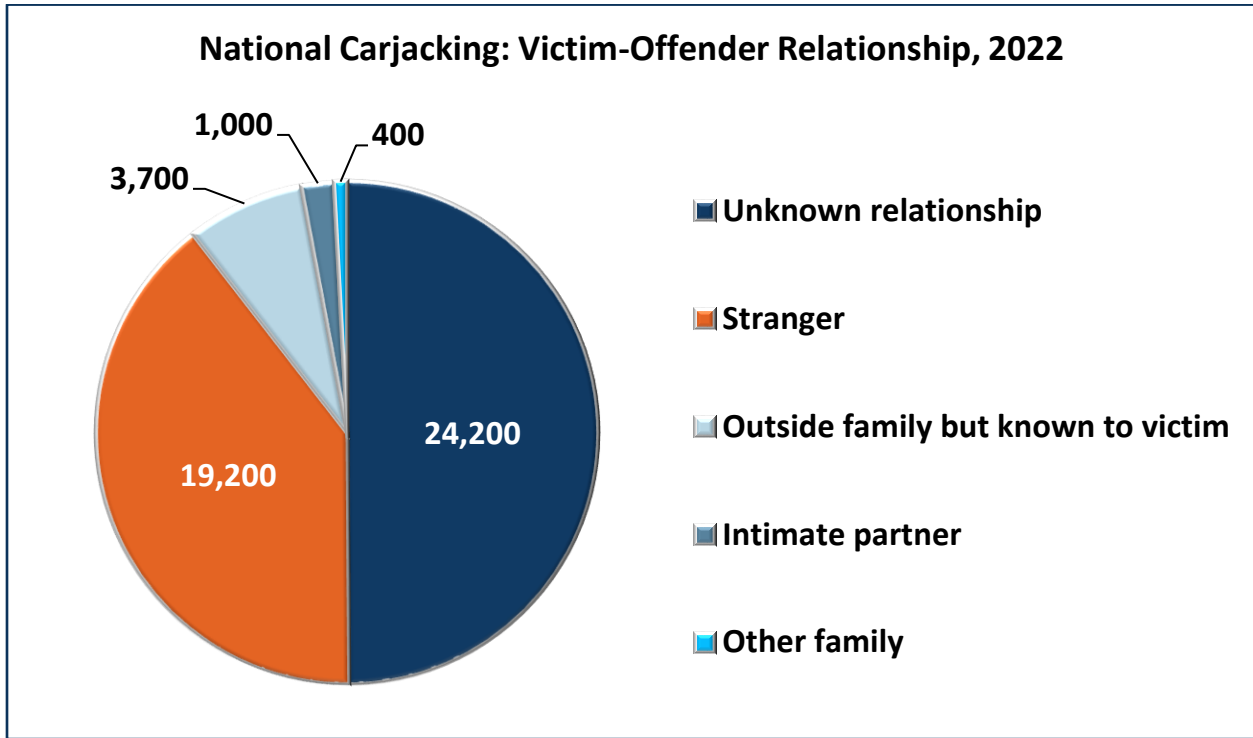

Carjacking

A new classification for 2022, estimates on carjacking are provided in *NIBRS Estimates, 2022*. The UCR Program defines carjacking as a robbery offense where the property stolen is identified as a vehicle. As a subset of robbery, carjacking is considered a property crime and as such, one carjacking offense is counted per incident (unlike motor vehicle theft, which, despite also categorized as a property crime, counts one offense per stolen vehicle).

An estimated 25,400 carjacking offenses occurred nationwide in 2022, increasing 8.1 percent from an estimated 23,500 carjacking offenses in 2021. At least one weapon was involved in an estimated 22,700 carjackings in 2022. An estimated 6,500 carjackings occurred between 8 p.m. and midnight, with an additional 5,400 estimated carjackings occurring between midnight and 4 a.m. Together, these time frames account for nearly half (49.0 percent) of all estimated carjackings with known incident times.

The most common location for carjacking offenses was transportation hubs/outdoor public locations, with an estimated 16,400 carjackings occurring in that location type in 2022. An estimated 11,400 carjackings involved 2 or more offenders, representing an estimated 13.4 percent increase compared to 2021. Of the estimated 25,400 carjackings in 2022, an estimated 27.2 percent resulted in injury. In 2022, there were an estimated 19,200 carjacking offenses where at least one offender was a stranger to at least one victim.

Motor Vehicle Theft

Motor vehicle theft increased an estimated 8.6 percent from 2021 to 2022, with nearly a million vehicles stolen in 2022. In 2022, it is estimated that nearly 70,000 people were arrested for motor vehicle theft, with 2,000 arrestees being armed with a firearm at the time of arrest.

Of the estimated 69,600 arrestees whose sex and age were known, 78.3 percent were males and 21.7 percent were females. Males under the age of 18 accounted for 17.8 percent of arrested males, and males over the age of 18 accounted for 82.2 percent of male arrestees. Females arrested under the age of 18 accounted for 13.9 percent of arrested females, and females over the age of 18 accounted for 86.1 percent of female arrestees.

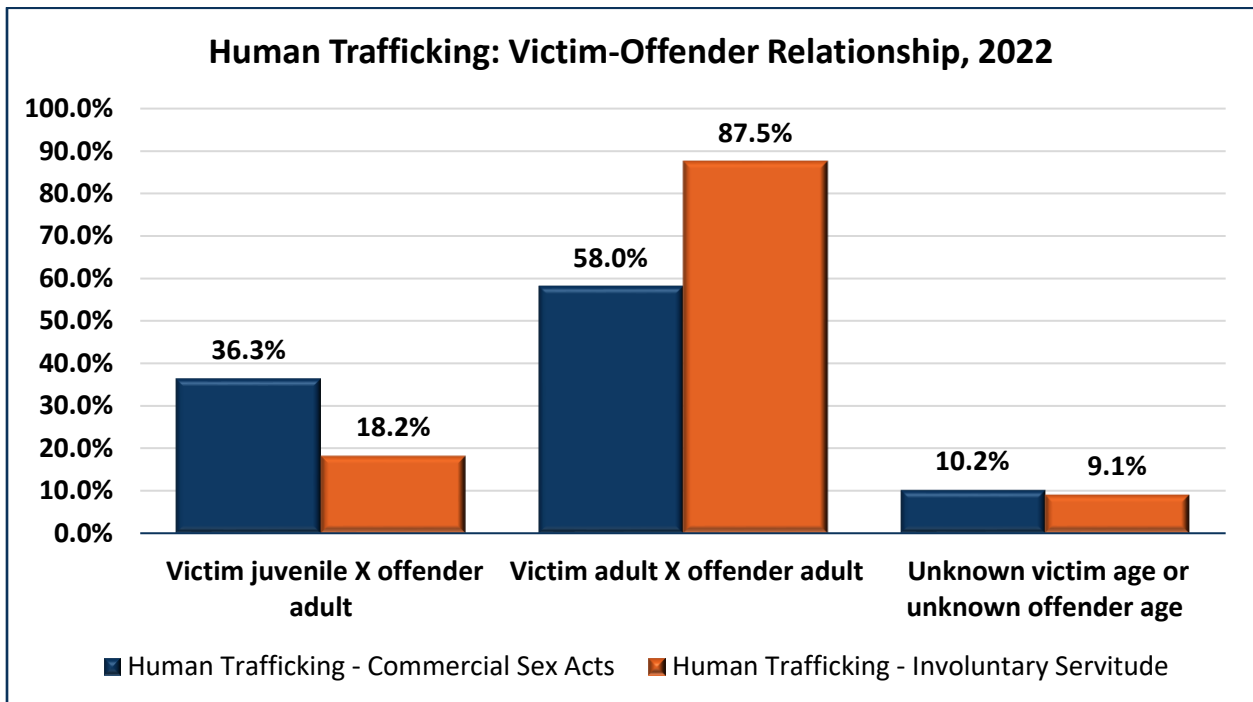

Human Trafficking

The NIBRS Crimes Against Persons offense of Human Trafficking is defined as the inducement of a person to perform a commercial sex act, or labor, or services, through force, fraud, or coercion. This offense consists of two categories: Commercial Sex Acts and Involuntary Servitude.

The proportion of Human Trafficking – Commercial Sex Acts offenses with at least one weapon involved increased from an estimated 38.8 percent of offenses in 2021 to 42.8 percent in 2022. The proportion of Human Trafficking – Involuntary Servitude offenses with at least one weapon involved increased from an estimated 44.9 percent of offenses in 2021 to 49.5 percent in 2022.

More than half (58.0 percent) of Human Trafficking – Commercial Sex Acts victims were adults victimized by at least one adult offender. The majority (87.5 percent) of Human Trafficking – Involuntary servitude victims were adults victimized by at least one adult offender.

Fraud Offenses

Aggregate totals for fraud offenses include the offenses of false pretenses/swindle/confidence game, credit card/automated teller machine fraud, impersonation, welfare fraud, and wire fraud. Overall, the data show an estimated 1.6 percent increase in total fraud offenses across the nation, from 906,000 in 2021 to 920,600 in 2022.

Fraud victims are predominantly over the age of 18, with an estimated 751,100 victims in this category in 2022. Of all victim age categories above 18, the only subcategory reflecting an estimated increase is victims 65 and older, which increased an estimated 7.1 percent from 156,300 in 2021 to 167,400 in 2022. All other “over 18” victim categories showed an estimated decrease at the national level.

Drug Offenses

Drug and narcotic offenses show a decrease across all drug types except cocaine/crack cocaine, which increased an estimated 0.8 percent from 2021 to 2022.

Drug types associated with offenses allow agencies to report a maximum of three drug types with each reported offense. However, once this maximum has been reached for an offense, agencies can report additional drug types that are coded as a separate category of “more than three types”. The estimates show a 9.3 percent decrease from 2021 to 2022 in multi-drug offenses that contained more than three drug types.

National Drug Offenses by Type of Drug, 2021 to 2022

	Cocaine/ crack cocaine	Marijuana/ hashish	Other	More than 3 types	Stimulant	Hallucino- gen	Opiate/ narcotic	Depressant	Unknown
■ Percent Change	0.8%	-3.5%	-3.8%	-9.3%	-9.7%	-11.2%	-11.7%	-18.8%	-22.0%

Conclusion

The collections included in *Crime in the Nation, 2022*, offer a variety of approaches to view an abundance of complex data. To inform a diverse nationwide audience including, but not limited to, law enforcement professionals, government officials, academia, media, and the general public, this summary outlines the available content and required publication criteria for each distinct collection. As more agencies transition to NIBRS and supply richer details on the circumstances of reported crimes, the collections will gain even more utility for all data user groups.

Crime in the Nation, 2022 reflects crime and law enforcement data received from 15,724 law enforcement agencies representing 83.3 percent of agencies actively enrolled in the UCR Program and covering 93.5 percent of the population. More than 13,000 of these agencies representing 76.9 percent of the population contributed data through NIBRS, an increase of nearly 1,500 NIBRS-contributing agencies compared to the previous year.

The value of NIBRS data is evident in this summary's data synopsis, which explores more granular aspects of criminal incidents. Going beyond counts of incidents and offenses, data consumers can analyze details like victim and arrestee demographics, clearance rates, and relationships between victims and offenders. The analytic flexibility of NIBRS prompted the creation of two new crime classifications – gun violence and carjacking – available for the first time in *Crime in the Nation, 2022*.

This summary presents a glimpse of data available within *Crime in the Nation, 2022*. All referenced collection tables are available to download through the Documents & Downloads section on the CDE website. From there, users will have the ability to view the entirety of tables, resources, and methodologies for each of the data collections.

Area Definitions

The FBI's Uniform Crime Reporting (UCR) Program collects crime data and supplemental information that make it possible to generate a variety of statistical compilations, including data presented by reporting areas. These statistics provide data users with the opportunity to analyze local crime data in conjunction with data for areas of similar geographic location or population size. The reporting areas that the UCR Program uses in its data breakdowns include community types, population groups, and regions and geographic divisions. For community types, the UCR Program considers proximity to metropolitan areas using the Office of Management and Budget's (OMB's) designations. (Generally, sheriffs, county police, and state police report crimes within counties but outside cities; local police report crimes within city limits.) The number of inhabitants living in a locale (based on the U.S. Census Bureau's figures) determines the population group into which the program places it. Finally, in its geographic breakdowns, the UCR Program divides the United States into regions and divisions.

Community types

In order to assist data users who wish to analyze and present uniform statistical data about metropolitan areas, the UCR Program uses reporting units that represent major population centers. The program compiles data for these areas according to three types of communities:

1. Metropolitan Statistical Areas (MSAs)—Each MSA contains a principal city or urbanized area with a population of at least 50,000 inhabitants. MSAs include the principal city; the county in which the city is located; and other adjacent counties that have, as defined by the OMB, a high degree of economic and social integration with the principal city and county as measured through commuting. In the UCR Program, counties within an MSA are considered metropolitan. In addition, MSAs may cross state boundaries.

Some presentations in this publication refer to Metropolitan Divisions, which are subdivisions of an MSA that consists of a core with “a population of at least 2.5 million persons. A Metropolitan Division consists of one or more main/secondary counties that represent an employment center or centers, plus adjacent counties associated with the

main county or counties through commuting ties,” (*Federal Register* 65 [249]). Also, some tables reference suburban areas, which are subdivisions of MSAs that exclude the principal cities but include all the remaining cities (those having fewer than 50,000 inhabitants) and the unincorporated areas of the MSAs.

Note: Because the elements that comprise MSAs (particularly the geographic compositions) are subject to change, the program discourages data users from making year-to-year comparisons of MSA data.

2. Cities Outside MSAs—Ordinarily, cities outside MSAs are incorporated areas.

3. Nonmetropolitan Counties Outside MSAs—Most nonmetropolitan counties are composed of unincorporated areas.

Community types are further illustrated in the following table:

Metropolitan	Nonmetropolitan
Principal Cities (50,000+ inhabitants)	Cities outside Metropolitan Areas
Suburban Cities	
Metropolitan Counties	Nonmetropolitan Counties

Population groups

The UCR Program uses the following population group designations:

Population Group	Political Label	Population Range
I	City	250,000 and more
II	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI ^{1, 2}	City	Less than 10,000
VIII (Nonmetropolitan County) ²	County	N/A
IX (Metropolitan County) ²	County	N/A

¹Includes universities and colleges to which no population is attributed.

²Includes state police to which no population is attributed.

Individual law enforcement agencies are the source of UCR data. The number of agencies included in each population group may vary from year to year because of population growth, geopolitical consolidation, municipal incorporation, etc. In noncensus years, the UCR Program estimates population figures for individual jurisdictions. (A more comprehensive explanation of population estimations can be found in the *Methodology*.)

The table below shows the number of agencies within each population group that were eligible to participate in the UCR Program for 2022:

Population Group	Number of Agencies	Population Covered
I	90	62,644,813
II	239	34,629,735
III	517	35,951,702
IV	949	32,756,627
V	1,963	31,243,071
VI ^{1, 2}	10,105	26,028,640
VIII (Nonmetropolitan County) ²	2,804	27,354,965
IX (Metropolitan County) ²	2,217	82,678,004
Total	18,884	333,287,557

¹Includes universities and colleges to which no population is attributed.

²Includes state police to which no population is attributed.

Regions and divisions

The map below illustrates the four regions of the United States along with their nine geographic divisions as established by the U.S. Census Bureau. The UCR Program uses this widely recognized geographic organization when compiling the nation's crime data.

The following table lists the 50 states and the District of Columbia arranged according to the regions and geographic divisions of the United States.

NORTHEASTERN STATES

New England	Middle Atlantic
Connecticut	New Jersey
Maine	New York
Massachusetts	Pennsylvania
New Hampshire	
Rhode Island	
Vermont	

MIDWESTERN STATES

East North Central	West North Central
Illinois	Iowa
Indiana	Kansas
Michigan	Minnesota
Ohio	Missouri
Wisconsin	Nebraska
	North Dakota
	South Dakota

SOUTHERN STATES

South Atlantic	East South Central
Delaware	Alabama
District of Columbia	Kentucky
Florida	Mississippi
Georgia	Tennessee
Maryland	West South Central
North Carolina	Arkansas
South Carolina	Louisiana
Virginia	Oklahoma
West Virginia	Texas

WESTERN STATES

Mountain	Pacific
Arizona	Alaska
Colorado	California
Idaho	Hawaii

Montana	Oregon
Nevada	Washington
New Mexico	
Utah	
Wyoming	

Offense Definitions

The Uniform Crime Reporting (UCR) Program's Summary Reporting System divides offenses into two groups, Part I and Part II crimes. For traditional presentations of data, such as the annual *Crime in the United States* publication, data submitted through the National Incident Based Reporting System (NIBRS) is converted to Summary. Each month participating law enforcement agencies submit information on the number of offenses that become known to them; those offenses cleared by arrest or exceptional means; and the age, sex, and race of persons arrested for each of the offenses. Summary reporting contributors provide only arrest data for Part II offenses.

The UCR Program collects data about **Part I** offenses in order to measure the level and scope of crime occurring throughout the nation. The program's founders chose these offenses because they are serious crimes, they occur with regularity in all areas of the country, and they are likely to be reported to the police. The **Part I** offenses are:

Criminal homicide—a.) Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, and accidental deaths are excluded. The program classifies justifiable homicides separately and limits the definition to: (1) the killing of a felon by a law enforcement officer in the line of duty; or (2) the killing of a felon, during the commission of a felony, by a private citizen. b.) Manslaughter by negligence: the killing of another person through gross negligence. Deaths of persons due to their own negligence, accidental deaths not resulting from gross negligence, and traffic fatalities are not included in the category manslaughter by negligence.

Rape—The penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.

Robbery—The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated assault—An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

Burglary (breaking or entering)—The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny-theft (except motor vehicle theft)—The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles, motor vehicle parts and accessories, shoplifting, pocket-picking, or the stealing of any property or article that is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, confidence games, forgery, check fraud, etc., are excluded.

Motor vehicle theft—The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on land surface and not on rails. Motorboats, construction equipment, airplanes, and farming equipment are specifically excluded from this category.

Arson—Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Human trafficking, commercial sex acts—Inducing a person by force, fraud, or coercion to participate in commercial sex acts, or in which the person induced to perform such act(s) has not attained 18 years of age.

Human trafficking, involuntary servitude—The obtaining of a person(s) through recruitment, harboring, transportation, or provision, and subjecting such persons by force, fraud, or coercion into involuntary servitude, peonage, debt bondage, or slavery (not to include commercial sex acts).

The **Part II** offenses, for which only arrest data are collected, are:

Other assaults (simple)—Assaults and attempted assaults where no weapon was used or no serious or aggravated injury resulted to the victim. Stalking, intimidation, coercion, and hazing are included.

Forgery and counterfeiting—The altering, copying, or imitating of something, without authority or right, with the intent to deceive or defraud by passing the copy or thing altered or imitated as that which is original or genuine; or the selling, buying, or possession of an altered, copied, or imitated thing with the intent to deceive or defraud. Attempts are included.

Fraud—The intentional perversion of the truth for the purpose of inducing another person or other entity in reliance upon it to part with something of value or to surrender a legal right. Fraudulent conversion, obtaining of money or property by false pretenses, confidence games, and bad checks, except forgeries and counterfeiting, are included.

Embezzlement—The unlawful misappropriation or misapplication by an offender to his/her own use or purpose of money, property, or some other thing of value entrusted to his/her care, custody, or control.

Stolen property: buying, receiving, possessing—Buying, receiving, possessing, selling, concealing, or transporting any property with the knowledge that it has been unlawfully taken, as by burglary, embezzlement, fraud, larceny, robbery, etc. Attempts are included.

Vandalism—To willfully or maliciously destroy, injure, disfigure, or deface any public or private property, real or personal, without the consent of the owner or person having custody or control by cutting, tearing, breaking, marking, painting, drawing, covering with filth, or any other such means as may be specified by local law. Attempts are included.

Weapons: carrying, possessing, etc.—The violation of laws or ordinances prohibiting the manufacture, sale, purchase, transportation, possession, concealment, or use of firearms, cutting instruments, explosives, incendiary devices, or other deadly weapons. Attempts are included.

Prostitution and commercialized vice—The unlawful promotion of or participation in sexual activities for profit.

Sex offenses (except rape, prostitution, and commercialized vice)—Offenses against chastity, common decency, morals, and the like.

Drug abuse violations—The violation of laws prohibiting the production, distribution, and/or use of certain controlled substances. The unlawful cultivation, manufacture, distribution, sale, purchase, use, possession, transportation, or importation of any controlled drug or narcotic substance. Arrests for violations of state and local laws, specifically those relating to the unlawful possession, sale, use, growing, manufacturing, and making of narcotic drugs. The following drug categories are specified: opium or cocaine and their derivatives (morphine, heroin, codeine); marijuana; synthetic narcotics—manufactured narcotics that can cause true addiction (Demerol, methadone); and dangerous nonnarcotic drugs (barbiturates, Benzedrine).

Gambling—To unlawfully bet or wager money or something else of value; assist, promote, or operate a game of chance for money or some other stake; possess or transmit wagering information; manufacture, sell, purchase, possess, or transport gambling equipment, devices, or goods; or tamper with the outcome of a sporting event or contest to gain a gambling advantage.

Offenses against the family and children—Unlawful nonviolent acts by a family member (or legal guardian) that threaten the physical, mental, or economic well-being or morals of another family member and that are not classifiable as other offenses, such as assault or sex offenses. Attempts are included.

Driving under the influence—Driving or operating a motor vehicle or common carrier while mentally or physically impaired as the result of consuming an alcoholic beverage or using a drug or narcotic.

Liquor laws—The violation of state or local laws or ordinances prohibiting the manufacture, sale, purchase, transportation, possession, or use of alcoholic beverages, not including driving under the influence and drunkenness. Federal violations are excluded.

Drunkenness—To drink alcoholic beverages to the extent that one's mental faculties and physical coordination are substantially impaired. Driving under the influence is excluded.

Disorderly conduct—Any behavior that tends to disturb the public peace or decorum, scandalize the community, or shock the public sense of morality.

Vagrancy—The violation of a court order, regulation, ordinance, or law requiring the withdrawal of persons from the streets or other specified areas; prohibiting persons from remaining in an area or place in an idle or aimless manner; or prohibiting persons from going from place to place without visible means of support.

All other offenses—All violations of state or local laws not specifically identified as Part I or Part II offenses, except traffic violations.

Suspicion—Arrested for no specific offense and released without formal charges being placed.

Curfew and loitering laws (persons under age 18)—Violations by juveniles of local curfew or loitering ordinances.

¹ Populations are U.S. Census Bureau provisional estimates as of July 1 for each year except 2000 and 2010, which are decennial census counts.² The violent crime figures include the offenses of murder, rape (legacy definition), robbery, and aggravated assault.³ The figures shown in this column for the offense of rape were estimated using the revised UCR definition of rape. See data declaration for further explanation.⁴ The figures shown in this column for the offense of rape were estimated using the legacy UCR definition of rape. See data declaration for further explanation.⁵ The crime figures have been adjusted.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Therefore, no arson data are published in this table.

¹ Population figures are U.S. Census Bureau provisional estimates as of July 1, 2020.

² The percentage reported under "Area actually reporting" is based upon the population covered by agencies providing 3 months or more of crime reports to the FBI.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Therefore, no arson data are published in this table.

Table 3**Crime in the United States**

Offense and Population Percent Distribution by Region, 2022

Region	Population	Violent crime	Murder and nonnegligent manslaughter	Rape	Robbery	Aggravated assault	Property crime	Burglary	Larceny-theft	Motor vehicle theft
United States Total¹	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Northeast	17.1%	13.7%	11.7%	11.7%	18.3%	12.9%	13.0%	9.4%	14.6%	8.6%
Midwest	20.6%	18.4%	20.1%	24.6%	15.9%	18.1%	18.3%	17.4%	18.1%	19.7%
South	38.6%	39.6%	47.2%	37.6%	31.7%	41.7%	39.0%	40.6%	40.0%	32.6%
West	23.6%	28.2%	21.0%	26.1%	34.2%	27.2%	29.7%	32.6%	27.3%	39.1%

¹ Because of rounding, the percentages may not add to 100.0.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Therefore, no arson data are published in this table.

¹ The previous year's crime figures have been adjusted.

² Population figures are U.S. Census Bureau provisional estimates as of July 1, 2020.

³ Limited data for 2022 were available for Florida, Illinois, Maryland, and Pennsylvania.

⁴ Includes offenses reported by the Metro Transit Police and the District of Columbia Fire and Emergency Medical Services: Arson Investigation Unit.

* Less than one-tenth of 1 percent.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Therefore, no arson data are published in this table.

¹ Population figures are U.S. Census Bureau provisional estimates as of July 1, 2020.

² Includes offenses reported by the Metro Transit Police and the District of Columbia Fire and Emergency Medical Services: Arson Investigation Unit.

³ Limited data for 2022 were available for Florida, Illinois, Maryland, and Pennsylvania.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Therefore, no arson data are published in this table.

¹ The crime figures have been adjusted.² Because of rounding, the number of offenses may not add to the total.

Offenses Known to Law Enforcement

The FBI's Uniform Crime Reporting (UCR) Program collects the number of offenses that come to the attention of law enforcement for violent crime and property crime, as well as data regarding clearances of these offenses. In addition, the FBI collects auxiliary information about these offenses (e.g., time of day of burglaries). The expanded offense data include trends in both crime volume and crime rate per 100,000 inhabitants. Finally, the UCR Program collects expanded homicide data, which includes information about homicide victims and offenders, weapons used, the circumstances surrounding the offenses, and justifiable homicides.

Violent Crime

Violent crime is composed of four offenses: murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Violent crimes are defined in the UCR Program as those offenses that involve force or threat of force.

The Violent Crime topic page provides more information about violent crime and an overview of violent crime data for 2022.

Property Crime

Property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson. The object of the theft-type offenses is the taking of money or property, but there is no force or threat of force against the victims.

The Property Crime topic page provides more information about property crime and an overview of property crime data for 2022.

Clearances

Within the UCR Program, law enforcement agencies can clear, or “close,” offenses in one of two ways: by arrest or by exceptional means. Although agencies may administratively close a case, this does not necessarily mean that the agency can clear the offense for UCR purposes.

The Clearances topic page provides more information about the criteria used to clear an offense for UCR purposes and an overview of clearance data for 2022.

Expanded offense data

The FBI collects the number of offenses for the crimes of murder and nonnegligent manslaughter, rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson through the UCR Program. In addition to the number of offenses known to the police, the FBI also collects other data about these offenses, such as the locations of robberies, time of day of burglaries, and types of larcenies. These expanded data include 2-year trends concerning additional information about select offenses (e.g., type of weapon), 2-year trends for crime volumes, and current year crime rates per 100,000 inhabitants.

See the Expanded Offense Data topic page for more information.

Expanded homicide data

The Expanded Homicide Data section of this publication provides information regarding the age, sex, race, and ethnicity of both the murder victim and the offender; the type of weapon used in the murder; the relationship of the victim to the offender; and the circumstance surrounding the incident. These data also include information about justifiable homicides.

See the Expanded Homicide Data topic page for more information.

¹ The student enrollment figures provided by the United States Department of Education are for the 2021 school year, the most recent available. The enrollment figures include full-time and part-time students.

² The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.

³ Student enrollment figures were not available.

⁴ Limited data for 2022 were available for Florida, Illinois, Maryland, and Pennsylvania.

NOTE: Caution should be exercised in making any intercampus comparisons or ranking schools because university/college crime statistics are affected by a variety of factors. These include demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of the campus to outside visitors, size of enrollment, etc.

Table 10**Offenses Known to Law Enforcement****by State by Metropolitan and Nonmetropolitan Counties, 2022**

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office or county police department.]

¹The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.

²Limited data for 2022 were available for Florida, Illinois, Maryland, and Pennsylvania.

Crime clock long description

This representation of crime data shows the relative frequency of how often violent and property crime offenses occurred in 2022. (Note that the Crime Clock should not be taken to imply regularity in the commission of crime. The Crime Clock represents the annual ratio of crime to fixed time intervals.) A violent crime was committed every 25.6 seconds. A murder occurred every 24.8 minutes, a rape every 3.9 minutes, a robbery every 2.4 minutes, and an aggravated assault every 35.3 seconds. A property crime offense was committed every 4.8 seconds. A burglary offense occurred every 35.1 seconds, a larceny-theft every 6.7 seconds, and a motor vehicle theft every 33.5 seconds.

2022 CRIME CLOCK STATISTICS

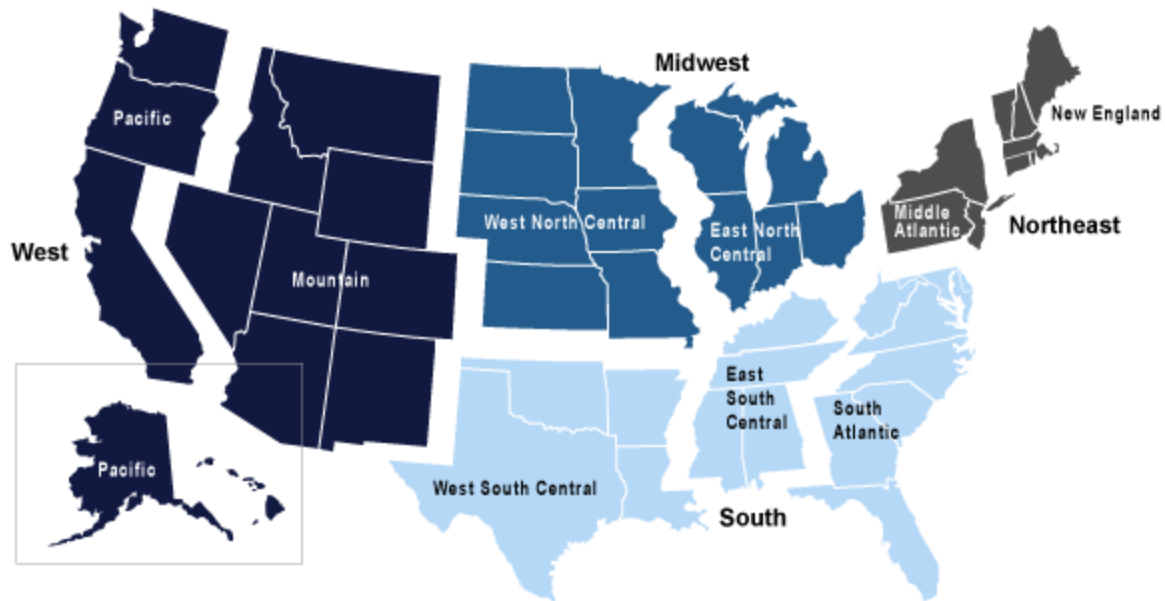

A Violent Crime occurred every	25.6 seconds
One Murder every	24.8 minutes
One Rape every	3.9 minutes
One Robbery every	2.4 minutes
One Aggravated Assault every	35.3 seconds

A Property Crime occurred every	4.8 seconds
One Burglary every	35.1 seconds
One Larceny-theft every	6.7 seconds
One Motor Vehicle Theft every	33.5 seconds

Regional map figure

This map illustrates the four regions of the United States along with their nine geographic divisions as established by the U.S. Census Bureau.

Regional crime rates figure long description

This figure is a bar graph that presents the number of property and violent crimes per 100,000 inhabitants for the four regions of the nation in 2022, along with a map that defines the four regions by shading. The regional rates for violent and property crimes per 100,000 inhabitants were as follows: in the Northeast, 1,484.8 property crimes and 305.0 violent crimes; in the Midwest, 1,728.9 property crimes and 340.3 violent crimes; in the South, 1,974.9 property crimes and 390.5 violent crimes; and in the West, 2,458.0 property crimes and 454.9 violent crimes. The statistics for this figure are derived from Table 4.

Violent Crime

Definition

In the FBI's Uniform Crime Reporting (UCR) Program, violent crime is composed of four offenses: murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Violent crimes are defined in the UCR Program as those offenses that involve force or threat of force.

Data collection

The data presented in *Crime in the United States* reflect the Hierarchy Rule, which requires that only the most serious offense in a multiple-offense criminal incident be counted. The descending order of UCR violent crimes are murder and nonnegligent manslaughter, rape, robbery, and aggravated assault, followed by the property crimes of burglary, larceny-theft, and motor vehicle theft. Although arson is also a property crime, the Hierarchy Rule does not apply to the offense of arson. In cases in which an arson occurs in conjunction with another violent or property crime, both the arson and the additional crime are reported.

In 2016, the FBI Director approved the recommendation to discontinue reporting of rape data using the UCR legacy definition beginning in 2017. However, to maintain the 20-year trend in Table 1, the rape total for the legacy definition is used to calculate the violent crime total.

Overview

- In 2022, an estimated 1,232,428 violent crimes occurred nationwide, a decrease of 1.7 percent from the 2021 estimate. (See Tables 1 and 1A.)
- When considering 5- and 10-year trends, the 2022 estimated violent crime total was 0.9 percent above the 2018 level and 5.3 percent above the 2013 level. (See Tables 1 and 1A.)
- There were an estimated 369.8 violent crimes per 100,000 inhabitants in 2022, a rate that decreased 2.1 percent when compared with the 2021 estimated violent

crime rate and decreased 0.2 percent from the 2013 estimate. (See Tables 1 and 1A.)

- Aggravated assaults accounted for 72.5 percent of violent crimes reported to law enforcement in 2022. Robbery offenses accounted for 17.9 percent of violent crime offenses; rape (legacy definition) accounted for 7.9 percent; and murder accounted for 1.7 percent. (Based on Table 1.)
- Information collected regarding types of weapons used in violent crimes showed that firearms were used in 77.0 percent of the nation's murders, 37.1 percent of robberies, and 36.6 percent of aggravated assaults. (Weapons data are not collected for rape.) (See Expanded Homicide Data Table 7, Robbery Table 3, and the Aggravated Assault Table.)

Violent crime long description

This figure is a line graph that presents trends in the estimated number of violent crimes for the nation from 2018 through 2022. In 2018, there were 1,221,594 violent crimes. In 2019, there were 1,194,626 violent crimes. In 2020, there were 1,269,217 violent crimes. In 2021, there were 1,253,716 violent crimes. In 2022, there were 1,232,428 violent crimes. The figure is based on statistics from Table 1.

Violent Crime Offense Figure

Five-Year Trend, 2018-2022

Estimated
number of offenses

Murder

Definition

The FBI's Uniform Crime Reporting (UCR) Program defines murder and nonnegligent manslaughter as the willful (nonnegligent) killing of one human being by another.

The classification of this offense is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. The UCR Program does not include the following situations in this offense classification: deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are classified as aggravated assaults.

Data collection

In addition to the number of murder offenses known, the UCR Program also encourages law enforcement agencies to report supplementary homicide data as well as information about justifiable homicides that may have occurred within their jurisdictions.

Supplementary Homicide Data—The UCR Program's supplementary homicide data provide information regarding the age, sex, race, and ethnicity of the murder victim and the offender; the type of weapon used; the relationship of the victim to the offender; and the circumstances surrounding the incident. Law enforcement agencies are asked—but not required—to provide complete supplementary homicide data for each murder they report to the UCR Program. Information gleaned from these supplementary homicide data can be viewed in the Expanded Homicide Data section.

Justifiable homicide—Certain willful killings must be reported as justifiable or excusable. In the UCR Program, justifiable homicide is defined as and limited to:

- The killing of a felon by a peace officer in the line of duty.
- The killing of a felon, during the commission of a felony, by a private citizen.

Because these killings are determined through law enforcement investigation to be justifiable, they are tabulated separately from murder and nonnegligent manslaughter.

More information about justifiable homicide is furnished in the Expanded Homicide Data section and in Expanded Homicide Data Table 14, “Justifiable Homicide by Weapon, Law Enforcement, 2018–2022,” and Expanded Homicide Data Table 15, “Justifiable Homicide by Weapon, Private Citizen, 2018–2022.”

Overview

- In 2022, the estimated number of murders in the nation was 21,156. This was a 6.1 percent decrease from the 2021 estimate, a 24.9 percent increase from the 2018 figure, and a 47.7 percent increase from the number in 2013. (See Tables 1 and 1A.)
- There were 6.3 murders per 100,000 people in 2022. The murder rate in 2022 was down from the rate in 2021 (6.5 percent). The murder rate was up 22.6 percent when compared with the 2018 rate and 40.1 percent from the 2013 rate. (See Tables 1 and 1A.)
- Of the estimated number of murders in the United States, 47.2 percent were reported in the South, 21.0 percent were reported in the West, 20.1 percent were reported in the Midwest, and 11.7 percent were reported in the Northeast. (See Table 3.)

Expanded data

UCR expanded offense data are details of the various offenses that the UCR Program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapon used in a crime, type or value of items stolen, and so forth. In addition, expanded data include trends (for example, 2-year comparisons) and rates per 100,000 inhabitants.

Expanded information regarding murder is available in the following tables:

Trends (2-year): Tables 12, 13, and 14

Rates (per 100,000 inhabitants): Tables 16, 17, and 18

Expanded Homicide Data (supplementary homicide information):

Victim data: Expanded Homicide Data Tables 1, 2, 4, 5, 6, 8, 9, 10, 12, and 13

Offender data: Expanded Homicide Data Tables 3, 5, and 6

Victim/offender relationship data: Expanded Homicide Data Table 10

Circumstance data: Expanded Homicide Data Tables 10, 11, 12, and 13

Weapons data: Expanded Homicide Data Tables 7, 8, 9, 11, 14, 15, and Table 20

¹ Total number of murders for which supplemental homicide data were received.² Pushed is included in hands, fists, feet, etc.³ Limited data for 2022 were available for Florida, Illinois, Maryland, and Pennsylvania.

Rape

Definition

In 2013, the FBI Uniform Crime Reporting (UCR) Program began collecting rape data under a revised definition within the Summary Reporting System. Previously, offense data for forcible rape were collected under the legacy UCR definition: the carnal knowledge of a female forcibly and against her will. Beginning with the 2013 data year, the term “forcible” was removed from the offense title, and the definition was changed. The revised UCR definition of rape is penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim. Attempts or assaults to commit rape are also included in the statistics presented here; however, statutory rape and incest are excluded.

In 2016, the FBI Director approved the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017. However, to maintain the 20-year trend in Table 1, national estimates for rape under the legacy definition are provided along with estimates under the revised definition for 2017.

Data collection

The UCR Program counts one offense for each victim of a rape, attempted rape, or assault with intent to rape, regardless of the victim’s age. Non-consensual sexual relations involving a familial member is considered rape, not incest. All other crimes of a sexual nature are considered to be Part II offenses; as such, the UCR Program collects only arrest data for those crimes. The offense of statutory rape, in which no force is used but the female victim is under the age of consent, is included in the arrest total for the sex offenses category.

Overview

There were an estimated 133,294 rapes (revised definition) reported to law enforcement in 2022. This estimate was 5.4 percent lower than the 2021 estimate and 9.0 percent lower than the 2018 estimate. (See Tables 1 and 1A.)

Expanded data

Expanded offense data are the details of the various offenses that the UCR Program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapon used in a crime, type or value of items stolen, and so forth. In addition, expanded data include trends (for example, 2-year comparisons) and rates per 100,000 inhabitants.

Expanded information regarding rape is available in the following tables:

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Robbery location figure description

This figure is a pie chart that shows the percentages of robbery offenses by location type in 2020. In the nation, 31.8 percent of robbery offenses occurred on streets or highways, 19.4 percent occurred at commercial houses, 15.6 percent occurred at residences, 6.6 percent occurred at convenience stores, 3.9 percent occurred at gas or service stations, 1.4 percent occurred at banks, and 21.4 percent occurred at miscellaneous locations.

Robbery Location Figure

Percent Distribution,¹ 2022

¹ Due to rounding, the percentages may not add to 100.0.

Robbery

Definition

The FBI's Uniform Crime Reporting (UCR) Program defines robbery as taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Overview

- There were an estimated 220,450 robberies nationwide in 2022. The estimated number of robberies increased 1.3 percent from the 2021 estimate and decreased 21.9 percent from the 2018 estimate. The 2022 estimate was down 36.4 percent from the 2013 estimate. (See Tables 1 and 1A.)
- The estimated robbery rate of 66.1 per 100,000 inhabitants in 2022 showed an increase of 1.0 percent when compared with the 2021 rate. (See Tables 1 and 1A.)
- Among the robberies for which the UCR Program received weapon information in 2022, strong-arm tactics were used in 42.5 percent, firearms in 37.1 percent, and knives or cutting instruments in 8.5 percent. Other dangerous weapons were used in 11.8 percent of robberies in 2022. (Based on Table 19.)

Expanded data

Expanded offense data are the details of the various offenses that the UCR Program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapon used in a crime, type or value of items stolen, and so forth. In addition, expanded data include trends (for example, 2-year comparisons) and rates per 100,000 inhabitants.

Expanded information regarding robbery is available in the following tables:

Aggravated Assault

Definition

The FBI's Uniform Crime Reporting (UCR) Program defines aggravated assault as an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. The UCR Program further specifies that this type of assault is usually accompanied by the use of a weapon or by other means likely to produce death or great bodily harm. Attempted aggravated assault that involves the display of—or threat to use—a gun, knife, or other weapon is included in this crime category because serious personal injury would likely result if the assault were completed. When aggravated assault and larceny-theft occur together, the offense falls under the category of robbery.

Overview

- In 2022, there were an estimated 893,980 aggravated assaults in the nation. The estimated number of aggravated assaults decreased 1.1 percent when compared with the 2021 estimate and increased 22.6 percent when compared with the 2013 estimate. (See Tables 1 and 1A.)
- The estimated rate of aggravated assaults in 2022 was 268.2 per 100,000 inhabitants. From 2013 to 2022, the rate of aggravated assaults increased 16.3 percent. (See Tables 1 and 1A.)
- Of the aggravated assault offenses for which law enforcement provided expanded data in 2022, 36.6 percent were committed with firearms. Personal weapons, such as hands, fists, or feet, were used in 19.8 percent of aggravated assaults, and knives or cutting instruments were used in 15.7 percent. Other weapons were used in 27.9 percent of aggravated assaults. (Based on Table 19.)

Expanded data

Expanded offense data are the details of the various offenses that the UCR Program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapon used in a crime, type or value of items stolen, and

so forth. In addition, expanded data include trends (for example, 2-year comparisons) and rates per 100,000 inhabitants.

Expanded information regarding aggravated assault is available in the following tables:

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Property crime long description

This figure is a line graph that presents the trend in the estimated number of property crimes for the nation from 2018 to 2022. In 2018, there were 7,398,241 property crimes. In 2019, there were 6,999,989 property crimes. In 2020, there were 6,470,751 property crimes. In 2021, there were 6,083,874 property crimes. In 2022, there were 6,513,829 property crimes. The figure is based on statistics from Table 1.

Property Crime Offense Figure

Five-Year Trend, 2018-2022

Estimated
number of offenses

Property Crime

Definition

In the FBI's Uniform Crime Reporting (UCR) Program, property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson. The object of the theft-type offenses is the taking of money or property, but there is no force or threat of force against the victims. The property crime category includes arson because the offense involves the destruction of property; however, arson victims may be subjected to force. Because of limited participation and varying collection procedures by local law enforcement agencies, only limited data are available for arson. Arson statistics are included in trend, clearance, and arrest tables throughout *Crime in the United States*, but they are not included in any estimated volume data. The arson section in this report provides more information on that offense.

Data collection

The data presented in *Crime in the United States* reflect the Hierarchy Rule, which requires that only the most serious offense in a multiple-offense criminal incident be counted. In descending order of severity, the violent crimes are murder and nonnegligent manslaughter, rape, robbery, and aggravated assault, followed by the property crimes of burglary, larceny-theft, and motor vehicle theft. Although arson is also a property crime, the Hierarchy Rule does not apply to the offense of arson. In cases in which arson occurs in conjunction with another violent or property crime, both crimes are reported.

Overview

- In 2022, there were an estimated 6,513,829 property crime offenses in the nation. The 2-year trend showed that property crime offenses increased 7.1 percent in 2022 when compared with the 2021 estimate. The 10-year trend showed that property crime offenses decreased 24.9 percent in 2022 when compared with the 2013 estimate. (See Tables 1 and 1A.)
- In 2022, the rate of property crime was estimated at 1,954.4 per 100,000 inhabitants, a 6.7 percent increase when compared with the 2021 estimated rate.

The 2022 property crime rate was 13.6 percent less than the 2018 estimate and 28.8 percent less than the 2013 estimate. (See Tables 1 and 1A.)

- Larceny-theft accounted for 71.7 percent of all property crimes in 2022. Motor vehicle theft for 14.5 percent, and burglary accounted for 13.8 percent. (Based on Table 1.)

¹ Due to technical system changes and data quality issues, some property stolen and recovered data may be inflated.

Burglary

Definition

The FBI's Uniform Crime Reporting (UCR) Program defines burglary as the unlawful entry of a structure to commit a felony or theft. To classify an offense as a burglary, the use of force to gain entry need not have occurred. The UCR Program has three subclassifications for burglary: forcible entry, unlawful entry where no force is used, and attempted forcible entry. The UCR definition of "structure" includes an apartment, barn, house trailer, or houseboat when used as a permanent dwelling, office, railroad car (but not automobile), stable, or vessel (i.e., ship).

Overview

- In 2022, there were an estimated 899,293 burglaries. The number of burglaries decreased 29.1 percent when compared with 2018 data and was down 53.5 percent when compared with the 2013 estimate. (See Tables 1 and 1A.)
- Burglaries accounted for 13.8 percent of the estimated number of property crimes. (Based on Table 1.)
- By subcategory, 56.9 percent of burglaries involved forcible entry, 36.9 percent were unlawful entries, and 6.2 percent were attempted forcible entry. (Based on Table 19.)
- Burglaries of residential properties accounted for 53.0 percent of all burglary offenses. (Based on Table 23.)

Expanded data

Expanded offense data are the details of the various offenses that the UCR Program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapon used in a crime, the type or value of items stolen, and so forth. In addition, expanded data include trends (for example, 2-year comparisons) and rates per 100,000 inhabitants.

Expanded information regarding burglary is available in the following tables:

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Offense Analysis: Tables 7 and 23

Larceny-theft figure long description

This figure is a pie chart that breaks down (by percent distribution) the types of larceny-thefts that occurred in 2022. In the nation, 23.7 percent of larceny-theft offenses were from motor vehicles (except accessories), 21.2 percent were shoplifting, 8.1 percent were from buildings, 12.3 percent were motor vehicle accessories, 2.7 percent were bicycles, 0.7 percent were pocket-picking, 0.3 percent were purse-snatching, and 0.1 percent were from coin-operated machines. All other larceny-thefts accounted for the remaining 30.8 percent.

Larceny-theft Figure

Percent Distribution,¹ 2022

¹ Due to rounding, the percentages may not add to 100.0.

Larceny-theft

Definition

The FBI's Uniform Crime Reporting (UCR) Program defines larceny-theft as the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles, thefts of motor vehicle parts and accessories, shoplifting, pocket-picking, or the stealing of any property or article that is not taken by force, violence, or fraud. Attempted larcenies are included in offense totals. Embezzlement, confidence games, forgery, check fraud, etc., are excluded.

Overview

- In 2022, there were an estimated 4,672,363 larceny-thefts nationwide. The number of larceny-thefts increased 7.8 percent when compared with the 2021 estimate. The number decreased 12.9 percent when compared with the 2018 estimate, and it declined 22.6 percent when compared with the 2013 estimate. (See Table 1.)
- The rate of estimated larceny-thefts in 2022 was 1,401.9 per 100,000 inhabitants. From 2021 to 2022, the rate of estimated larceny-thefts increased 7.4 percent, and from 2013 to 2022, the rate decreased 26.6 percent. (See Tables 1 and 1A.)
- Larceny-thefts accounted for an estimated 71.7 percent of property crimes in 2022. (Based on Table 1.)
- Thefts from motor vehicles accounted for 23.7 percent of all larceny-thefts in 2022. (See Table 23.)

Expanded data

Expanded offense data are the details of the various offenses that the UCR Program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapon used in a crime, type or value of items stolen, and so forth. In addition, expanded data include trends (for example, 2-year comparisons) and rates per 100,000 inhabitants.

Expanded information regarding larceny-theft is available in the following tables:

Trends (2-year): Tables 12, 13, and 14

Rates (per 100,000 inhabitants): Tables 16, 17, and 18

Motor Vehicle Theft

Definition

In the FBI's Uniform Crime Reporting (UCR) Program, motor vehicle theft is defined as the theft or attempted theft of a motor vehicle. A motor vehicle is defined in the UCR Program as a self-propelled vehicle that runs on land surfaces and not on rails. Examples of motor vehicles include sport utility vehicles, automobiles, trucks, buses, motorcycles, motor scooters, all-terrain vehicles, and snowmobiles. Motor vehicle theft does not include farm equipment, bulldozers, airplanes, construction equipment, or watercraft such as motorboats, sailboats, houseboats, or jet skis. The taking of a motor vehicle for temporary use by persons having lawful access is excluded from this definition.

Overview

- There were an estimated 942,173 thefts of motor vehicles nationwide in 2022. The estimated rate of motor vehicle thefts was 282.7 per 100,000 inhabitants. (See Table 1.)
- The estimated number of motor vehicle thefts increased 10.9 percent in 2022 when compared with the 2021 estimates, rose 22.9 percent when compared with the 2018 estimates, and increased 33.8 percent when compared with the 2013 estimates. (See Table 1A.)
- In 2022, of all motor vehicles stolen, 76.6 percent were automobiles. (Based on Table 19.)

Expanded data

Expanded offense data are the details of the various offenses that the UCR Program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapon used in a crime, type or value of items stolen, and so forth. In addition, expanded data include trends (for example, 2-year comparisons) and rates per 100,000 inhabitants.

Expanded information regarding motor vehicle theft is available in the following tables:

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Arson

Definition

The FBI's Uniform Crime Reporting (UCR) Program defines arson as any willful or malicious burning or attempting to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Data collection

Only the fires that investigation determined to have been willfully set are included in this arson data collection. Fires labeled as suspicious or of unknown origin are excluded from these data. Points to consider regarding arson statistics include:

- This data collection does not include any estimates for arson because the degree of reporting arson offenses varies from agency to agency. Because of this disparity in reporting, arson offenses are excluded from Tables 1-7, all of which contain offense estimations.
- Arson rates are calculated based upon data received from all law enforcement agencies that provide the UCR Program with data for 12 complete months and are presented in Arson Table 1.

The number of arsons reported by individual law enforcement agencies is available in Tables 8-11, arson trend data (indicating a year-to-year change) are in Tables 12-15, and arson clearance data (crimes solved) can be found in Arson Table 2 and Tables 25-28.

Overview

- In 2022, law enforcement agencies (providing from 1 to 12 months of arson data) reported 26,994 arsons. Participating agencies provided expanded offense data regarding 25,694 arsons. (Based on Tables 12 and 15.)
- More than 37 percent (37.4) of all arson offenses involved structures (e.g., residential, storage, public, etc.). Mobile property was involved in 20.5 percent of arsons, and other types of property (such as crops, timber, fences, etc.) accounted for 42.1 percent of reported arsons. (Based on Table 15.)

- Arson offenses decreased 5.7 percent in 2022 when compared with arson data reported in 2021. (See Table 12.)
- Nationwide, there were 11.8 arson offenses for every 100,000 inhabitants. (Based on Table 12.)

Expanded data

Expanded offense data are the details of the various offenses that the program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapons used in a crime, type or value of items stolen, and so forth. In addition, expanded data include trends (for example, 2-year comparisons) and rates per 100,000 inhabitants.

Expanded information regarding arson is available in the following tables:

Trends (2-year): Tables 12, 13, 14, and 15

Property types: Table 15

Arson Table 1, Arson Rate, by Population Group, 2022

Arson Table 2, Arson, by Type of Property, 2022

Long description for Clearance Figure

This figure shows the percentages of violent and property crimes cleared by arrest or exceptional means in 2022. Among violent crimes, the individual offenses and their respective clearance percentages are murder and nonnegligent manslaughter, 52.3 percent; rape, 26.1 percent; robbery, 23.2 percent; and aggravated assault, 41.4 percent. Of property crimes, the individual offenses and their respective clearance percentages are burglary, 13.0 percent; larceny-theft, 12.4 percent; and motor vehicle theft, 9.3 percent.

Clearance Figure

Percent of Crimes Cleared by Arrest or Exceptional Means, 2022

Offenses Cleared

In the FBI's Uniform Crime Reporting (UCR) Program, law enforcement agencies can clear, or "close," offenses in one of two ways: by arrest or by exceptional means. Although an agency may administratively close a case, that does not necessarily mean that the agency can clear the offense for UCR purposes. To clear an offense within the UCR Program's guidelines, the reporting agency must adhere to certain criteria, which are outlined in the following text. (*Note: The UCR Program does not distinguish between offenses cleared by arrest and those cleared by exceptional means in collecting or publishing data via the traditional Summary Reporting System.*)

Cleared by arrest

In the UCR Program, a law enforcement agency reports that an offense is cleared by arrest, or solved for crime reporting purposes, when three specific conditions have been met. The three conditions are that at least one person has been:

- Arrested.
- Charged with the commission of the offense.
- Turned over to the court for prosecution (whether following arrest, court summons, or police notice).

In its clearance calculations, the UCR Program counts the number of offenses that are cleared, not the number of persons arrested. The arrest of one person may clear several crimes, and the arrest of many persons may clear only one offense. In addition, some clearances that an agency records in a particular calendar year, such as 2022, may pertain to offenses that occurred in previous years.

Cleared by exceptional means

In certain situations, elements beyond law enforcement's control prevent the agency from arresting and formally charging the offender. When this occurs, the agency can clear the offense *exceptionally*. Law enforcement agencies must meet the following four conditions in order to clear an offense by exceptional means. The agency must have:

- Identified the offender.
- Gathered enough evidence to support an arrest, make a charge, and turn over the offender to the court for prosecution.
- Identified the offender’s exact location so that the suspect could be taken into custody immediately.
- Encountered a circumstance outside the control of law enforcement that prohibits the agency from arresting, charging, and prosecuting the offender.

Examples of exceptional clearances include, but are not limited to, the death of the offender (e.g., suicide or justifiably killed by police or citizen); the victim’s refusal to cooperate with the prosecution after the offender has been identified; or the denial of extradition because the offender committed a crime in another jurisdiction and is being prosecuted for that offense. In the UCR Program, the recovery of property alone does not clear an offense.

Clearances involving only persons under 18 years of age

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program considers the incident for which the juvenile is being held responsible to be cleared by arrest, even though a physical arrest may not have occurred. When clearances involve both juvenile and adult offenders, those incidents are classified as clearances for crimes committed by adults. Because the clearance percentages for crimes committed by juveniles include only those clearances in which no adults were involved, the figures in this publication should not be used to present a definitive picture of juvenile involvement in crime.

Overview

- In the nation in 2022, 36.7 percent of violent crimes and 12.1 percent of property crimes were cleared by arrest or exceptional means. (See Table 25.)
- When considering clearances of violent crimes, 52.3 percent of murder offenses, 41.4 percent of aggravated assault offenses, 26.1 percent of rape offenses, and 23.2 percent of robbery offenses were cleared. (See Table 25.)

- Among property crimes, 13.0 percent of burglary offenses, 12.4 percent of larceny-theft offenses, and 9.3 percent of motor vehicle theft offenses were cleared. (See Table 25.)
- In 2022, 25.2 percent of arson offenses were cleared by arrest or exceptional means. (See Table 25.)

	Percent cleared	43.4	57.0	29.5	29.0	48.0	15.2	14.7	15.8	11.7	28.4		

¹ Not all agencies submit reports for arson to the FBI. As a result, the number of reports the FBI uses to compute the percent of offenses cleared for arson is less than the number it uses to compute the percent of offenses cleared for all other offenses.

² Suburban area includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban area excludes all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

Suburban area excludes all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

Expanded Offense Data

Definition

Expanded offense data are the details of the various offenses that the Uniform Crime Reporting Program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapon used in a crime, type or value of items stolen, and so forth. For example, expanded homicide data provide supplemental details about murders, such as the age, sex, race, and ethnicity of both the victim and the offender, the weapon used in the homicide, the circumstances surrounding the offense, and the relationship of the victim to the offender. In addition to these types of details, expanded data include trends (for example, 2-year comparisons) and crime rates per 100,000 inhabitants.

Data collection

Expanded offense data, including expanded homicide data, are details collected in addition to the reports of the number of crimes known. As a result, law enforcement agencies can report an offense without providing the supplemental information about that offense.

Expanded data by offense

Murder

Trends (2-year): Tables 12, 13, and 14

Rates (per 100,000 inhabitants): Tables 16, 17, and 18

Weapons: Table 20

Expanded Homicide Data Tables

Victim data: Expanded Homicide Data Tables 1, 2, 4, 5, 6, 9, 10, and 13

Offender data: Expanded Homicide Data Tables 3, 4, 5, and 6

Victim/offender relationship data: Expanded Homicide Data Tables 4, 5, and 6

Circumstance data: Expanded Homicide Data Tables 10, 11, 12, and 13

Weapons: Expanded Homicide Data Tables 7, 8, 9, 11, 14, 15, and Table 20

Justifiable Homicide data: Expanded Homicide Data Tables 14 and 15

Rape

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Robbery

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Weapons: Tables 15, 19, 21, and Robbery Table 3

Offense analysis (e.g., location type): Table 23

Location type within region: Robbery Table 1

Location type within population group: Robbery Table 2

Aggravated assault

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Weapons: Tables 15, 19, 22, and Aggravated Assault Table

Burglary

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Offense analysis (e.g., location type): Table 23

Larceny-theft

Expanded homicide figures description

Murder by relationship figure:

In this figure, bar graphs and a pie chart visually represent the relationships of murder victims to their offenders. The statistics are based on the supplementary homicide data that law enforcement agencies submitted to the FBI for 19,196 murder victims who were slain in 2022.

Pie chart:

Of the homicides that occurred in 2022 for which supplementary homicide data were received, the relationships of the murder victims to their offenders were as follows: 2,220 victims (11.6 percent) were slain by family members; 2,011 victims (10.5 percent) were murdered by strangers; and 4,949 victims (25.8 percent) were slain by “other known” offenders. The offenders were not known for 10,016 murder victims (52.2 percent).

Bar graphs:

The first bar graph provides a breakdown of the 2,220 familial relationships of victims to offenders based on supplementary homicide data from 2022: 110 husbands were killed by their wives, 518 wives were slain by their husbands, 224 mothers were murdered by their children, 248 fathers were killed by their children, 276 sons were slain by their parents, 190 daughters were murdered by their parents, 161 brothers were killed by their

siblings, 63 sisters were slain by their siblings, and 430 victims were murdered by other family members (i.e., familial relationships other than those mentioned above).

A second bar graph depicts the 4,949 “other known” (that is, nonfamilial) relationships of victims to offenders based on supplementary homicide data from 2022: 3,407 victims were killed by acquaintances, 535 were slain by friends, 228 boyfriends were murdered by their girlfriends, 596 girlfriends were killed by their boyfriends, 157 victims were slain by their neighbors, 14 employees were murdered by their employers, and 12 employers were killed by their employees.

Expanded Homicide Data Figure

Murder by Relationship¹

Percent Distribution,² Volume by Relationship, 2022

¹ Relationship is that of victim to offender.

² Due to rounding, the percentages may not add to 100.0.

NOTE: Figures are based on **19,196** murder victims for whom Supplementary Homicide Report data were received.

Expanded Homicide Data

Data collection

The FBI's Uniform Crime Reporting (UCR) Program collects supplementary homicide data that provide the age, sex, race, and ethnicity of the murder victim and offender; the type of weapon used; the relationship of the victim to the offender; and the circumstance surrounding the incident. Statistics gleaned from these supplemental data are provided in this section.

This section also includes information about justifiable homicide—certain willful killings that must be reported as justifiable or excusable. In the UCR Program, justifiable homicide is defined as and limited to:

- The killing of a felon by a peace officer in the line of duty.
- The killing of a felon, during the commission of a felony, by a private citizen.

Because these killings are determined through law enforcement investigation to be justifiable, they are tabulated separately from murder and nonnegligent manslaughter. Justifiable homicide information can be found in Expanded Homicide Data Table 14, “Justifiable Homicide, by Weapon, Law Enforcement, 2018–2022” and Expanded Homicide Data Table 15, “Justifiable Homicide, by Weapon, Private Citizen, 2018–2022.”

Overview

- In 2022, most (78.1 percent) of the 19,196 murder victims for whom supplemental data were received were male. (Based on Expanded Homicide Data Table 1.)
- Of the murder victims for whom race was known, 54.5 percent were Black or African American, 40.1 percent were White, and 3.0 percent were of other races. Race was unknown for 454 victims. (See Expanded Homicide Data Table 2.)

- Almost half (49.5 percent) of all murders for which the UCR Program received supplemental data were single victim/single offender situations. (See Expanded Homicide Data Table 4.)
- Of the offenders for whom gender was known, 87.8 percent were male. (Based on Expanded Homicide Data Table 3.)
- When the race of the offender was known, 48.3 percent were Black or African American, 33.2 percent were White, and 18.5 percent were of other races. The race was unknown for 3,076 offenders. (Based on Expanded Homicide Data Table 3.)
- Seventy-seven percent of the homicides for which the FBI received weapons data in 2022 involved the use of firearms. (Based on Expanded Homicide Data Table 8.)
- In 2022, 25.8 percent of homicide victims were killed by someone they knew other than family members (acquaintance, neighbor, friend, boyfriend, etc.), 11.6 percent were slain by family members, and 10.5 percent were killed by strangers. The relationship between murder victims and offenders was unknown in 52.2 percent of murder and nonnegligent manslaughter incidents. (Based on Expanded Homicide Data Table 10.)
- Circumstances were known for 51.6 percent of murders for which supplementary details were reported in 2022. Of those, 48.1 percent of victims were murdered during arguments. Felony-type murders (i.e., murders that occurred in conjunction with the commission of another felony crime such as rape, robbery, burglary, etc.) accounted for 15.5 percent of homicides for which circumstances were known. (Based on Expanded Homicide Data Table 11.)
- Law enforcement reported 779 justifiable homicides in 2022. Of those, law enforcement officers justifiably killed 316 felons, and private citizens justifiably killed 463 offenders during the commission of crimes. (See Expanded Homicide Data Tables 14 and 15.)

Expanded homicide data tables

The following tables were compiled using information from the Supplementary Homicide Data:

2022	463	411	281	11	4	115	27	14	11

¹The killing of a felon, during the commission of a felony, by a private citizen.

NOTE: Prior years' crime data has been updated; therefore, data presented in this table may not match previously published data.

Arrests

Definition

The FBI's Uniform Crime Reporting (UCR) Program counts one arrest for each separate instance in which a person is arrested, cited, or summoned for an offense. The UCR Program collects arrest data on 28 offenses, as described in Offense Definitions. (Please note that, as of 2010, the UCR Program no longer collects data on runaways.) Because a person may be arrested multiple times during a year, the UCR arrest figures do not reflect the number of individuals who have been arrested; rather, the arrest data show the number of times that persons are arrested, as reported by law enforcement agencies to the UCR Program.

Important note about rape data

In 2013, the UCR Program initiated the collection of rape data under a revised definition and removed the term “forcible” from the offense name. The UCR Program now defines rape as follows:

Rape (revised definition): Penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim. (This includes the offenses of rape, sodomy, and sexual assault with an object as converted from data submitted via the National Incident-Based Reporting System.)

Rape (legacy definition): The carnal knowledge of a female forcibly and against her will.

For tables that present data for 2022 only or provide a 2-or 5-year trend, the rape figures are based on the revised UCR definitions. For 10-year trend tables, the rape figures for the previous year (2013) are based on the legacy definition and the 2022 rape figures are based on the revised definition. For this reason, a percent change is not provided.

Data collection—juveniles

The UCR Program considers a juvenile to be an individual under 18 years of age regardless of state definition. The program does not collect data regarding police contact

with a juvenile who has not committed an offense, nor does it collect data on situations in which police take a juvenile into custody for his or her protection, e.g., neglect cases.

Overview

- Nationwide, law enforcement made an estimated 7,364,553 arrests in 2022. Of these arrests, 429,593 were for violent crimes, and 791,013 were for property crimes. (Note: the UCR Program does not collect data on citations for traffic violations.) (See Table 29.)
- The highest number of arrests were for drug abuse violations (estimated at 907,958 arrests), driving under the influence (estimated at 788,402), and larceny-theft (estimated at 582,456). (See Table 29.)
- The estimated arrest rate for the United States in 2022 was 2,181.7 arrests per 100,000 inhabitants. The arrest rate for violent crime (including murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) was 129.1 per 100,000 inhabitants, and the arrest rate for property crime (burglary, larceny-theft, motor vehicle theft, and arson) was 235.8 per 100,000 inhabitants. (See Table 30.)
- Two-year arrest trends show violent crime arrests increased 1.1 percent in 2022 when compared with 2021 arrests, and property crime arrests increased 10.5 percent when compared with 2021 arrests. (See Table 36.)
- Arrests of juveniles for all offenses increased 17.7 percent in 2022 when compared with the 2021 number; arrests of adults decreased 1.1 percent. (See Table 36.)
- Just over 73 percent (73.1) of the persons arrested in the nation during 2022 were males. They accounted for 79.1 percent of persons arrested for violent crime and 66.3 percent of persons arrested for property crime. (See Table 42.)
- In 2022, 67.9 percent of all persons arrested were White, 28.1 percent were Black or African American, and the remaining 4.0 percent were of other races. (See Table 43.)

Expanded arrest data

Expanded data about arrests include information about the age, gender, race, and ethnicity of the arrestees. These data are available in the following tables:

Age: Tables 32, 34, 36, 38, 39, 40, 41, 44, 46, 47, 50, 52, 53, 56, 58, 59, 62, 64, and 65

Gender: Tables 33, 35, 37, 39, 40, 42, 45, 48, 51, 54, 57, 60, 63, and 66

Race and Ethnicity: Tables 43, 49, 55, 61, and 67

Table 29**Estimated Number of Arrests**

United States, 2022

Total¹	7,364,553
Murder and nonnegligent manslaughter	12,317
Rape	19,660
Robbery	58,410
Aggravated assault	339,206
Burglary	120,840
Larceny-theft	582,456
Motor vehicle theft	78,179
Arson	9,538
Violent crime ²	429,593
Property crime ²	791,013
Other assaults	947,552
Forgery and counterfeiting	29,166
Fraud	77,942
Embezzlement	9,587
Stolen property; buying, receiving, possessing	83,352
Vandalism	163,329
Weapons; carrying, possessing, etc.	181,267
Prostitution and commercialized vice	15,250
Sex offenses (except rape and prostitution)	24,535
Drug abuse violations	907,958
Gambling	1,418
Offenses against the family and children	47,340
Driving under the influence	788,402
Liquor laws	98,507
Drunkenness ³	17,465
Disorderly conduct	242,611
Vagrancy	16,051
All other offenses	2,485,165
Suspicion ⁴	85
Curfew and loitering law violations	7,050

¹ Does not include suspicion.

² Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

³ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

⁴ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

¹ Does not include suspicion.² The 2013 rape figures are based on the legacy definition, and the 2022 rape figures are aggregate totals based on both the legacy and revised Uniform Crime Reporting definitions. For this reason, a percent change is not provided.³ Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.⁴ The 2013 drunkenness figures were submitted by agencies that reported via Summary and National Incident Based Reporting System (NIBRS). As of 2021, drunkenness is no longer a separate offense in NIBRS, but it is included with All Other Offenses (except traffic) category.⁵ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

¹ Does not include suspicion.² Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.³ The 2018 figures for drunkenness were submitted by agencies that reported via Summary and those that reported via National Incident Based Reporting System (NIBRS). As of 2021, drunkenness is no longer a separate offense in NIBRS, but it is included with All Other Offenses (except traffic) category.⁴ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

¹ Because of rounding, the percentages may not add to 100.0.

² Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

³ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in National Incident Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

⁴ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

* Less than one-tenth of 1 percent.

¹ Because of rounding, the percentages may not add to 100.0.

² Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

³ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in National Incident Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

⁴ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

* Less than one-tenth of 1 percent.

¹ Because of rounding, the percentages may not add to 100.0.² The ethnicity totals are representative of those agencies that provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not equal.³ Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.⁴ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.⁵ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

* Less than one-tenth of 1 percent.

¹ Does not include suspicion.² Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.³ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in National Incident Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.⁴ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

¹ Because of rounding, the percentages may not add to 100.0.

² Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

³ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in National Incident Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

⁴ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

* Less than one-tenth of 1 percent.

¹ Because of rounding, the percentages may not add to 100.0.

² The ethnicity totals are representative of those agencies that provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not equal.

³ Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

⁴ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

⁵ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

¹ Does not include suspicion.² Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.³ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

⁴ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

¹ Because of rounding, the percentages may not add to 100.0.² Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.³ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in National Incident Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.⁴ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

* Less than one-tenth of 1 percent.

¹ Because of rounding, the percentages may not add to 100.0.

² The ethnicity totals are representative of those agencies that provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not equal.

³ Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

⁴ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

⁵ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

* Less than one-tenth of 1 percent.

¹ Because of rounding, the percentages may not add to 100.0.

² The ethnicity totals are representative of those agencies that provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not equal.

³ Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

⁴ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

⁵ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

* Less than one-tenth of 1 percent.

¹ Because of rounding, the percentages may not add to 100.0.

² Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

³ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in National Incident Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

⁴ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

* Less than one-tenth of 1 percent.

¹ Because of rounding, the percentages may not add to 100.0.

² The ethnicity totals are representative of those agencies that provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not equal.

³ Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

⁴ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

⁵ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

* Less than one-tenth of 1 percent.

¹ Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban areas exclude all metropolitan agencies associated with a principal city.

² Does not include suspicion.

³ Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

⁴ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

⁵ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

¹ Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban areas exclude all metropolitan agencies associated with a principal city.² Because of rounding, the percentages may not add to 100.0.³ Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.⁴ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in National Incident Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.⁵ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

* Less than one-tenth of 1 percent.

¹ Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban areas exclude all metropolitan agencies associated with a principal city.² Because of rounding, the percentages may not add to 100.0.³ The ethnicity totals are representative of those agencies that provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not equal.⁴ Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.⁵ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.⁶ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

* Less than one-tenth of 1 percent.

Curfew and loitering law violations	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-

¹ Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban areas exclude all metropolitan agencies associated with a principal city.

² Because of rounding, the percentages may not add to 100.0.

³ The ethnicity totals are representative of those agencies that provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not equal.

⁴ Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

⁵ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

⁶ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

* Less than one-tenth of 1 percent.

¹ Does not include traffic arrests.

² Violent crimes in this table are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

³ Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in National Incident Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

⁴ Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

⁵ Includes arrests reported by the Metro Transit Police. This agency has no population associated with it.

⁶ Limited data for 2022 were available for Florida, Illinois, Maryland, and Pennsylvania.

⁷ The Florida arrest counts for offenses against the family and children, drunkenness, disorderly conduct, vagrancy, suspicion, and curfew and loitering law violations are included under the category All other offenses (except for the data submitted by NIBRS agencies using those specific breakdowns).

⁸ See 2022 arrest data information in the downloadable *Methodology* file for further explanation.

NOTE: Because the number of agencies submitting arrest data varies from year to year, users are cautioned about making direct comparisons between 2022 arrest totals and those published in previous years' editions of *Crime in the United States*. Further, arrest figures may vary widely from state to state because some Part II crimes are not considered crimes in some states.

Police Employees

Definition

The Uniform Crime Reporting (UCR) Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds allocated specifically for sworn law enforcement representatives.

User's note

Because of law enforcement's varied service requirements and functions, as well as the distinct demographic traits and characteristics of each jurisdiction, readers should use caution when drawing comparisons between agencies' staffing levels based on police employment data from the UCR Program. In addition, the data presented here reflect existing staffing levels and should not be interpreted as preferred officer strengths recommended by the FBI. Lastly, it should be noted that the totals given for sworn officers for any particular agency reflect not only the patrol officers on the street, but also the officers assigned to various other duties such as those in administrative and investigative positions and those assigned to special teams.

Data collection

Each year, law enforcement agencies across the United States report to the UCR Program the total number of sworn law enforcement officers and civilians in their agencies as of October 31.

Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.

Summary overview

- A total of 14,099 city and county law enforcement agencies provided data on the number of full-time law enforcement employees (sworn officers and civilian personnel) on staff in 2022. (See Table 70.)
- Nationwide, the rate of sworn officers was 2.3 per 1,000 inhabitants. The rate of full-time law enforcement employees (civilian and sworn) per 1,000 inhabitants was 3.3. (Based on Table 74.)
- In 2022, the highest rate of officers to individuals among the city population groups was an average of 4.3 officers per 1,000 inhabitants in cities with fewer than 10,000 residents. (See Table 71.)
- County agencies reported an average of 2.6 officers per 1,000 inhabitants. (See Table 71.)
- Sworn officers accounted for 69.5 percent of all law enforcement personnel in the United States in 2022. (Based on Table 74.)

Methodology

The tabular presentation that follows briefly describes the data sources and the methods used to construct Tables 70–81.

(1) Table	(2) Database	(3) Table Construction	(4) General Comments
70	The information in this table is derived from law enforcement employee counts (as of October 31, 2022) submitted by participating agencies.	<p>This table provides the number and rate per 1,000 inhabitants of law enforcement employees broken down by region, geographic division, and population group.</p> <p>The totals for full-time law enforcement employees in metropolitan and nonmetropolitan counties are combined in this table.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 decennial population counts and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	<p>The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement.</p> <p>Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.</p>

	submitted by participating agencies.	<p>The totals for full-time law enforcement officers in metropolitan and nonmetropolitan counties are combined in this table.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 decennial population counts and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	set aside specifically to pay sworn law enforcement.
72	The information in this table is derived from law enforcement employee counts (as of October 31, 2022) submitted by participating agencies.	<p>This table includes the number of agencies that fall within specified rate ranges of employment by population group for law enforcement personnel, both sworn officers and civilian employees.</p> <p>The FBI derived the rate of full-time law enforcement employees per population group by first dividing the aggregated total of personnel for the group by the aggregated estimated populations covered by the contributing agencies within the group and then multiplying the resulting figure by 1,000.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 decennial population counts and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	<p>The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement.</p> <p>Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.</p> <p>Agencies with no resident population; i.e., those associated with universities and colleges (see Table 79), other agencies (see Table 81), and some state agencies; are excluded from this table. Therefore, the total number of agencies used in this table differs from that provided</p>

			in other law enforcement employee tables.
73	The information in this table is derived from law enforcement officer counts (as of October 31, 2022) submitted by participating agencies.	<p>This table includes the number of agencies that fall within specified rate ranges of employment by population group for law enforcement officers.</p> <p>The FBI derived the rate of full-time law enforcement officers per population group by first dividing the aggregated total of officers for the group by the aggregated estimated populations covered by the contributing agencies within the group and then multiplying the resulting figure by 1,000.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 decennial population counts and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	<p>The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement.</p> <p>Agencies with no resident population; i.e., those associated with universities and colleges (see Table 79), other agencies (see Table 81), and some state agencies; are excluded from this table. Therefore, the total number of agencies used in this table differs from that provided in other law enforcement officer tables.</p>
74	The information in this table is derived from law enforcement employee counts (as of October 31, 2022) submitted by participating agencies.	<p>This table includes the number of reported sworn law enforcement officers and civilian employees broken down by population group. The totals are also broken down by percent male and percent female.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 decennial population counts and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to</p>	<p>The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement.</p> <p>Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants,</p>

		its 2021 Census population estimate to derive the agency's 2022 population estimate.	stenographers, jailers, correctional officers, and mechanics.
75	The information in this table is derived from civilian law enforcement counts (as of October 31, 2022) submitted by participating agencies.	<p>This table includes data about civilian law enforcement employees by population group.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 decennial population counts and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.
76	The information in this table is derived from law enforcement employee counts (as of October 31, 2022) submitted by participating agencies.	This table provides the number of state law enforcement employees, the number of male officers, the number of female officers, the number of male civilian employees, and the number of female civilian employees listed alphabetically by state.	<p>The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement.</p> <p>Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.</p> <p>Caution should be used when comparing data from one state to that of another. The responsibilities of the various state police, highway patrol, and department of public safety agencies range from full law</p>

			enforcement duties to only traffic patrol, which can impact both the level of employment for agencies as well as the ratio of sworn officers to civilians employed. Any valid comparison must take these factors and the other identified variables affecting crime into consideration.
77	The information in this table is derived from law enforcement employee counts (as of October 31, 2022) submitted by participating agencies.	<p>This table provides the number of law enforcement employees, the number of male officers, the number of female officers, the number of male civilian employees, and the number of female civilian employees listed alphabetically by state.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 decennial population counts and 2021 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2021 Census population estimate to derive the agency's 2022 population estimate.</p>	<p>The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement.</p> <p>Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.</p>
78	The information in this table is derived from law enforcement employee counts (as of October 31, 2022) submitted by participating agencies.	<p>This table provides the number of law enforcement officers and civilians employed by city/town law enforcement agencies listed alphabetically by state.</p> <p>For the 2022 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 decennial population counts and 2021 population estimates from the U.S. Census Bureau. ¹ Full-time law enforcement employees include civilians.² The number of agencies used to compile these figures differs from other tables that include data about law enforcement employees because agencies with no resident population are excluded from this table. Agencies not included in this table are associated with universities and colleges (see Table 79) and other agencies (see Table 81), as well as some state agencies that have concurrent jurisdiction with other local law enforcement.³ Because of rounding, the percentages may not add to 100.0.

¹ Police employee data were not received from the State Police/Highway Patrol for the state.

² Data reported are the number of law enforcement employees for the state of New Jersey.

NOTE: Caution should be used when comparing data from one state to that of another. The responsibilities of the various state police, highway patrol, and department of public safety agencies range from full law enforcement duties to only traffic patrol, which can impact both the level of employment for agencies as well as the ratio of sworn officers to civilians employed. Any valid comparison must take these factors and the other identified variables affecting crime into consideration.

Data Declarations and Methodology for Federal Tables

Federal Table 1 Offenses Known to Law Enforcement by Federal Agency, 2022

Data Declaration

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

General comment

This table provides the volume of violent crime (murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) and property crime (burglary, larceny-theft, and motor vehicle theft) as reported by federal law enforcement agencies that contributed data to the UCR Program. (Note: Arson is not included in the property crime total in this table; however, complete arson data were provided and appear in the arson column.)

Caution against ranking

Readers should take into consideration relevant factors in addition to an agency's crime statistics when making any valid comparisons of crime among different agencies or locales. *UCR Statistics: Their Proper Use* provides more details.

Methodology

The data used in creating this table are from federal agencies submitting 12 months of complete offense data for 2022.

Federal Table 2 Full-time Law Enforcement Employees by Federal Agency, 2022

Data Declaration

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

General comment

This table provides the total number of law enforcement employees, total officers, and total civilians employed by participating federal agencies.

Methodology

The information in this table is derived from law enforcement employee counts (as of October 31, 2022) submitted by participating agencies. The UCR Program defines law enforcement officers as individuals

who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement. Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.

¹ Complete information was not provided for four employees. Therefore, those employees are not included in the totals.

² The Bureau of Indian Affairs submits these statistics to the FBI Uniform Crime Reporting Program on a yearly basis and can be found in Table 81 of *Crime in the United States, 2022*.

Cargo Theft, 2022

Cargo Theft, 2022, is the ninth cargo theft report released by the FBI's Uniform Crime Reporting (UCR) Program. Forty-eight states participated in the data collection in 2022 as well as the Bureau of Indian Affairs and the District of Columbia Metro Transit. In 2022, 47 states submitted at least one cargo theft incident.

The FBI's UCR Program collects cargo theft data to inform the law enforcement community, federal and state legislators, academia, and the public at large about this particular crime. The data can be used to create awareness and to measure the impact cargo theft has on the economy and potential threats to national security. Often, cargo theft offenses are part of larger criminal schemes and have been found to be components of organized crime rings, drug trafficking, and funding for terrorism. The UCR collection of cargo theft data is relatively new with only 9 years of data published, but the number of agencies reporting cargo theft incidents has increased each year.

On January 1, 2021, the FBI's UCR Program transitioned to a National Incident-Based Reporting System (NIBRS) only data collection. Since the transition, the FBI's UCR Program has worked diligently to offer resources such as programming and technical support, training, and outreach to law enforcement agencies. Despite more than 11,500 law enforcement agencies submitting NIBRS data, participation for 2021 remained below a statistically acceptable level to be nationally representative. For the 2022 data year, to provide nationally representative data, the FBI accepted Summary Reporting System (SRS) data submissions from non-transitioned agencies.

Participation

Participation in the UCR Program is voluntary, and agencies or states may choose not to participate. Since the first publication of cargo theft data in 2013, the number of states and federal agencies participating has steadily increased each year.

Although participation in the cargo theft data collection has steadily increased each year since its inception, several factors have a direct impact on this important data collection:

- States may not have the resources required to make the necessary technical changes or to align their local and state statutes with federal requirements.
- States may not have the necessary resources to conduct data quality checks on reported incidents associated with cargo theft, which could result in inaccurate data.
- States may not have adequate resources to train participants on how to recognize and properly record cargo theft incidents.
- States may not perceive cargo theft as a priority or a significant problem within their states and make decisions based on their immediate needs regarding resource allocation.

USA Patriot Improvement and Reauthorization Act of 2005

Due to the significant economic impact cargo theft has on the United States economy, and the potential for use by terrorist organizations, Congress mandated H.R. 3199, the USA Patriot Improvement and Reauthorization Act of 2005 on March 9, 2006. It required the Attorney General to “take the steps necessary to ensure that reports of cargo theft collected by federal, state, and local officials are reflected as a separate category in the Uniform Crime Reporting System, or any successor system, by no later than December 31, 2006.” In response to this mandate, the Criminal Justice Information Services Advisory Policy Board approved a definition for collecting cargo theft in December 2006. In 2010, data specifications required to capture cargo theft data in the UCR Program’s SRS as well as the NIBRS were finalized, and the FBI’s UCR Program released the first cargo theft report in 2013.

What is cargo theft?

Cargo theft is defined as “The criminal taking of any cargo including, but not limited to, goods, chattels, money, or baggage that constitutes, in whole or in part, a commercial shipment of freight moving in commerce, from any pipeline system, railroad car, motor truck, or other vehicle, or from any tank or storage facility, station house, platform, or depot, or from any vessel or wharf, or from any aircraft, air terminal, airport, aircraft terminal or air navigation facility, or from any intermodal container, intermodal chassis, trailer, container freight station, warehouse, freight distribution facility, or freight consolidation facility. For purposes of this definition, cargo shall be deemed as moving in commerce at all points between the point of origin and the final destination, regardless of any temporary stop while awaiting transshipment or otherwise.”

This definition does not serve as a legal description for prosecutorial purposes. Instead, it was developed to capture the essence of the national cargo theft problem in the United States. The legal elements of knowledge and intent were intentionally omitted.

Quality data concerning cargo theft can help us better understand this crime and the threats associated with it. As more agencies choose to report their incidents, the FBI’s UCR Program will be able to provide more information about cargo theft on a national scale. For additional information on the FBI UCR Program’s collection of cargo theft incidents, visit <https://www.fbi.gov/about-us/cjis/ucr/ucr-program-data-collections>.

Under the umbrella of the FBI’s UCR Program, cargo theft data has traditionally been released on FBI.gov on the UCR Publications webpage. However, beginning in 2021, all UCR data is being released exclusively on the FBI’s Crime Data Explorer (CDE) website where data users can access and sort a variety of data. The content of the CDE comes from data collections such as Law Enforcement Officers Killed and Assaulted, Hate Crime Statistics, the National Incident-Based Reporting System, and National Use-of-Force. UCR data from previous years will also be accessible on the CDE. Cargo Theft reports from previous years can be accessed at <https://ucr.fbi.gov/crime-in-the-u.s> in *Crime in the United States* publications.

The following Cargo Theft tables are available as part of this compressed file download:

Table 1
Cargo Theft by State
by Incidents, and Stolen, Recovered Values, 2022

Table 2
Cargo Theft Property Stolen and Recovered
by Type and Value, 2022

Table 3
Cargo Theft by Location, 2022

Table 4
Cargo Theft by Victim Type, 2022

Table 5
Cargo Theft by Offense, 2022

Data Declarations and Methodology

Table 1 Cargo Theft by State by Incidents, and Stolen, Recovered Values, 2022

The FBI collects these data through the Uniform Crime Reporting Program's Summary Reporting System and National Incident-Based Reporting System.

General comment

This table presents by state the total number of agencies that submitted data about cargo theft incidents, the number of incidents reported, the reported value of stolen property, and the value of recovered property. The table also lists the percentage of recovered value for each submitting state.

Due to technical system changes and data quality issues, some cargo theft data may be inflated.

Methodology

The data used in creating this table were from all law enforcement agencies submitting one or more cargo theft incidents for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year.

Table 2 Cargo Theft Property Stolen and Recovered by Type and Value, 2022

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Summary Reporting System and National Incident-Based Reporting System.

General comment

The value of stolen and recovered property, and the percentage of recovered value of each property type is reflected within this table.

Due to technical system changes and data quality issues, some cargo theft data may be inflated.

Note: Based on UCR guidelines, the property descriptions of credit/debit cards, nonnegotiable instruments, documents/personal or business, and identity-intangible, must be submitted with zero value for stolen and/or recovered.

Methodology

The data used in creating this table were from all law enforcement agencies submitting one or more cargo theft incidents for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year.

Table 3 **Cargo Theft by Location, 2022**

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Summary Reporting System and National Incident-Based Reporting System (NIBRS).

General comment

Cargo theft is the criminal taking of any cargo including, but not limited to, goods, chattels, money, or baggage that constitutes, in whole or in part, a commercial shipment of freight moving in commerce, from any pipeline system, railroad car, motor truck, or other vehicle, or from any tank or storage facility, station house, platform, or depot, or from any vessel or wharf, or from any aircraft, air terminal, airport, aircraft terminal or air navigation facility, or from any intermodal container, intermodal chassis, trailer, container freight station, warehouse, freight distribution facility, or freight consolidation facility. For purposes of this definition, cargo shall be deemed as moving in commerce at all points between the point of origin and the final destination, regardless of any temporary stop while awaiting transshipment or otherwise.

This table presents the number of location types reported in cargo theft incidents.

Due to technical system changes and data quality issues, some cargo theft data may be inflated.

Note: In NIBRS, a location may be entered for each offense; therefore, an incident may have more than one location code reported.

Methodology

The data used in creating this table were from all law enforcement agencies submitting one or more cargo theft incidents for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year.

To arrive at the totals provided, the UCR Program counted one for each offense location reported in an incident.

Table 4 **Cargo Theft by Victim Type, 2022**

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Summary Reporting System and National Incident-Based Reporting System.

General comment

This table presents the number of victim types in each of the cargo theft incidents reported to the FBI. The victim of a cargo theft may be an individual, a business, an institution, or society as a whole.

Due to technical system changes and data quality issues, some cargo theft data may be inflated.

Methodology

The data used in creating this table were from all law enforcement agencies submitting one or more cargo theft incidents for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year.

To arrive at the totals provided, the UCR Program counted one for each victim type reported in an incident.

Table 5

Cargo Theft by Offense, 2022

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Summary Reporting System and National Incident-Based Reporting System.

General comment

Cargo theft is the criminal taking of any cargo including, but not limited to, goods, chattels, money, or baggage that constitutes, in whole or in part, a commercial shipment of freight moving in commerce, from any pipeline system, railroad car, motor truck, or other vehicle, or from any tank or storage facility, station house, platform, or depot, or from any vessel or wharf, or from any aircraft, air terminal, airport, aircraft terminal or air navigation facility, or from any intermodal container, intermodal chassis, trailer, container freight station, warehouse, freight distribution facility, or freight consolidation facility. For purposes of this definition, cargo shall be deemed as moving in commerce at all points between the point of origin and the final destination, regardless of any temporary stop while awaiting transshipment or otherwise.

Because cargo theft is defined as “the criminal **taking of** any cargo . . .,” specific crimes against property apply to cargo theft. The applicable crimes against property include:

- 120 = Robbery
- 23D = Theft from building
- 23F = Theft from motor vehicle
- 23H = All other larceny
- 26A = False pretenses, swindle, confidence game
- 26B = Credit card, automatic teller machine fraud
- 26C = Impersonation
- 26E = Wire fraud
- 26F = Identity theft
- 26G = Hacking, computer invasion
- 210 = Extortion, blackmail
- 220 = Burglary, breaking & entering
- 240 = Motor vehicle theft
- 270 = Embezzlement
- 510 = Bribery

In addition, cargo theft is not considered an offense by itself; all offenses that happen within a cargo theft incident are to be reported. Cargo theft data are derived by capturing the additional element of “theft of cargo” in incidents that contain any of the applicable offenses.

This table shows the number of offenses specific to cargo theft and the number of additional offenses reported within a verified cargo theft incident.

Due to technical system changes and data quality issues, some cargo theft data may be inflated.

Methodology

The data used in creating this table were from all law enforcement agencies submitting one or more cargo theft incidents for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year.

To arrive at the totals provided, the UCR Program counted one offense for each offense type reported in an incident.

Table 1**Cargo Theft by State**by Incidents, and Stolen, Recovered Values, 2022¹

State	Number of agencies reporting an incident	Number of incidents reported	Value of property		Percent recovered

Human Trafficking, 2022

Human Trafficking, 2022, is the ninth report from the FBI Uniform Crime Reporting (UCR) Program's Human Trafficking data collection. Forty-nine (49) states and the U.S. territory of Puerto Rico participated, and data for Kansas were submitted through the Bureau of Indian Affairs. The 2022 report shows a total of 2,753 incidents of human trafficking were reported: 2,195 were in the category of commercial sex acts, and 617 were instances of involuntary servitude. (Puerto Rico submitted one incident in the Total column and did not specify whether that incident was under the category of commercial sex acts or involuntary servitude.) Agencies arrested 513 offenders in correlation with these incidents. Of these, 495 were adults and 18 were juveniles.

Participation

Since its inception in 2013, the FBI's Human Trafficking data collection has seen a steady increase in state participation as well as an increase in the number of incidents reported. The program will continue efforts to expand, gather, and make available information regarding human trafficking incidents.

Trafficking Victims Protection Act

In January 2013, as authorized by the William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008, the FBI UCR Program began collecting offense and arrest data regarding human trafficking. The act requires the FBI to collect human trafficking offense data and to make distinctions between prostitution, assisting or promoting prostitution, and purchasing prostitution.

To comply with the Wilberforce Act, the FBI UCR Program created two additional offenses in the Summary Reporting System (SRS) and the National Incident-Based Reporting System (NIBRS) through which the FBI UCR Program collects both offense and arrest data. The definitions for these offenses are:

Human Trafficking/Commercial Sex Acts: inducing a person by force, fraud, or coercion to participate in commercial sex acts, or in which the person induced to perform such act(s) has not attained 18 years of age.

Human Trafficking/Involuntary Servitude: obtaining of a person(s) through recruitment, harboring, transportation, or provision, and subjecting such persons by force, fraud, or coercion into involuntary servitude, peonage, debt bondage, or slavery (not to include commercial sex acts).

The data tables included in this report reflect the offenses and arrests recorded by state and local law enforcement agencies that currently have the ability to report the data to the FBI UCR Program. As such, they should not be interpreted as a definitive statement of the level or characteristics of human trafficking in the nation as a whole. The data declaration pages, which will help the user better understand the data, and the methodology used for the four following tables are located in the *Data Declarations and Methodology* section of this report. In addition, a Questions and Answers section about human trafficking data is provided as a supplement to this report.

Under the umbrella of the FBI's Uniform Crime Reporting (UCR) Program, human trafficking data has traditionally been released on FBI.gov on the UCR Publications webpage. However, beginning in 2021,

all UCR data is being released exclusively on the FBI's Crime Data Explorer (CDE) website, where data users can access and sort a variety of data. The content of the CDE comes from data collections such as Law Enforcement Officers Killed and Assaulted, Hate Crime Statistics, the National Incident-Based Reporting System, and National Use-of-Force. UCR data from previous years will also be accessible on the CDE. Human Trafficking reports from previous years can also be accessed at <https://ucr.fbi.gov/crime-in-the-u.s> in *Crime in the United States* publications.

Note: Regarding the data reported to the FBI UCR Program, it is important to note that these data represent only one view of a complex issue—the law enforcement perspective. However, due to the nature of human trafficking, many of these crimes are never reported to the local, state, tribal, and federal law enforcement agencies that investigate them. In addition to the law enforcement facet in fighting these crimes, there are victim service organizations whose mission it is to serve the needs of the victims of human trafficking. In order to have the complete picture of human trafficking, it would be necessary to gather information from all these sources.

The following Human Trafficking tables are available as part of this compressed file download:

Table 1
Human Trafficking
Offenses and Clearances by State, 2022

Table 2
Human Trafficking Arrests
by Age by State, 2022

by Ethnicity by State, 2022

Data Declarations and Methodology

Human Trafficking Table 1

Offenses and Clearances by State, 2022

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Summary Reporting System and National Incident-Based Reporting System.

General Comment

This table includes the states that have added human trafficking offenses to their data collection. Even though a state program included human trafficking, the individual agencies in that state may or may not have added it to their collections. Each law enforcement agency is responsible for reporting its crime data directly to the FBI.

This table provides the volume of human trafficking offenses as reported by state. For UCR purposes, juveniles are individuals under the age of 18 years. Adults are 18 years of age or older.

Methodology

The data used in creating this table were from law enforcement agencies submitting one or more human trafficking incidents for at least 1 month of the calendar year. Also included are zero incident data for states that have incorporated human trafficking offenses in their data collection where no 2022 human trafficking incidents were reported to the FBI's UCR Program.

The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year. When the FBI determines an agency's data collection methodology does not comply with national UCR guidelines, the figure(s) for that agency's offense(s) will not be included in the table, and the discrepancy will be explained in a footnote.

Human Trafficking Table 2

by Age by State, 2022

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Summary Reporting System and National Incident-Based Reporting System.

General Comment

This table provides the number of juvenile and adult male and female persons arrested for human trafficking offenses by state in 2022. These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistic in this table could, in some cases, represent multiple arrests of the same person. For UCR purposes, juveniles are individuals under the age of 18 years. Adults are 18 years of age and older.

Methodology

The data used in creating this table were from law enforcement agencies submitting one or more human trafficking arrests for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year.

Human Trafficking Table 3

by Race by State, 2022

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Summary Reporting System and National Incident-Based Reporting System.

General Comment

This table provides the number of persons arrested for human trafficking offenses by state in 2022 broken down by race of the arrestee. These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person. For UCR purposes, juveniles are under the age of 18 years. Adults are 18 years of age and older.

Methodology

The data used in creating this table were from law enforcement agencies submitting one or more human trafficking arrests for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year.

Human Trafficking Table 4

by Ethnicity by State, 2022

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Summary Reporting System and National Incident-Based Reporting System.

General Comment

This table provides the number of persons arrested for human trafficking offenses by state in 2022 broken down by ethnicity of the arrestee. These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person. For UCR purposes, juveniles are individuals under the age of 18 years. Adults are 18 years of age and older.

Methodology

The data used in creating this table were from law enforcement agencies submitting one or more human trafficking arrests for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year.

Human Trafficking, 2022

Questions and Answers

Q: How long has human trafficking data been collected?

A: The Uniform Crime Reporting (UCR) Program began collecting human trafficking data in January 2013.

Q: What does it mean for an offense to be cleared?

A: An offense can be cleared by arrest or exceptional means.

An offense is cleared by arrest, or solved for crime reporting purposes, when at least one person is (1) arrested, (2) charged with the commission of the offense, and (3) turned over to the court for prosecution.

If an agency can answer all the following questions in the affirmative, it can clear the offense exceptionally.

1. Has the investigation definitely established the identity of the offender?
2. Is there enough information to support an arrest, charge, and turning over to the court for prosecution?
3. Is the exact location of the offender known so that the subject could be taken into custody now?
4. Is there some reason outside law enforcement control that precludes arresting, charging, and prosecuting the offender?

Generally, an offense can be exceptionally cleared when it falls into one of the following categories. (This list is not all-inclusive.)

1. Death of the offender.
2. Offender is prosecuted by state or local authorities in another city for a different offense or is prosecuted in another city or state by the federal government for an offense which may be the same.
3. Extradition denied/In the custody of other jurisdiction.
4. The handling of a juvenile offender—either orally or by written notice to parents—in instances involving minor offenses such as petty larceny.
5. Prosecution denied (for other than the lack of probable cause).

Although agencies may administratively close a case, this does not necessarily mean that the agency can clear the offense for UCR purposes.

Q: Were agencies that submitted less than 12 months of data included in the human trafficking report?

A: Yes, all submissions were included.

Q: What is the cutoff age for juveniles and adults?

A: For UCR purposes, juveniles are individuals under the age of 18 years. Adults are 18 years of age and older.

Q: What is the difference between the Summary Reporting System (SRS) and the National Incident-Based Reporting System (NIBRS) collections?

A: The FBI's UCR Program administers two data collections—the SRS and NIBRS. The general concepts for collecting, scoring, and reporting UCR data are applicable to both the SRS and NIBRS. Both

systems collect information on crimes reported to law enforcement or crimes law enforcement have witnessed and include reports in which no one was arrested.

The SRS provides monthly reports on ten Part I offenses known to law enforcement and reports on persons arrested. The Part I offenses of murder, rape, robbery, aggravated assault, human trafficking–commercial sex acts, human trafficking–involuntary servitude, burglary, motor vehicle theft, larceny-theft, and arson are considered indicators of the level of crime occurring within the United States. Data are collected at the aggregate level and lack incident-level details for crimes other than homicide. Within the SRS, the Hierarchy Rule governs multiple offense reporting. When more than one crime was committed by the same person or group of persons and the time and space intervals separating the crimes were insignificant, then the crime highest in the hierarchy is the only offense reported.

NIBRS is a more detail-oriented crime data collection system that captures specific elements about crimes and offenders through incident-based reporting. These details include information such as the date, time, location, and circumstance of the criminal incident; the characteristics of the victim and offender (such as the age, sex, race, and ethnicity); victim/offender relationship; the involvement of weapons or drugs; property loss; whether the crime was motivated by bias; or if a computer was used to perpetuate certain types of crimes.

Q: What are the benefits of NIBRS?

A: NIBRS provides a more comprehensive view of crime in the United States and offers greater flexibility in data compilation and analysis. When used to its full potential, NIBRS provides greater detail about when and where a crime occurred, what form it took, and the characteristics of its victims and offenders. Because it provides a broader depiction of the data, NIBRS provides law enforcement agencies with more exact information with which to address the concerns of its constituency regarding crime in their communities and to allocate resources. Likewise, legislators, municipal planners/administrators, academicians, sociologists, advocacy groups, and the public are provided with access to more extensive crime information than the SRS can offer. The data allow a better opportunity to study crime and criminal behavior.

The FBI intends for NIBRS to become the law enforcement community's standard for quantifying crime. Efforts are underway to assist states not yet certified as NIBRS contributors and expand NIBRS' ability to provide national crime data management standards and services to inform, educate, and strengthen communities through the UCR Program.

On January 1, 2021, the FBI's Uniform Crime Reporting (UCR) Program transitioned to a National Incident-Based Reporting System (NIBRS) only data collection. Since the transition, the FBI's UCR Program has worked diligently to offer resources such as programming and technical support, training, and outreach to law enforcement agencies. Despite more than 11,500 law enforcement agencies submitting NIBRS data, participation for 2021 remained below a statistically acceptable level to be nationally representative. For the 2022 data year, to provide nationally representative data, the FBI accepted Summary Reporting System data submissions from non-transitioned agencies.
